# 1. System Requirements

# 1-1.Standalone-1

## 1-1-1. What is standalone type?

- This type directly sets up the new electronic catalog data to PC's hard disk.  
Set up the DVD data to your own terminal, and read the data in your own terminal from the program (see [p.6] for details of the setup).

## 1-1-2.System requirements

ITEM	MODEL	NOTE
PC	IBM AT-BUS Compatible Model	Supporting Windows family*3 Memory : 64MB or more H/D : *5 Display : 1024 × 768 Pixels or higher-resolution*6
DVD Drive	Not specified	Supporting Windows family*3
Printer	Laser Printer Only	Supporting Windows family*3 (Not supported Line Printer)
Operating S/W	Windows family*3	

\*3) Windows family : Windows 98/2000/XP/Vista/7(32bit)/8(32bit)/8.1/10

\*6) higher-resolution : 1280 × 1024 Pixels

## Hard disk capacity

USE		NECESSARY H/D CAPACITY
OS operation		Suitable
EPC operation	DVD Data from DVD Drive	100MB per 1 Spec.
	DVD Data in H/D ( 4.7GB per 1DVD)	a) Initial: 100MB or more b) Catalogue DVD: 3.0GB per 1 Spec. c) Frame No. DVD: 3.0GB per 1 Spec.
Local data (Price/Locally Supplied P/No.)		Suitable

\*5) Hard disk capacity for Standalone to run EPC ( + + )

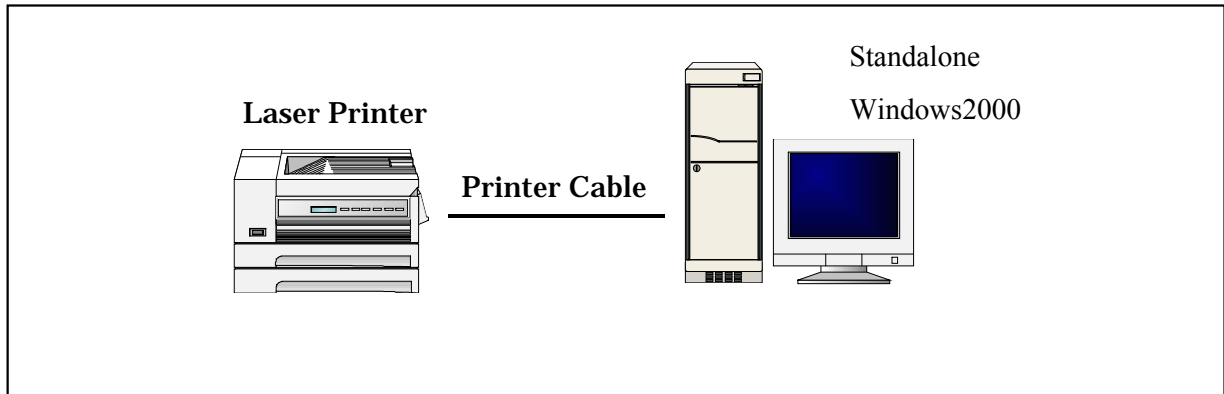

(Example) DVD Data for Europe spec.(A1) and Frame No. on Hard disk

: Suitable  
 : a)+b)+c) = (More than 100MB)+3GB+1.5GB  
           = More than 4600MB  
 : Suitable  
 + + =Necessary H/D capacity

# 1-1.Standalone-2

---

## 1-1-3. Basic Configuration for EPC Windows 2000

# 1-2.Server / Client type-1

## 1-2-1. What is Server / Client type?

This type performs the data setup by preparing the server specifically for the new electronic catalog, and read the data in the server from the client.

Approx. 10 clients is allocated for one server under the same building, and the number of the server is decided according to the number of clients (see [p.37] for details of the setup).

\* Clients need to install PGM, but the data setup is not required.

## 1-2-2.System requirements

ITEM		MODEL	NOTE
PC	Server	IBM AT-BUS Compatible Model	Supporting Windows Server family*1 Memory : 96MB or more H/D : *2 Display : 1024 × 768 Pixels or higher-resolution
	Client	IBM AT-BUS Compatible Model	Supporting Windows family*3 Memory : 64MB or more H/D : *4 Display : 1024 × 768 Pixels or higher-resolution *6
DVD Drive	Server	Not specified	Server must equip at least one DVD drive supporting Windows Server family*1
	Client	Not specified	Not necessary for EPC
Printer	Server	Laser Printer Only	Supporting Windows Server family*1
	Client	Not specified	Not necessary for EPC
Operating S/W	Server	Windows Server family*1	
	Client	Windows family*3	

\*1) Windows Server family : 2000Server/XP Professional/2003Server

\*3) Windows family : Windows 98/2000/XP/Vista/7(32bit)/8(32bit)/8.1/10

\*6) higher-resolution : 1280 × 1024 Pixels

## Hard disk capacity

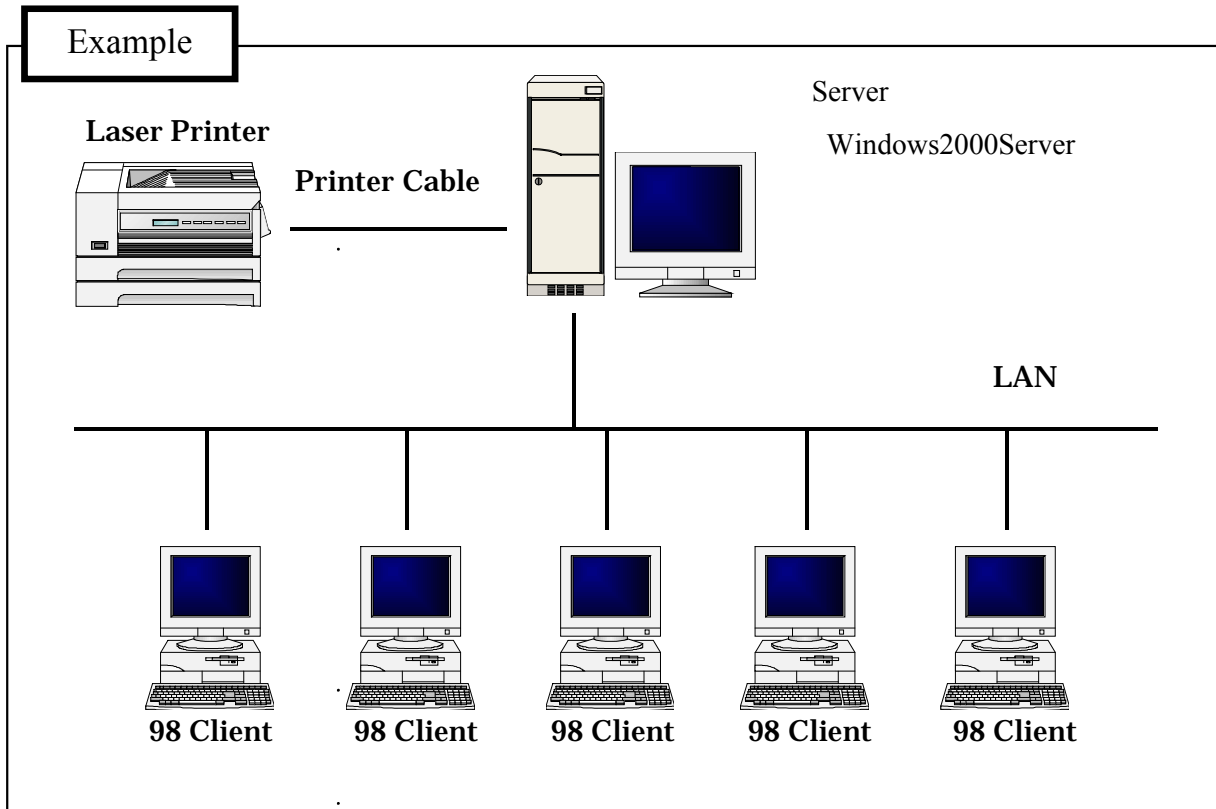

USE		NECESSARY H/D CAPACITY
Server	OS operation (Windows Server family*1)	Suitable
	EPC operation	DVD Data in H/D (*4.7GB per 1DVD)
	Local data (Price/Locally Supplied P/No.)	a) Initial: 100MB or more b) Catalogue DVD: 3.0GB per 1 Spec. c) Frame No. DVD: 3.0GB per 1 Spec.
Client	OS operation (Windows family*3)	Suitable
	EPC operation	100MB or more

\*2) Hard disk capacity for Server PC to run EPC ( + + )

\*4) Hard disk capacity for Client PC to run EPC ( + )

# 1-2.Server / Client type-2

## 1-2-3.Basic Configuration for EPC Windows 2000 & 98 Clients

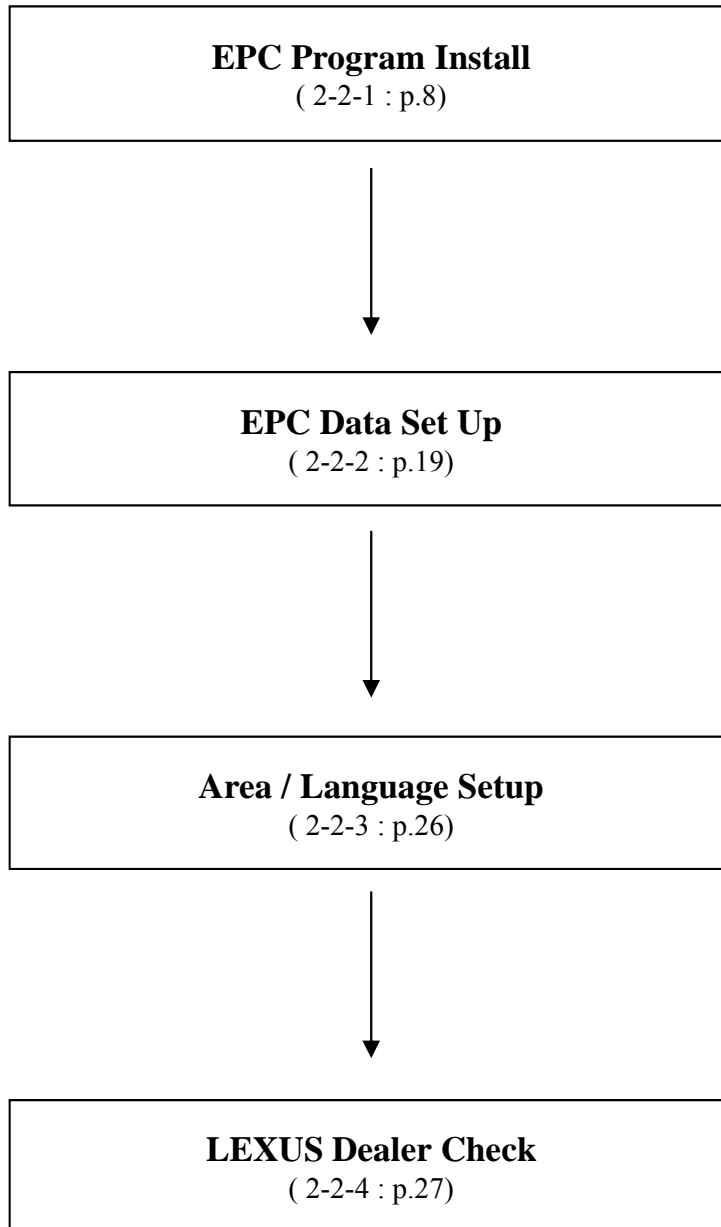

## 2. Setup Procedure of Standalone Type

# 2-1.Installation Flowchart

---

## Setup at Standalone PC

When updating program

When recovering program

# 2-2.Setup at Standalone PC-1

## 2-2-1.EPC Program Install

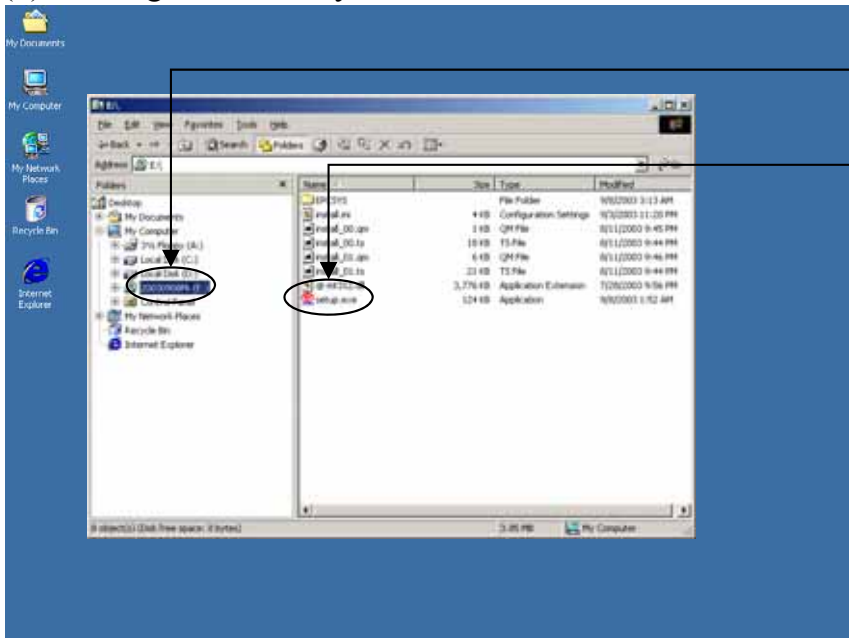

(1)Opening Windows and inserting a A1DVD to the DVD drive.

- \* Turn on your computer to open a Windows.
- \* After the Windows is start up, insert the A1DVD to the DVD-ROM drive.
- \* Right-click the “My Computer” on the desktop and left-click the “Explore”.

(2)Running the install system from a A1DVD.

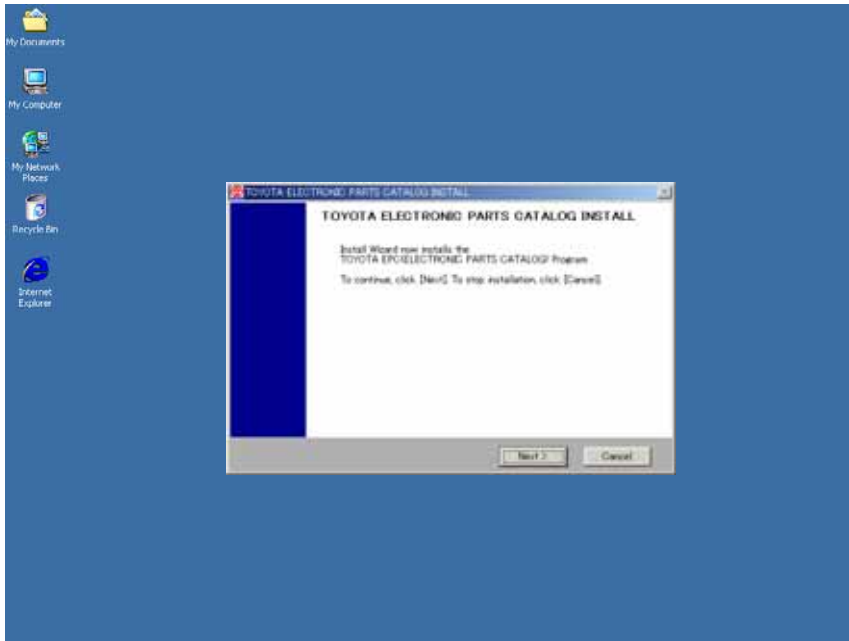

- \* Left-click the drive where you have set the A1DVD.
- \* Double-click the “setup.exe”.
- \* Do not use “Thumbnails” for the display of icons.

**Go on to the next page**

## 2-2.Setup at Standalone PC-2

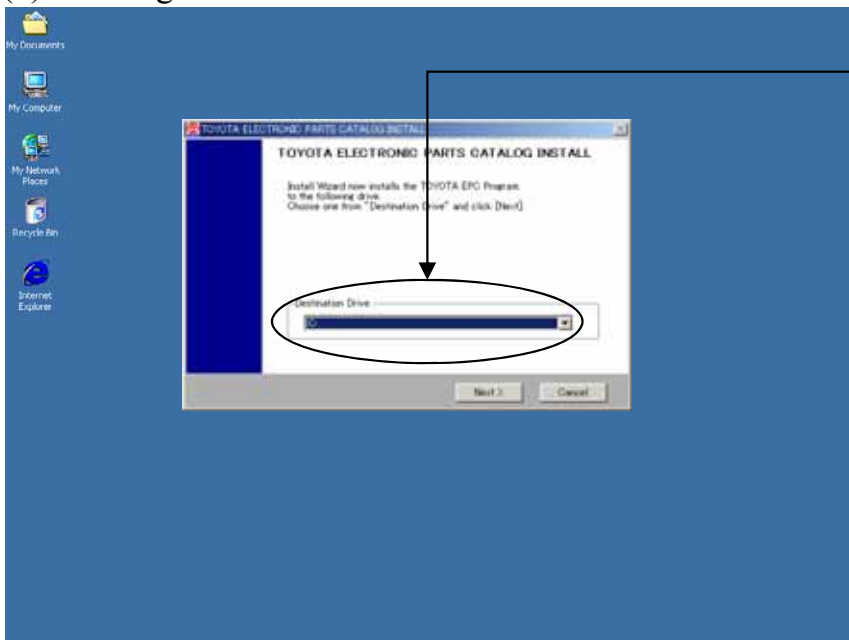

### (3)Starting the Installation

- \* To execute the TOYOTA EPC Install, left-click the “Next” button.
- \* To cancel the installation, left-click the “Cancel” button.
- \* A message for asking if you cancel the installation or not will appear again. Click the “OK” button to cancel the installation or click the “Cancel” to continue.

### (4)Selecting a drive for the installation.

- \* Select the drive where you want to install the TOYOTA EPC, and left-click the “Next” button.
- \* To cancel the installation, left-click the “Cancel” button.
- \* If installing for the first time, go to (6) [Selecting a system configuration].

**Go on to the next page**

## 2-2.Setup at Standalone PC-3

(5)Checking the Install Configuration [Some install configurations may have the following A) or B) case.]

A)In case that the EPC is already installed,

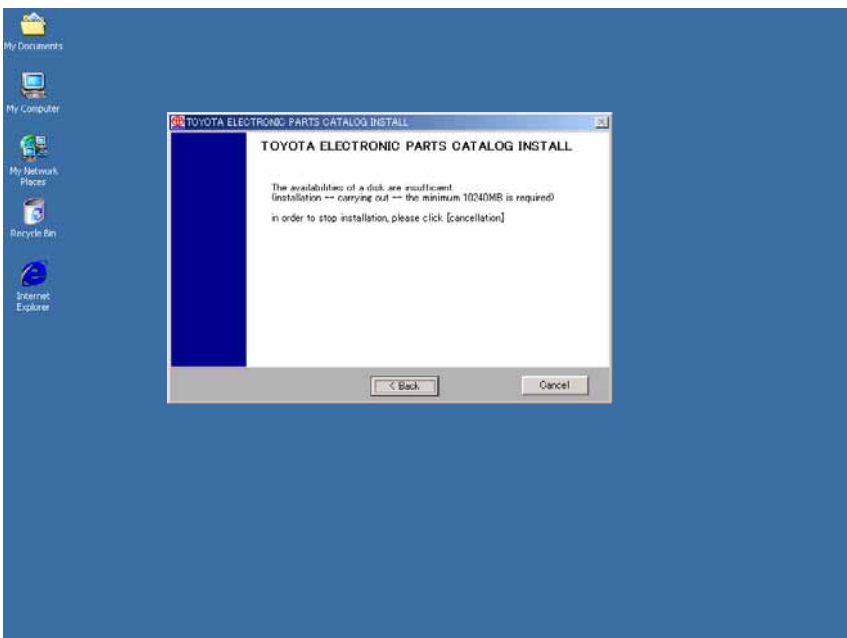

\* To install it again, left-click the “Next” button to transit to (7) [System Installation].

\*\* Even if a new system is already installed, another installation will maintain the existing setup information.

\* To go back to the previous screen (4) [Selecting a drive for the installation], left-click the “Back” button.

\* To cancel the installation, left-click the “Cancel” button.

B)In case that the disk space isn't enough,

\* The EPC installation needs the disk space of 10 MB.

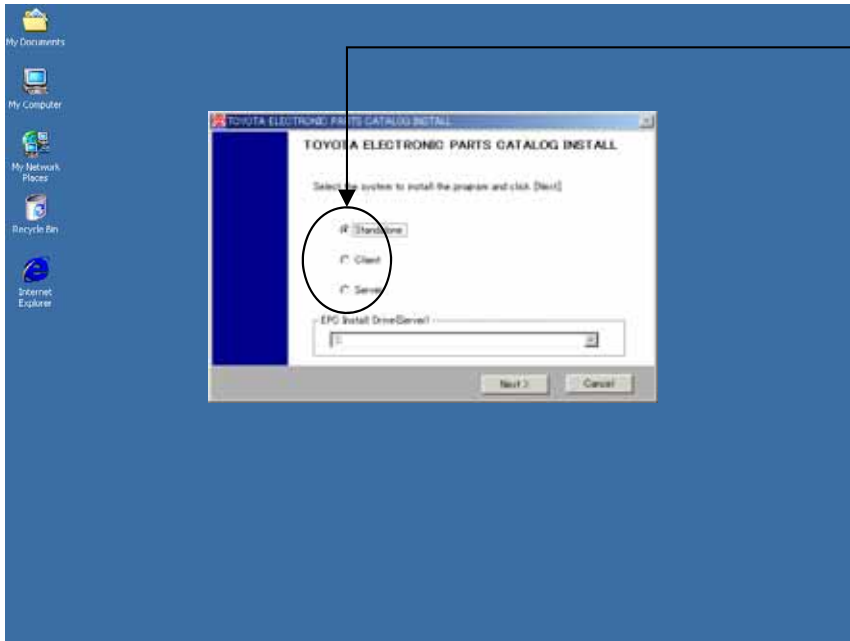

\* To change the drive for the installation, left-click the “Back” button to go back to the previous screen (4) [Selecting a drive for the installation].

\* To cancel the installation, left-click the “Cancel” button.

**Go on to the next page**

## 2-2.Setup at Standalone PC-4

### (6)Selecting a system configuration

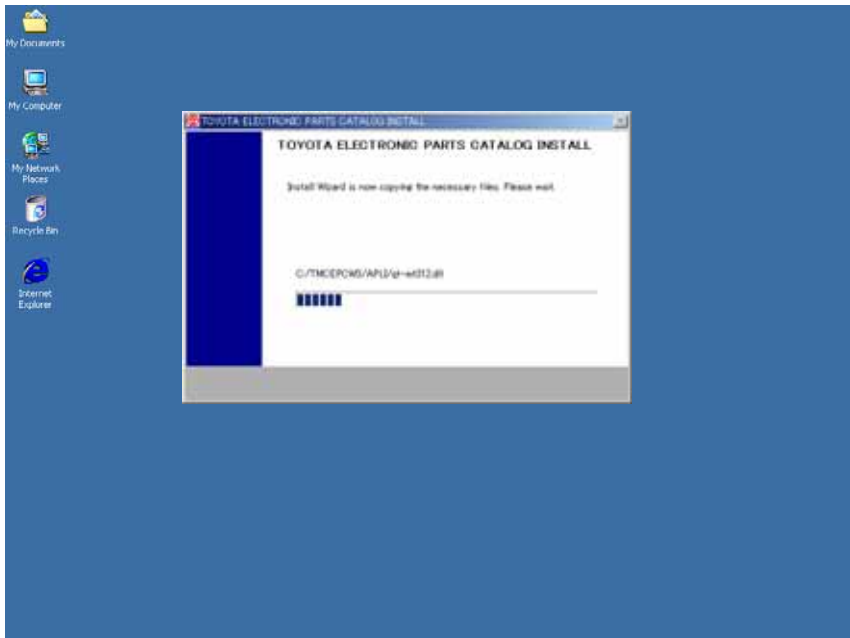

\* Select a system configuration ("Standalone") , and left-click the "Next" button.

\* To cancel the installation, left-click the "Cancel" button.

### (7)System Installation

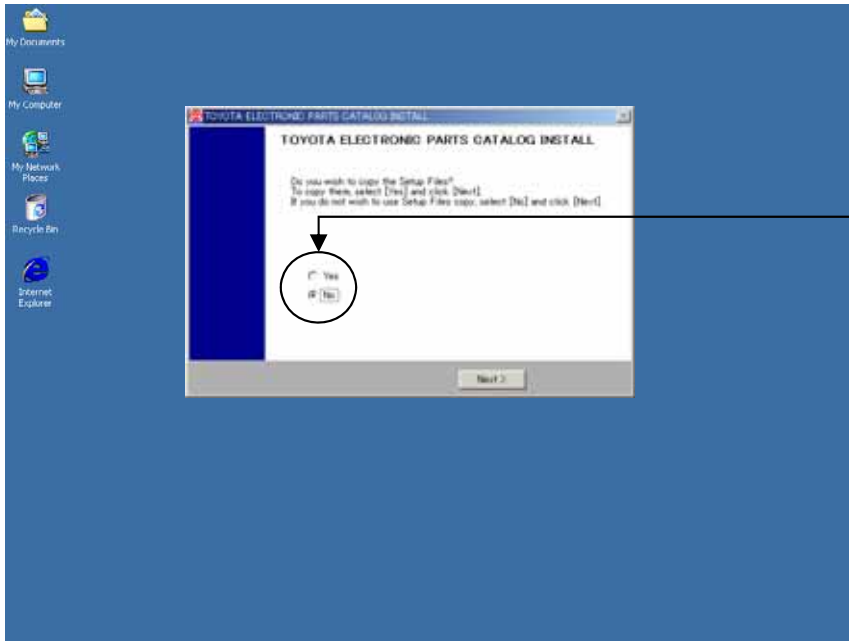

\* Wait for a while until the installation from the DVD has been completed.

**Go on to the next page**

## 2-2.Setup at Standalone PC-5

### (8)Copying a setup file

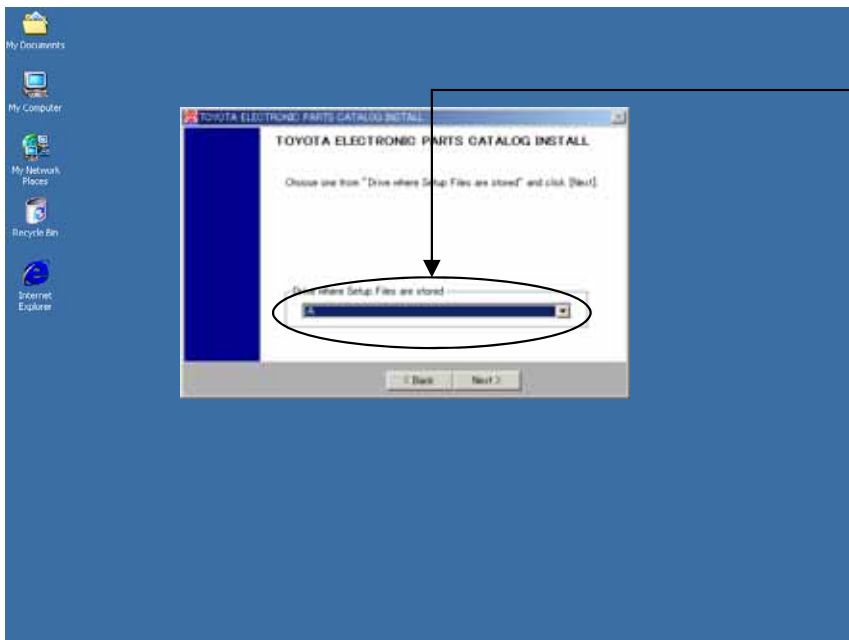

\* If there isn't the copy of the setup file, select the "No" and left-click the "Next" button to transit to (11) [Setting a background image].

\* If there is the setup file, select the "Yes" and left-click the "Next" button to transit to (9) [Selecting the drive where the setup file is inserted].

See (p.137) for the setup file copy

### (9)Selecting the drive where the setup file is inserted.

\* Insert a floppy with the setup file to the floppy drive, select the drive where you inserted the floppy, and then left-click the "Next" button.

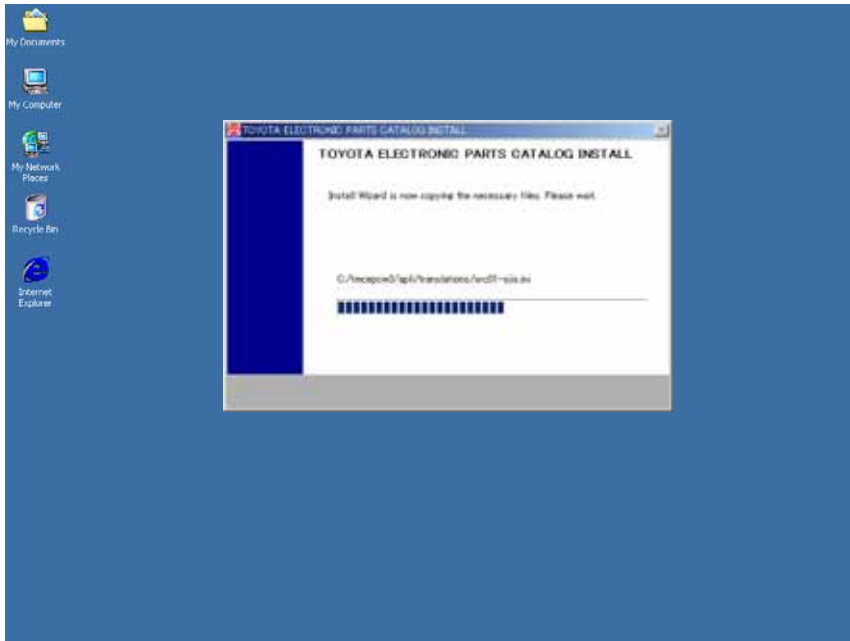

\* To cancel the copy of the setup file, left-click the "Back" button to go back to the previous screen (8) [Copying a setup file].

\*\* In the case that a correct floppy drive or a floppy with a correct setup file isn't setup, an error message of "An applicable file is not found." will appear. You should setup it again correctly.

**Go on to the next page**

## 2-2.Setup at Standalone PC-6

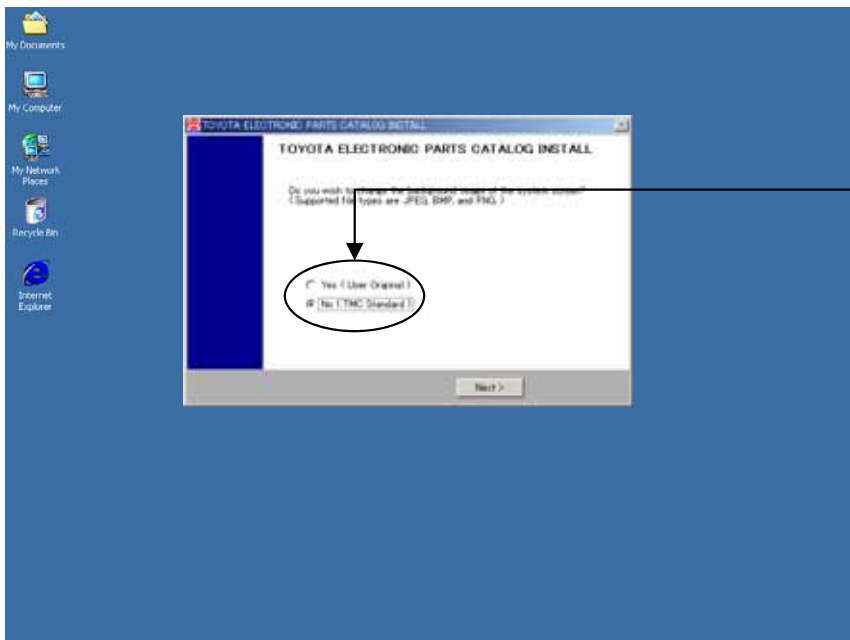

### (10) Copying a file

- \* Wait for a while until the setup file has been copied from the floppy.

### (11) Setting a background image

- \* If you setup the default background image to this EPC screen, select the "No" and left-click the "Next" button to transit to (13) [Completing the installation].
- \* If you want to setup the background image of your own choice to this EPC screen, select the "Yes" and left-click the "Next" button to transit to (12) [Selecting a background].

What is background image?

You can display the image you prefer as background of the menu screen.

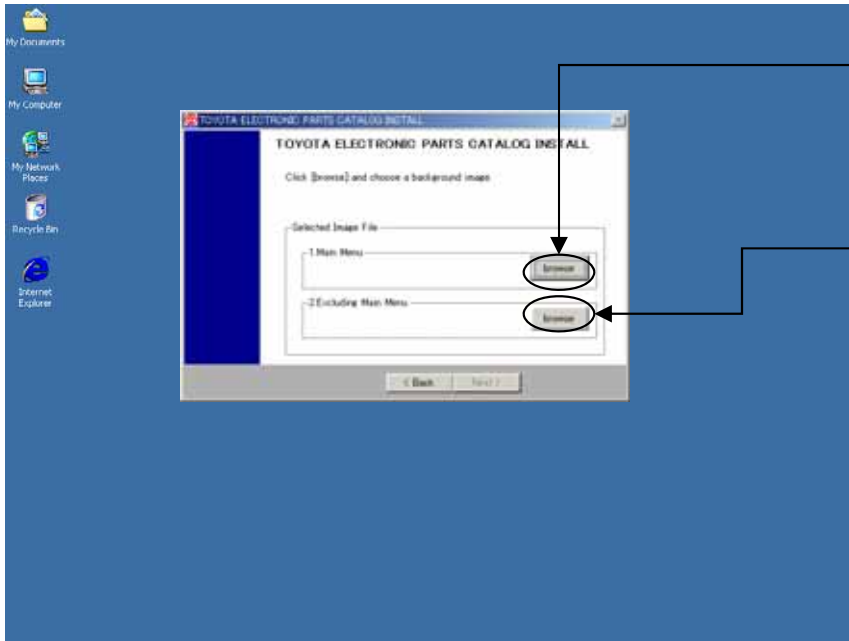

**Go on to the next page**

## 2-2.Setup at Standalone PC-7

### (12)Selecting a background image

\* To setup the background image to the Main Menu, left-click the “browse” button and select a file, then left-click the “Next” button.

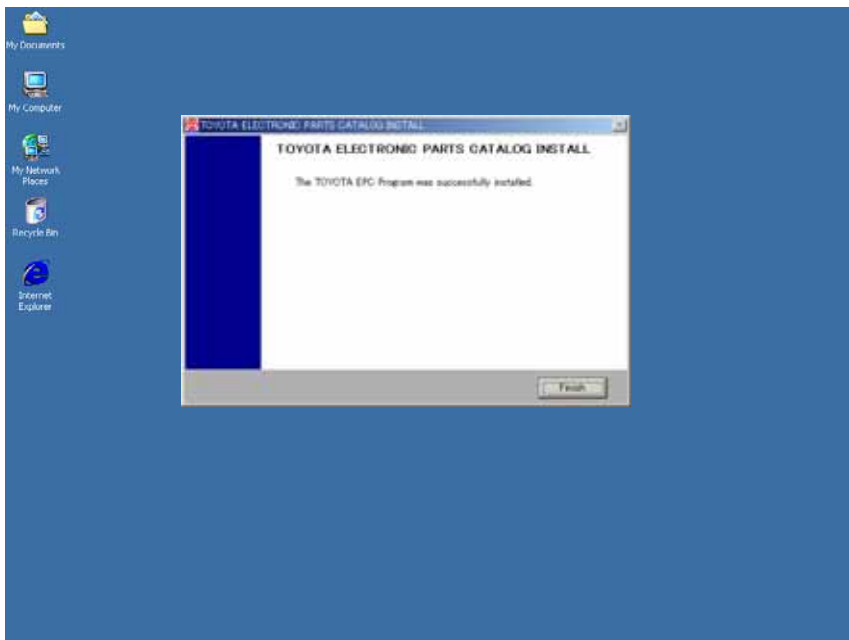

\* To setup the background image to other than the Main Menu, left-click the “browse” button and select a file, then left-click the “Next” button.

\*\* The file types of JPEG, BMP, and PNG can be selected as a background image.

\* To go back to the previous screen (11) [Setting a background image], left-click the “Back” button.

### (13)Completing the installation

\* As the EPC installation is completed, left-click the “Finish” button.

\*\* When the installation is complete, extract the A1DVD from the DVD-ROM drive.

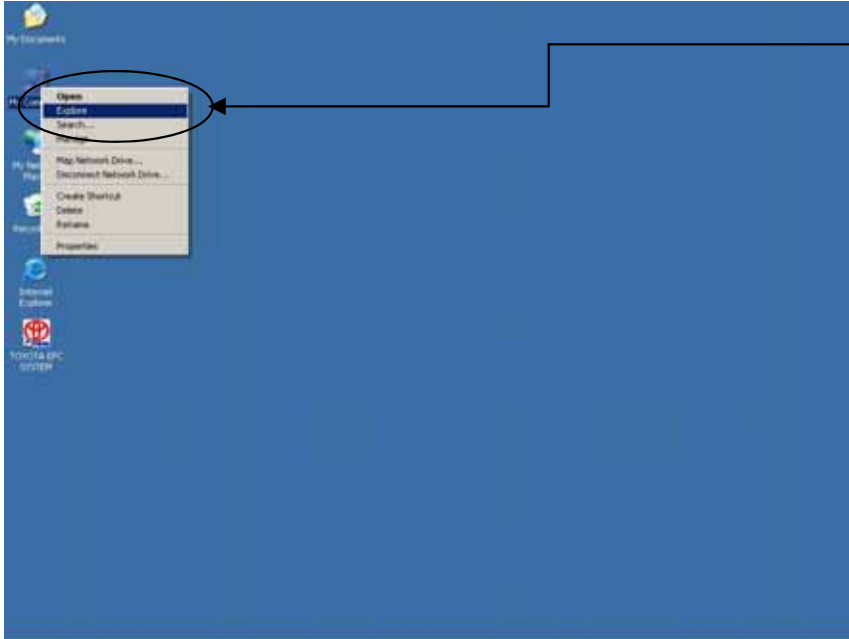

**Go on to the next page**

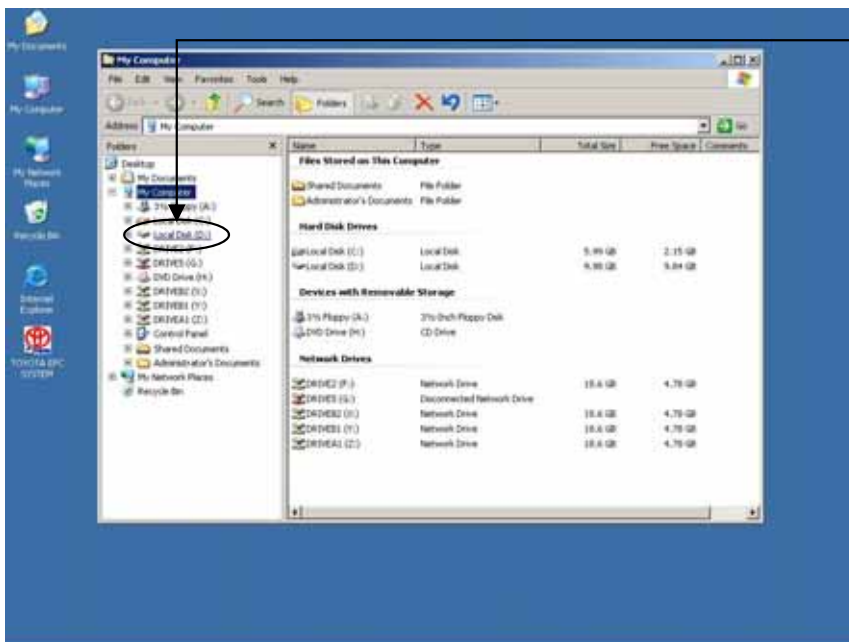

# 2-2.Setup at Standalone PC-8

When having used the 2007 version of this New EPC, please kindly follow the following procedure of (14) and (15).  
When newly using the 2008 version of this New EPC, you do not need to follow the procedure of (14) and (15).

(14)Deleting number information of the old frames

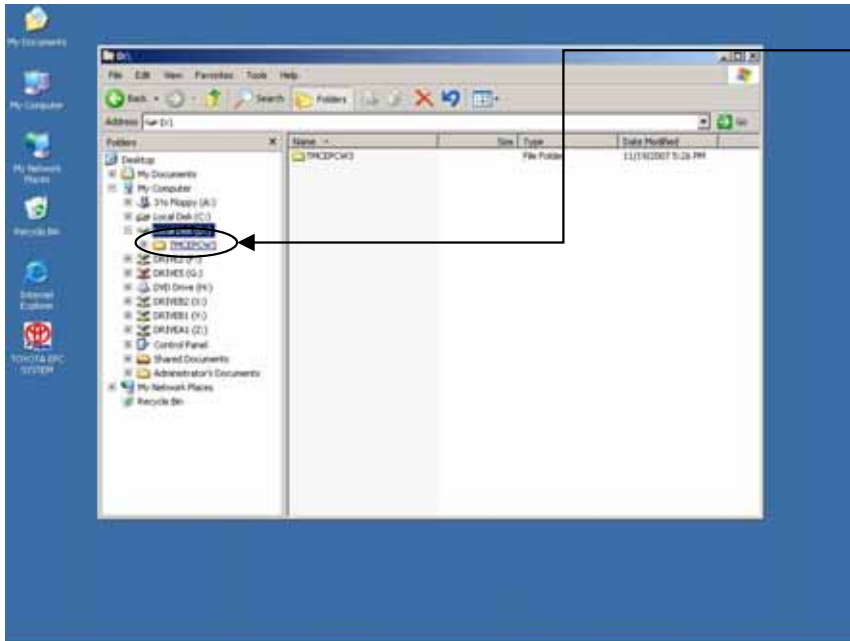

\* Right-click the “My Computer” on the desktop and left-click the “Explore”.

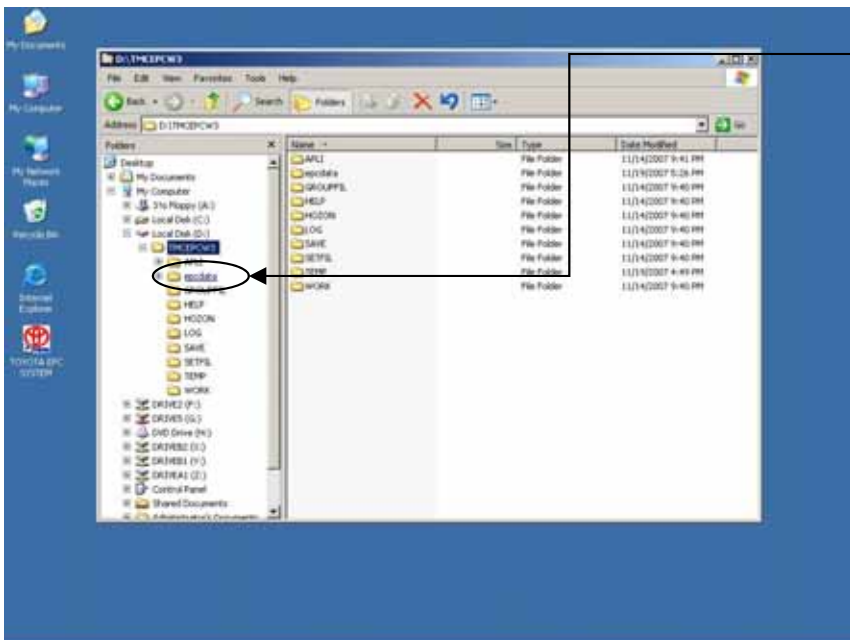

\* Left-click the drive where the data is set up.

## 2-2.Setup at Standalone PC-9

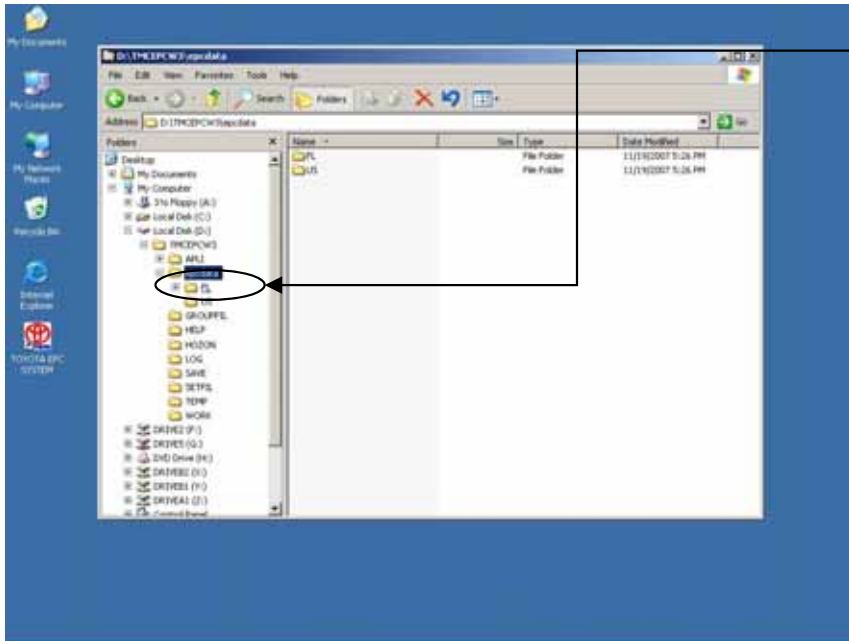

\* Left-click the "TMCEPCW3" folder.

\* Left-click the "epcdata" folder.

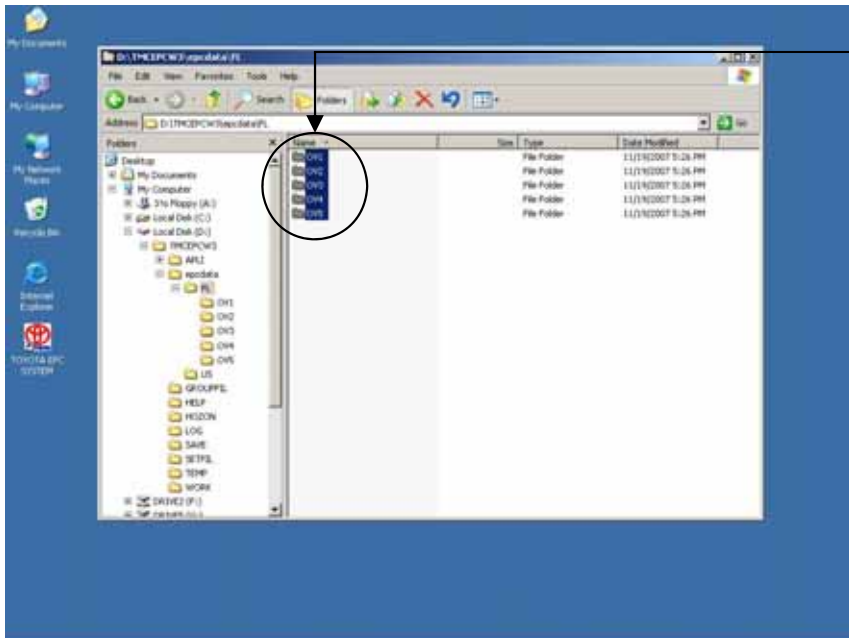

## 2-2.Setup at Standalone PC-10

\* Left-click the "FL" folder.

(15) Deleting the folders OV1-OV5

\* If the folders "OV1"- "OV5" exist, delete them with Shift+Delete.

\*\* If the "OV" folder already exists, do not delete this folder.

# 2-2.Setup at Standalone PC-11

## (16)Starting the TOYOTA EPC SYSTEM

\*Insert the A1DVD to the DVD drive.

\* Double-click the “TOYOTA EPC SYSTEM” on the desktop to start the TOYOTA EPC SYSTEM.

### **\*If using the current EPC group setup file...**

#### **Setup procedure**

- 1.Copy the Group Setup Files to the Floppy Disk.  
(Group Setup Files: TMCMSTW2YGCGRPMEL.D and TMCMSTW2YGCGRPPNC.D)
- 2.See (8) [Copying a setup file] on (p.12).

### **\*If you want to uninstall EPC...**

In PC drive where EPC program is installed, delete ‘TMCEPCW3’ folder.  
And delete EPC shortcut icon on the desktop.

**Go on to the next page**

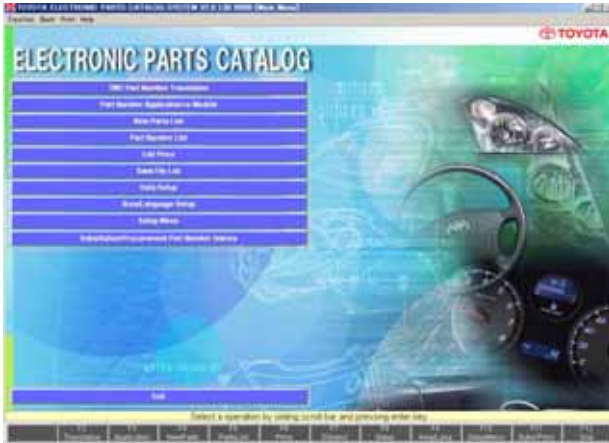

# 2-2.Setup at Standalone PC-12

## 2-2-2.EPC Data Setup

### (1) Data environment setup

**\* Press Setup Menu.**

**Click Data Configuration button.**

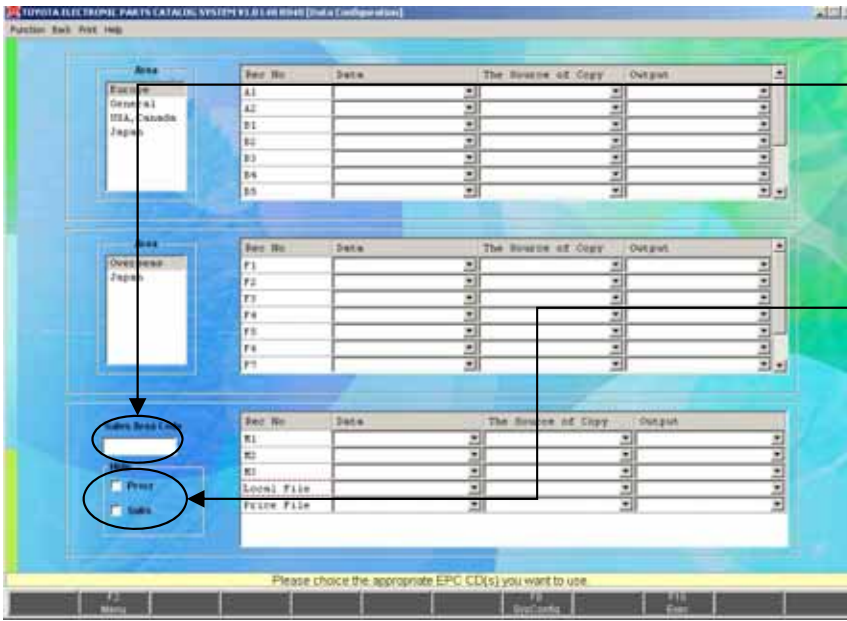

#### Reference: Description of the buttons in Setup Menu screen

- \* Data Configuration : Sets up Data Operation(DVD/Hard Disk/Server).  
Run this setup first after the EPC system is installed.
- \* Data Setup : Sets up the data with the contents created on the [Data Configuration] screen.  
This setup must be run whenever the data is update.
- \* Area/Language Setup : Sets up Data Language and Screen Language.  
Select an Area when the data of multiple Areas are setup.
- \* Group Setup : Catalog Codes and Part Name Codes which are often searched should  
be registered here so that you can search the data by Group Code.
- \* Screen File Setup : Use when changing a displayed title on the screen.
- \* Setup File Copy : The setup Environment can be copied on other computers  
It will be helpful to operate multiple computers under the same  
environment.
- \* Locally Supplied Parts Setup : Setup the data here when searching for Locally Supplied Parts.
- \* Price File Setup : Setup the data here when searching Price File.
- \* Another Interface Application Setup : Use when operating another system using the search results on EPC  
system.
- \* LEXUS Dealer Check : Lexus Dealer must enter a given password so that you can search Lexus  
catalog.
- \*\* Clicking the "Menu" button ends the Setup Menu and goes back to the Main Menu.

# 2-2.Setup at Standalone PC-13

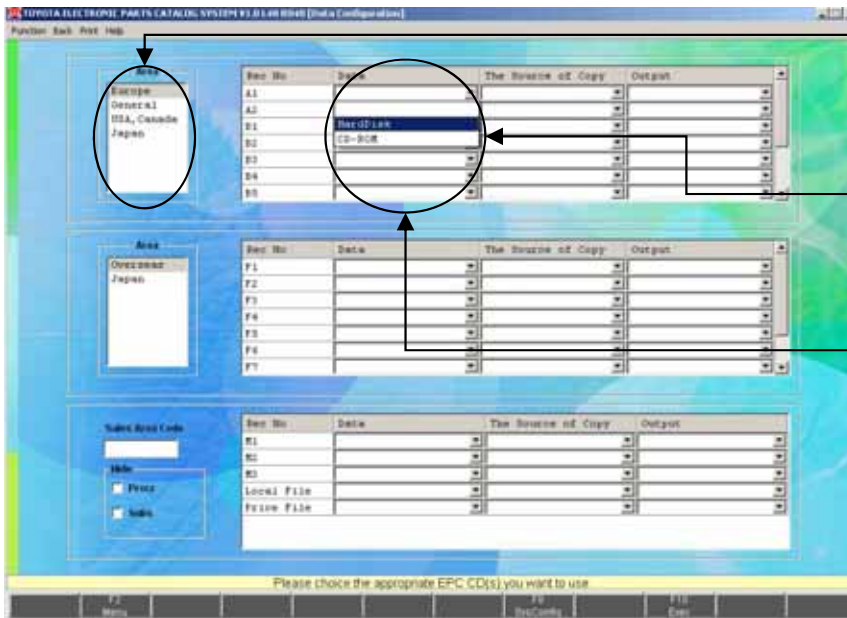

## (2) Entering Sales Area Code

- \* In order to search substitution part number/procurement part number corresponding to the region, enter the 5-digit Sales Area Code.
- \* Sales Area Code will be described separately.
- \* The ticked product numbers will not be searched.
  - If "Procr" is ticked, the procurement part number will not be displayed.
  - If "Subs" is ticked, the substitution part number will not be displayed.

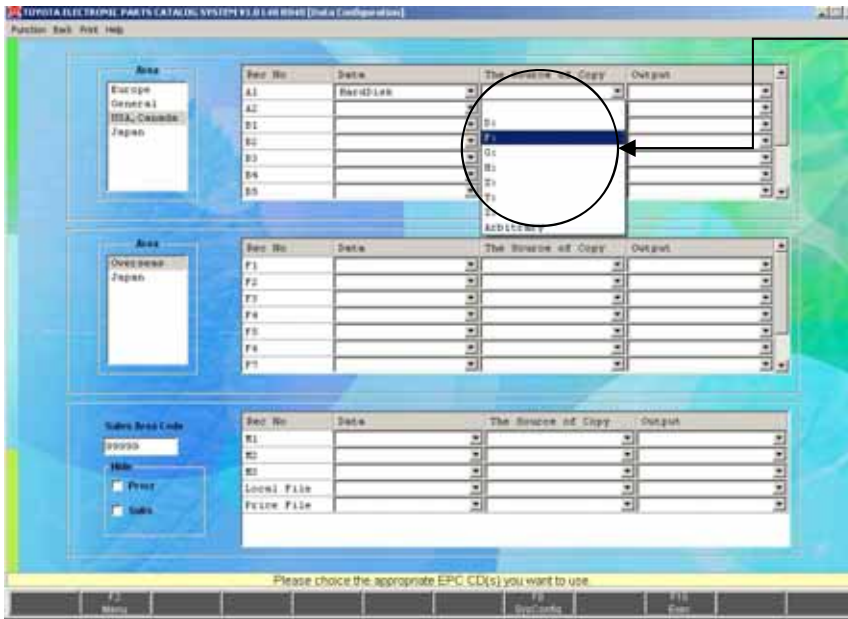

## (3) To setup the operation for EPC (Catalog) data

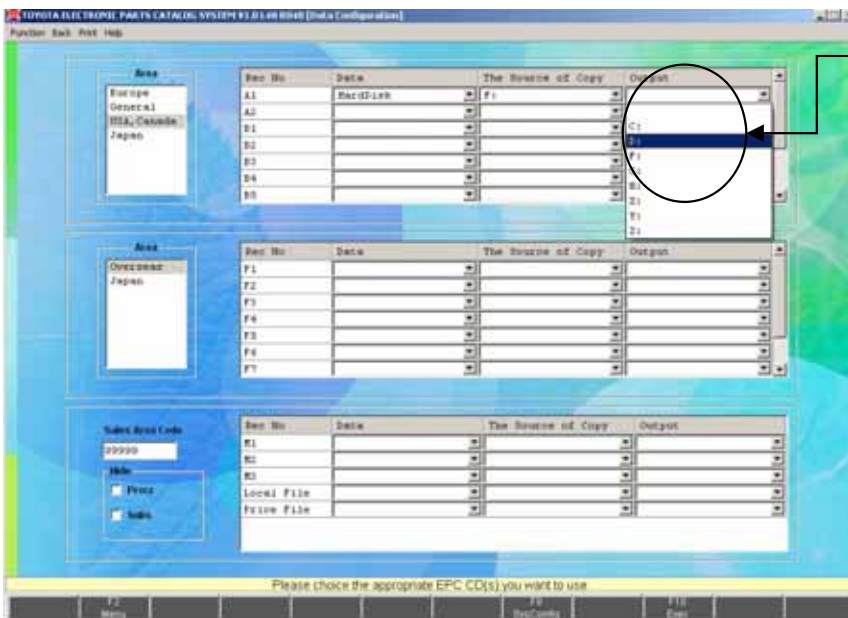

- \* Select the Area you want to setup. Select the type of DVD (Area) you want to set.
- \* Setup the EPC data here. Select the Area you want to setup, and setup the method for operating and the recorded place of the data for each Rec#.
- \* Setup the method of your operation. Select a CD-ROM/HardDisk /Server from a pull-down list box.
- \*\* When installed with "Standalone" or "Server", you can select only "HardDisk". When installed with "Client", you can select only "Server".

## 2-2.Setup at Standalone PC-14

\* Select the drive where the catalogue data is set.

\* In the case that the Hard Disk is set, select a drive where the data is copied.

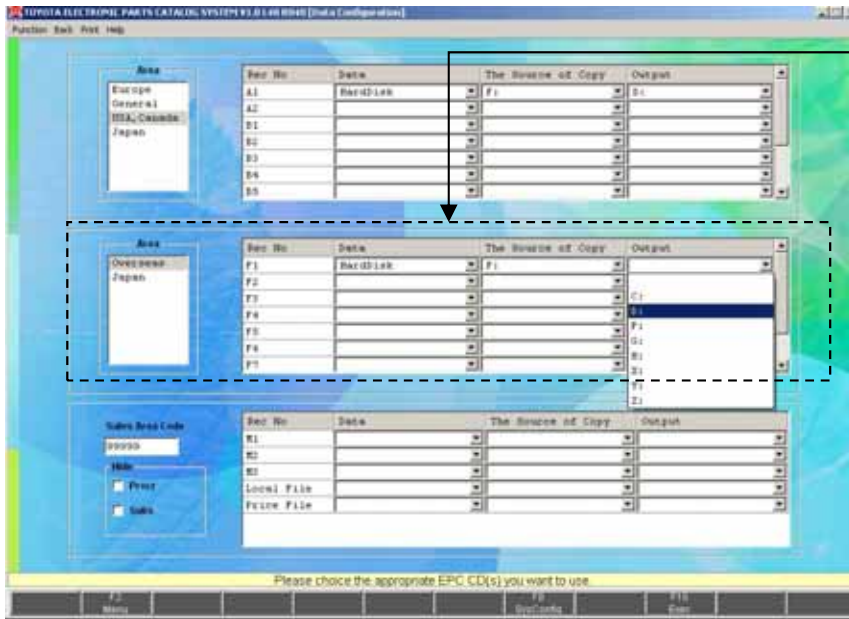

\*\* In case of the Server, you can't set the drive.

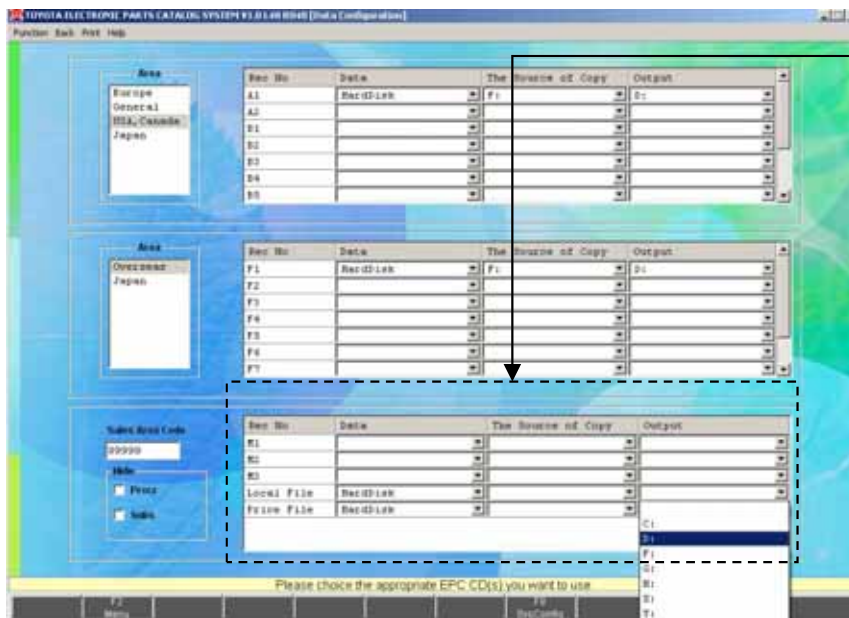

## 2-2.Setup at Standalone PC-15

(4) To setup the operation for EPC (FrameNo) data

- \* Perform the same operation about FrameNo DVD
- \*\* As the number becomes bigger, the frame information will be newer. (F1 is the oldest DVD.)

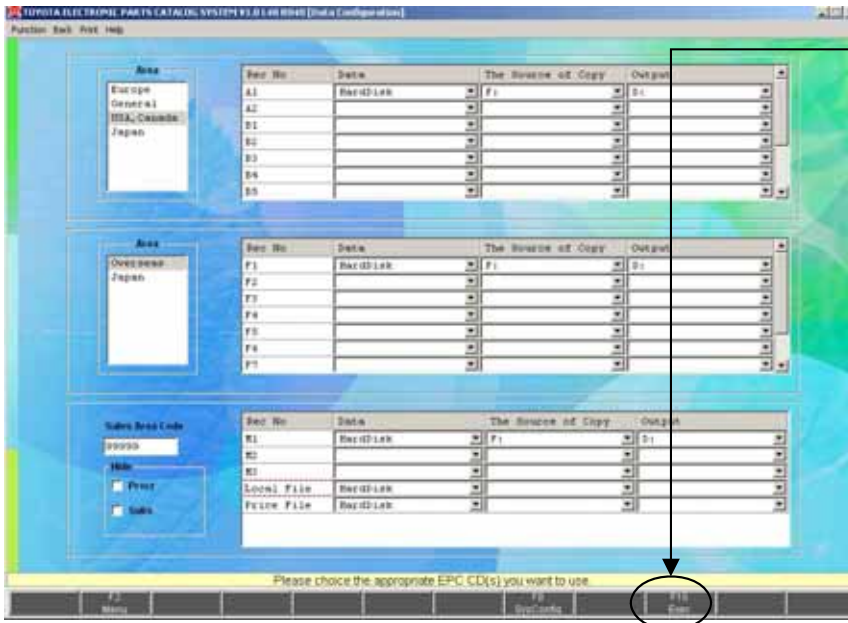

(5) To setup the operation for JPIO, Local File, and Price File

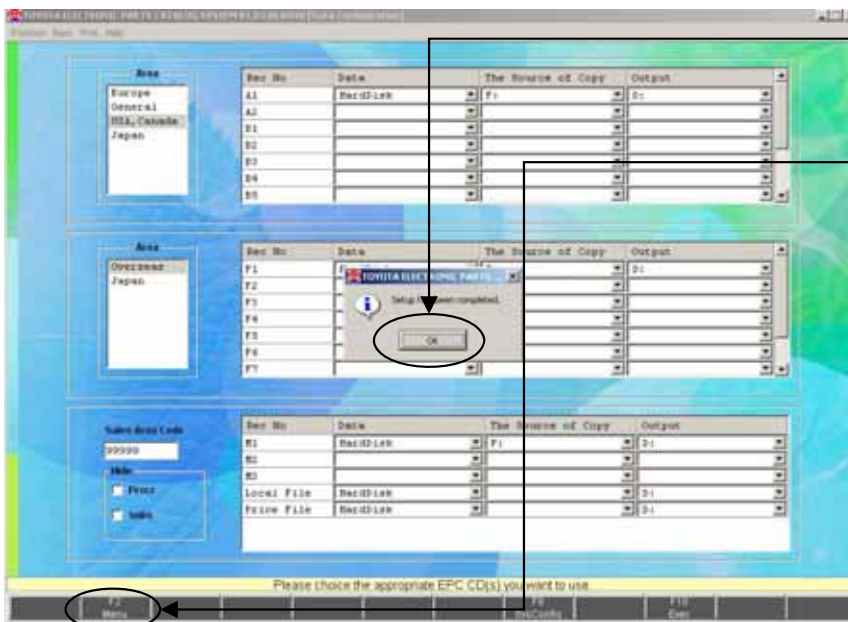

- \* Perform the same operation about JPIO, Local File and Price File as well.
- \*\* As for Local File and Price File, only operation method (HardDisk only) and the Output place can be selected. The actual data should be set on the [Locally Supplied Parts Setup] and [Price File Setup] screen.

- Setup J-PIO to M1
- See (p.96) for Locally Supplied Parts Setup
- See (p.94) for Price File Setup

## 2-2.Setup at Standalone PC-16

\* After you set the data environment, click the “Exec” button.

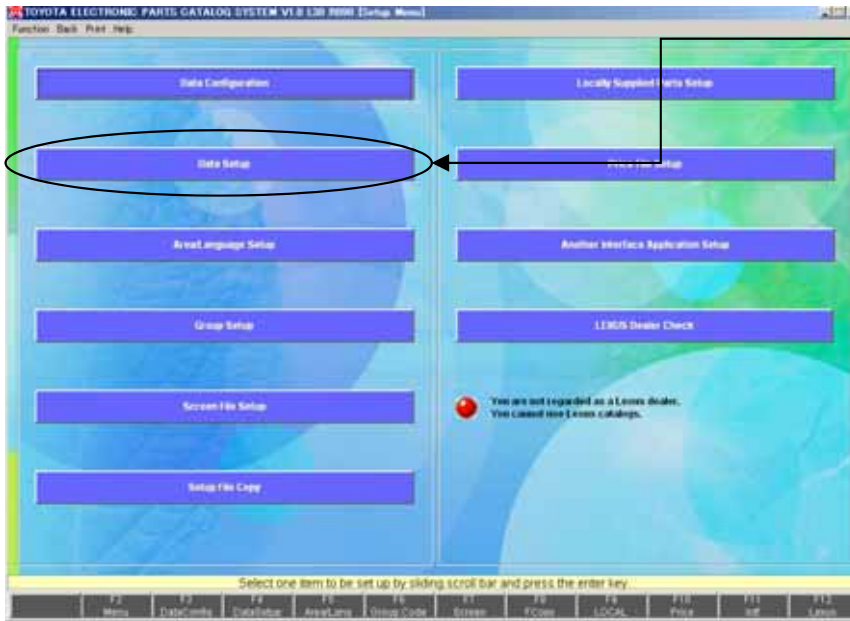

\* Click the “OK” button.

\* Click the “Menu” button to return the “Setup Menu”.

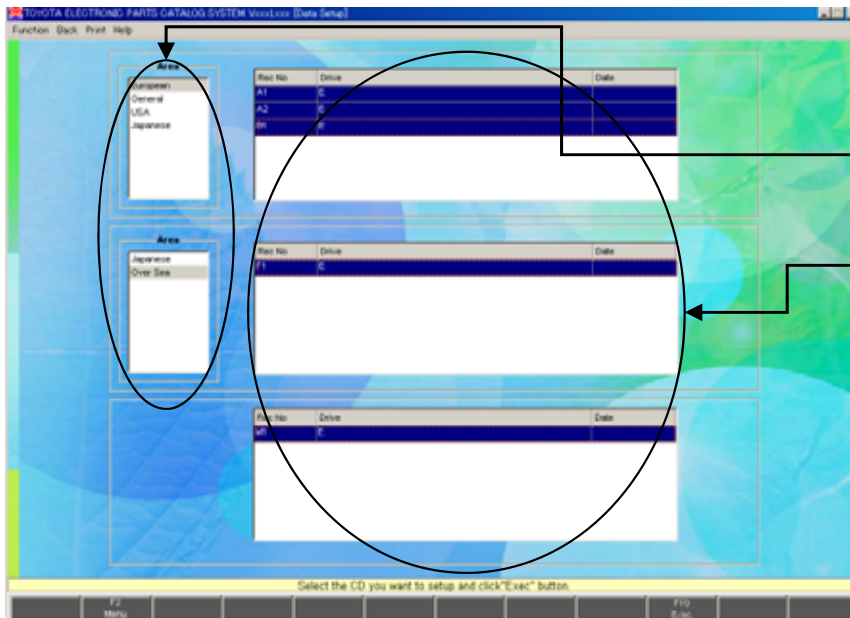

# 2-2.Setup at Standalone PC-17

## (6) Data Setup

\* Click the "Data Setup" button.

\* The setup Information on the setup Area is displayed.

\* Select an Area.

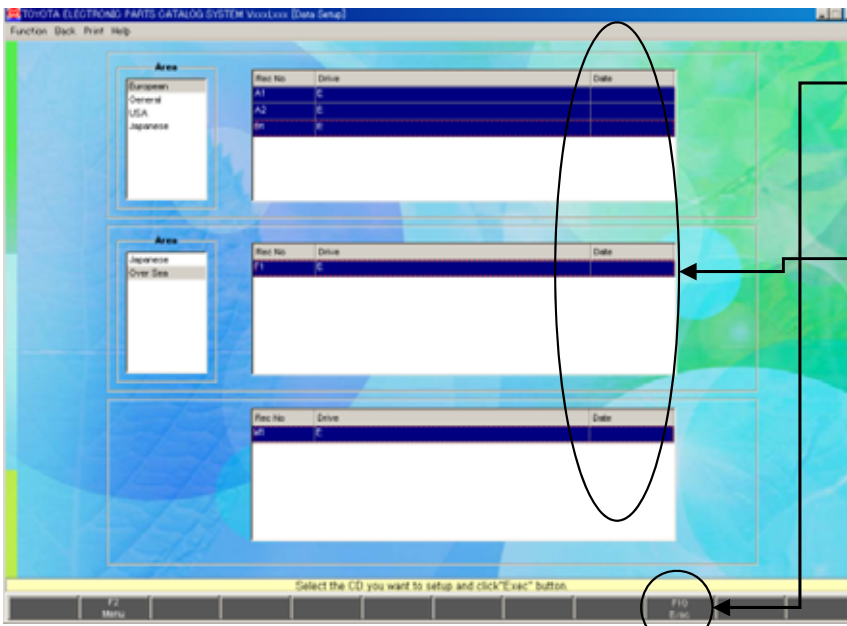

• Select a Rec# of the data .  
- You can select multiple Rec#s.

\*\* If an Area or a Rec# you want to setup isn't listed, setup the environment on the [Data Configuration] screen.

See (p.19) for Data Environment Setup

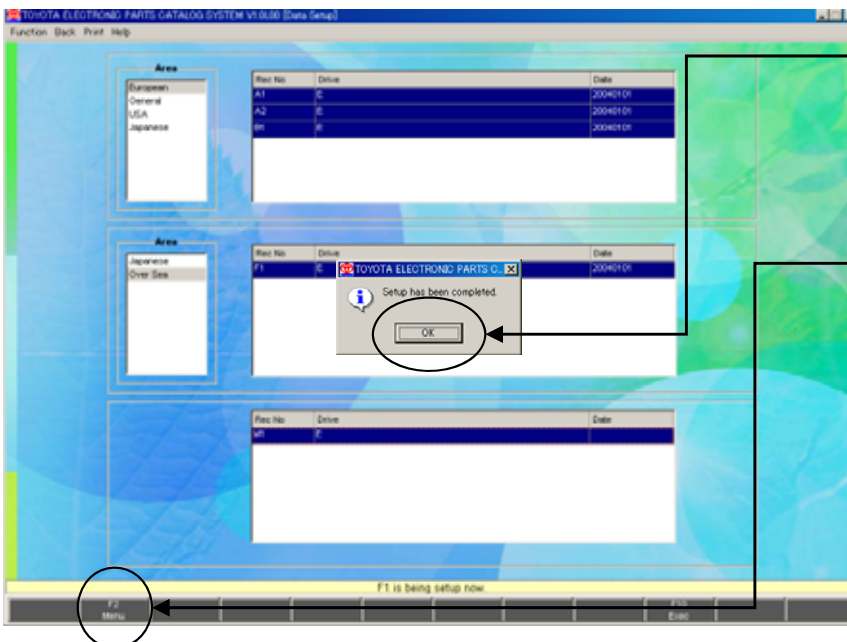

## 2-2.Setup at Standalone PC-18

\* After you select the Rec#, click the “Exec” button.  
DVD confirmation message will be displayed.  
Set the corresponding DVD.

\*\* When the setup is complete, the date of the data will be updated.

\*\* When setting up the data for several Areas, change the Area and select the Rec#.

\* When the setup is complete, dialog is displayed.  
And then click the “OK” button.

\*\* If you want to setup other Area, repeat the same operation.  
After all setup is complete, click the “Menu” button to go to the “SETUP MENU”.

- If the operation is performed by DVD-ROM, do not remove the DVD until returning to the main menu after the setup.

# 2-2.Setup at Standalone PC-19

## 2-2-3.Area / Language Setup

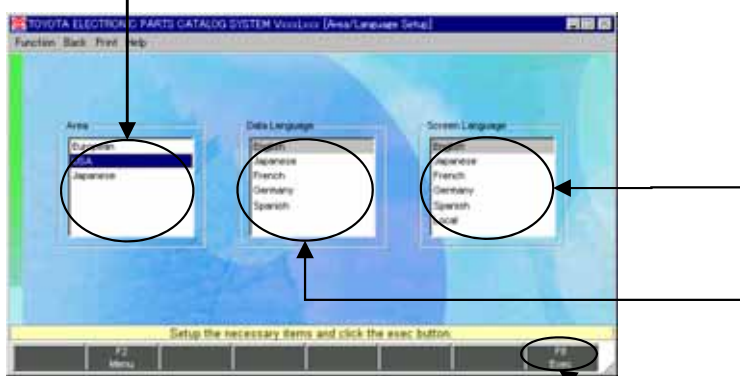

The Area you want to search on the EPC system and the Screen Language can be selected.

- Area : The Area which has setup on the [Data Setup] screen can be selected.  
The Area which is selected here is searched.
- Data Language : When the data such as Part Names, Illustration Name etc, is provided by each language, the Language Data which is selected here is displayed.
- Screen Language : The contents on the screen are written in the Language which is selected here.

Please select “Area/Language Setup” of “SETUP MENU”.

\* Click the “Area / Language Setup” button.

\* By running the Data Setup, the setup Area is displayed. See (p.24) for Data Setup.

\* Select a type of DVD (Area).

\* Select the Language you want to display on the screen.

\* When you select “Local” , see (p.120) for Screen / Message box Language.

\* Select the Data Language you want to use.

\* After you select each item, click the “Exec” button.

# 2-2.Setup at Standalone PC-20

## 2-2-4.LEXUS Dealer Check

- \* In order to use the LEXUS catalog, you need the LEXUS password.
- \* Click the “LEXUS Dealer Check” button.
- \*\* In case of client, you cannot click “LEXUS Dealer Check” button. If it is set at the server, searching the LEXUS catalog from the client becomes possible.

- \* Enter a LEXUS Password and click the “Exec” button.
- The only right password allows you to use this LEXUS Catalog.

To clear the displayed contents ;

Clear

- \* Click the “Clear” button to delete the displayed data.

# 2-2.Setup at Standalone PC-21

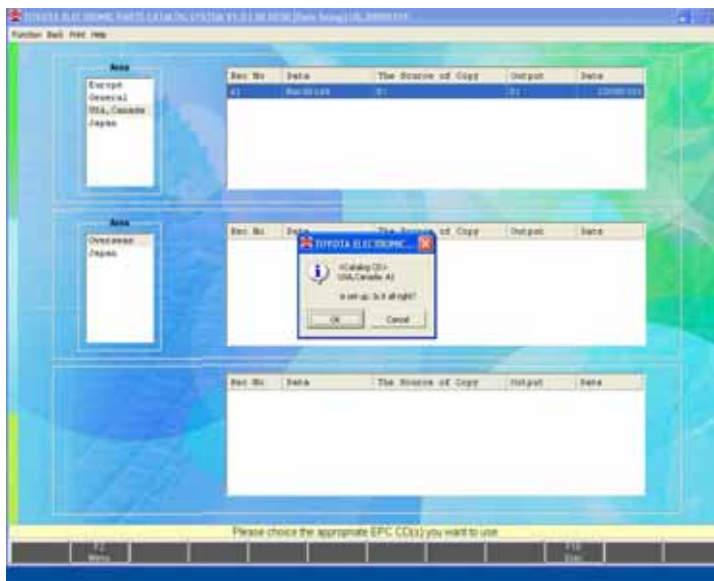

## 2-2-5. Procedure of Program Renewal by A1DVD

### 1. Program Renewal Message

The message appears on the screen if the new program exist in it when setting up A1DVD. In this case, please implement renewing the latest program by referring to "Program renewal by A1DVD"

#### (1) Checking the program renewal message

##### 1. EPC Data Setup

\* Setup EPC data according to the normal procedure.

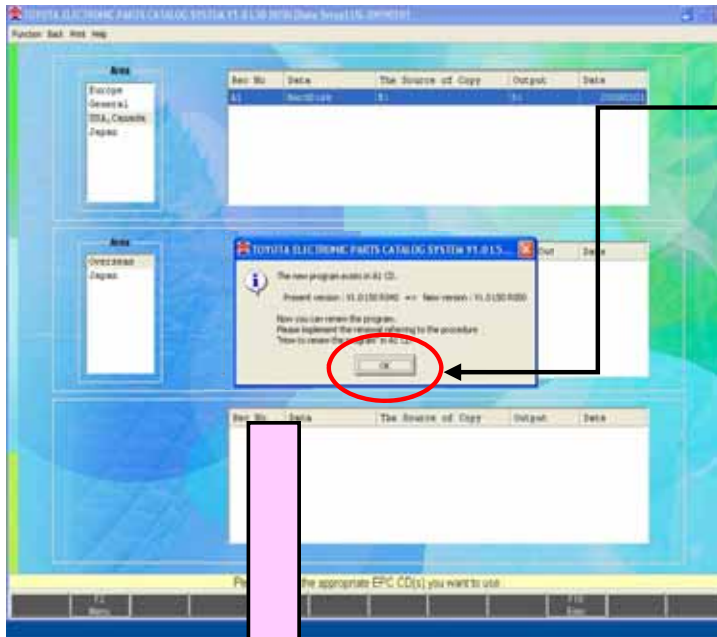

##### 2. The EPC installation is completed

\* When the setup is completed, a dialog is displayed. Please click the "OK" button.

## 2-2.Setup at Standalone PC-22

### 3.Checking the program renewal message

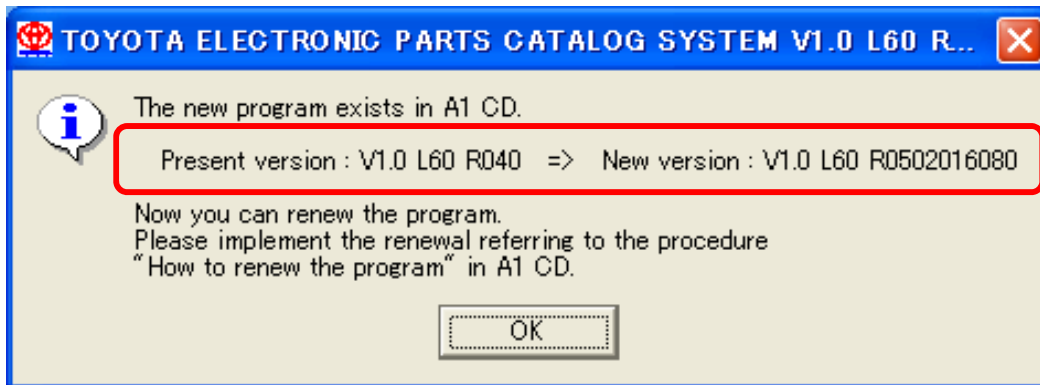

\* The program renewal message appears. Please click the "OK" button.

This message box will not appear when the new program does not exist in A1DVD.

Expanded message box

**\*EPC version = before V1.0 L60 R040**

Check the new version, and then Left-click on the "OK" button.

The program is not renewed automatically just by pressing the "OK" button. Please implement renewing the program by referring to "Program renewal by A1DVD".

**\*EPC version = after V1.0 L60 R050yyyyymm0**

When the new program exist in A1DVD, after "Data Setup", the program is renewed automatically when I push the "Menu" button. (Setting the latest A1 disk at the DVD drive.)

# 2-2.Setup at Standalone PC-23

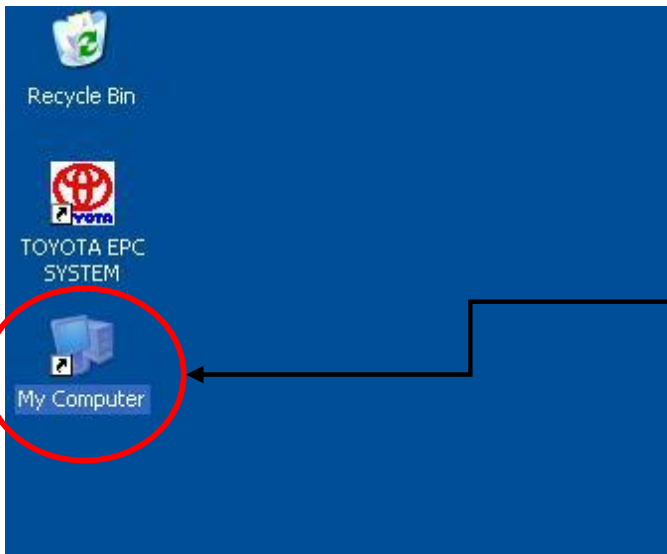

## 2 .Program Renewal by A1DVD \*EPC version = before V1.0 L60 R040

Please end "TOYOTA EPC SYSTEM"  
if it is activating to you renew the program by A1DVD.

### (1)EPC the Latest (EPC) Program Update

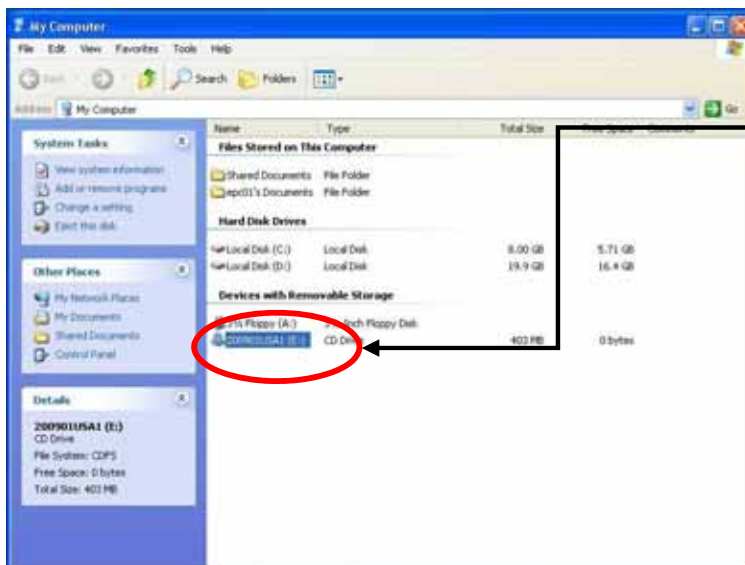

#### 1.EPC the Latest Program Update-1

\* Insert the latest A1DVD into the DVD-ROM Drive

\* Left-double-click " My Computer" on the desktop

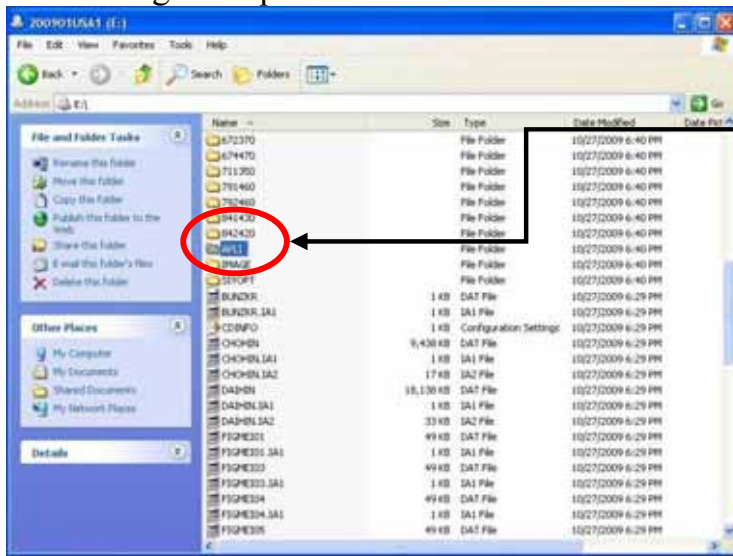

#### 2.EPC the Latest Program Update-2

\* Left-double-click " DVD-ROM Drive"

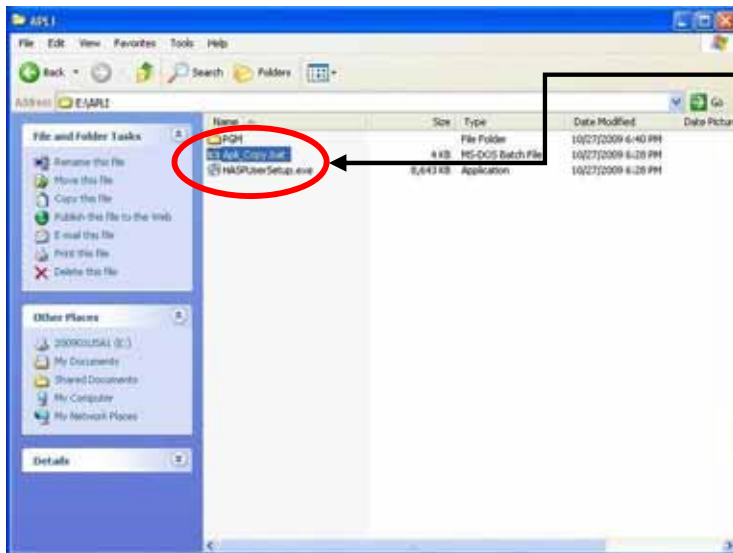

## 2-2.Setup at Standalone PC-24

### 3.EPC the Latest Program Update-3

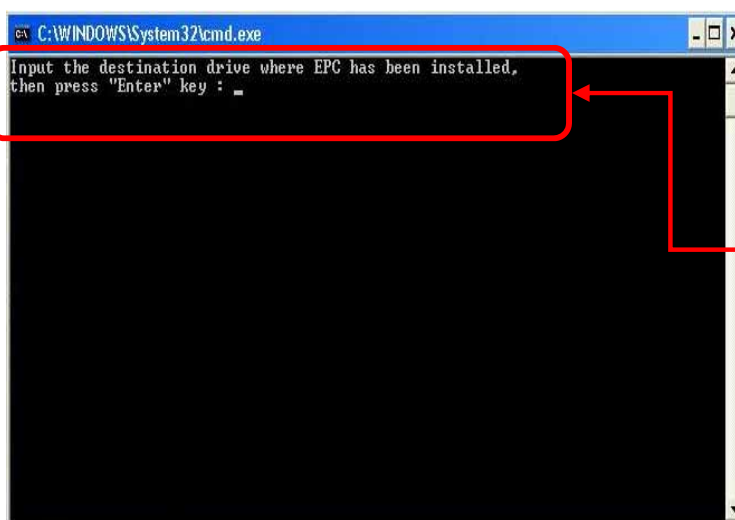

\* Left-double-click the " APLI" folder

### 4.EPC the Latest Program Update-4

\* Left-double-click "Apli\_Copy.bat"

### 5.EPC the Latest Program Update-5

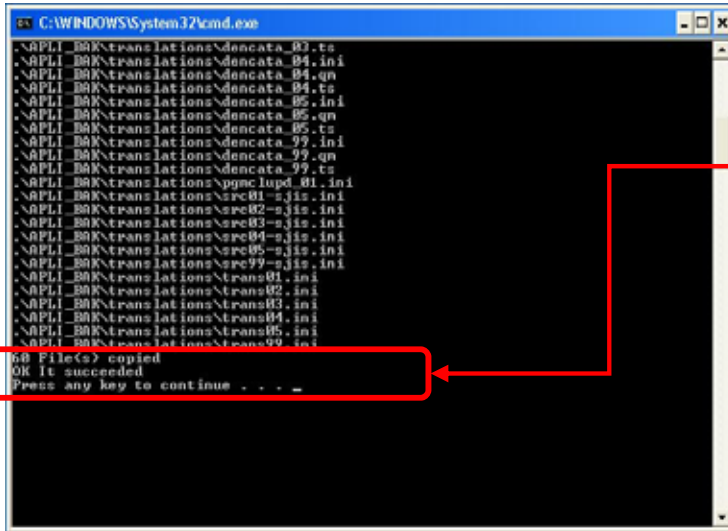

\* A message appears,"Input the destination drive where EPC has been installed ....."  
Input the destination drive where EPC has been installed,then press "Enter" key.

If you inputted the drive where EPC is not installed, input it again correctly. Then press the "Enter" key.

## Setup at Server PC

When performing program update...

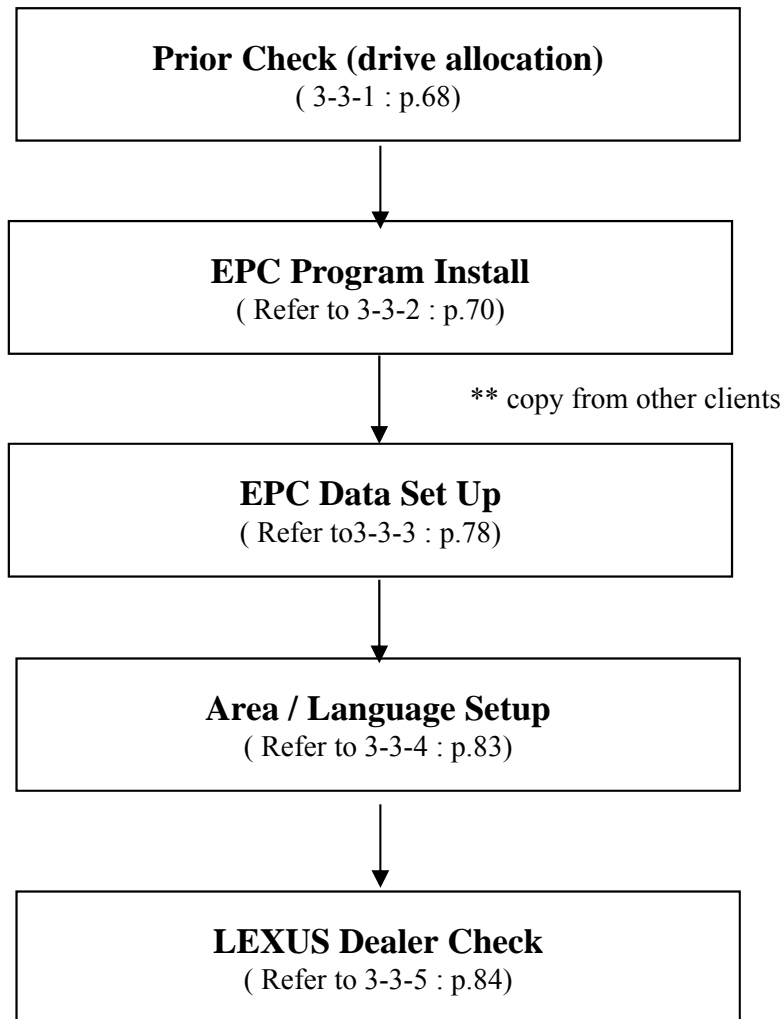

When performing program recovery...

# 3-1.Installation Flowchart

## Setup at Client PC

\*\* In client, setting of the "LEXUS Dealer Check" cannot be performed.  
If it is set at the server, searching the LEXUS catalog from the client becomes possible.

When performing program update...

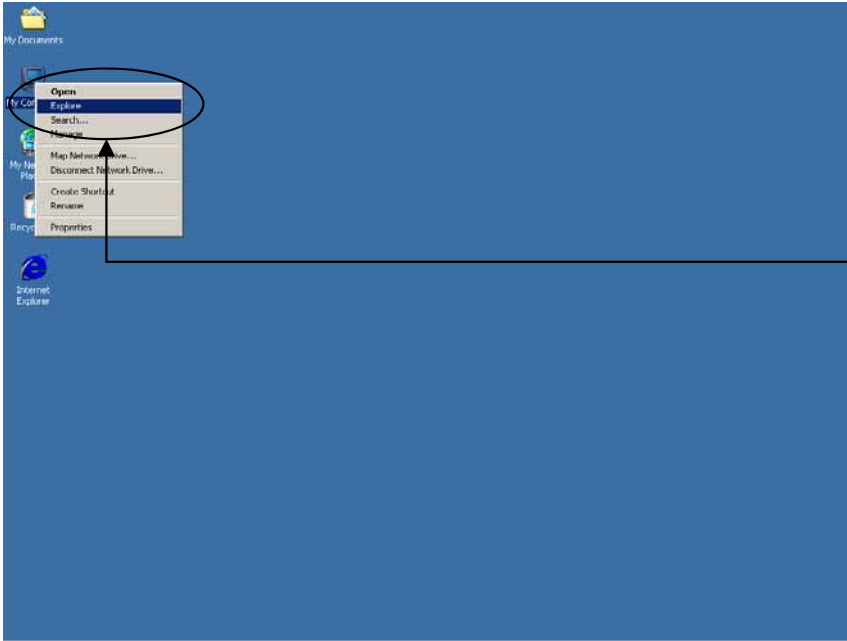

When performing program recovery...

# 3-2.Setup at Server PC-1

## 3-2-1.EPC Program Install

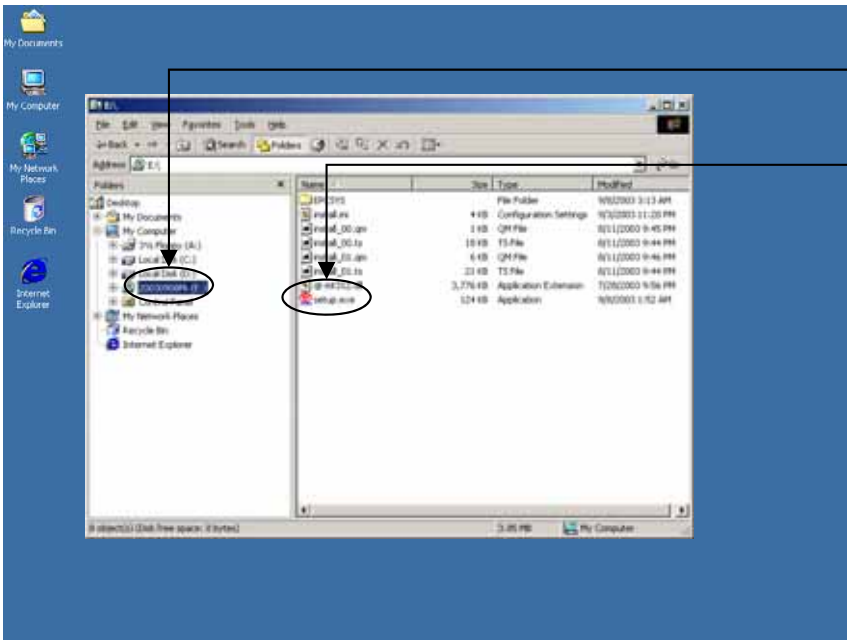

(1)Opening Windows and inserting a A1DVD to the DVD drive.

- \* Turn on your computer to open a Windows.
- \* After the Windows is start up, insert the A1DVD to the DVD-ROM drive.
- \* Right-click the “My Computer” on the desktop and left-click the “Explore”.

(2)Running the install system from a A1DVD.

- \* Left-click the drive where you have set the A1DVD.
- \* Double-click the “setup.exe”.

**Go on to the next page**

## 3-2.Setup at Server PC-2

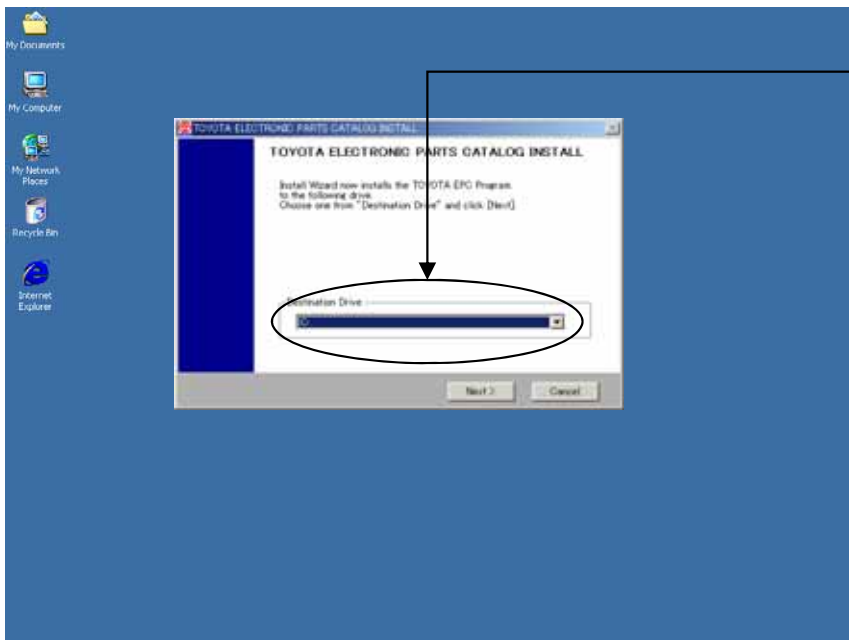

### (3)Starting the Installation

- \* To execute the TOYOTA EPC Install, left-click the “Next” button.
- \* To cancel the installation, left-click the “Cancel” button.
- \* A message for asking if you cancel the installation or not will appear again. Click the “OK” button to cancel the installation or click the “Cancel” to continue.

### (4)Selecting a drive for the installation.

- \* Select the drive where you want to install the TOYOTA EPC, and left-click the “Next” button.
- \* To cancel the installation, left-click the “Cancel” button.
- \* If installing for the first time, go to (6) [Selecting a system configuration.

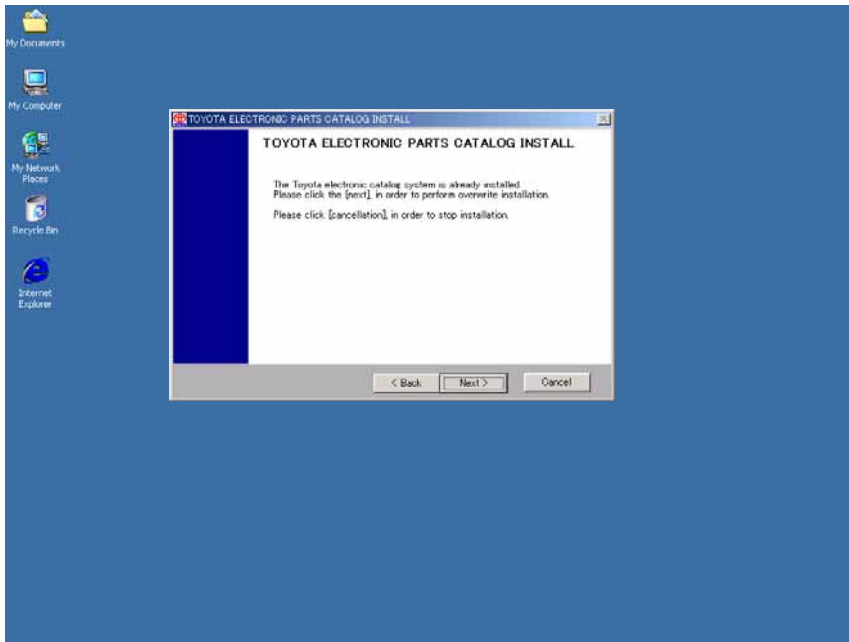

**Go on to the next page**

## 3-2.Setup at Server PC-3

(5)Checking the Install Configuration [Some install configurations may have the following A) or B) case.]

A)In case that the EPC is already installed,

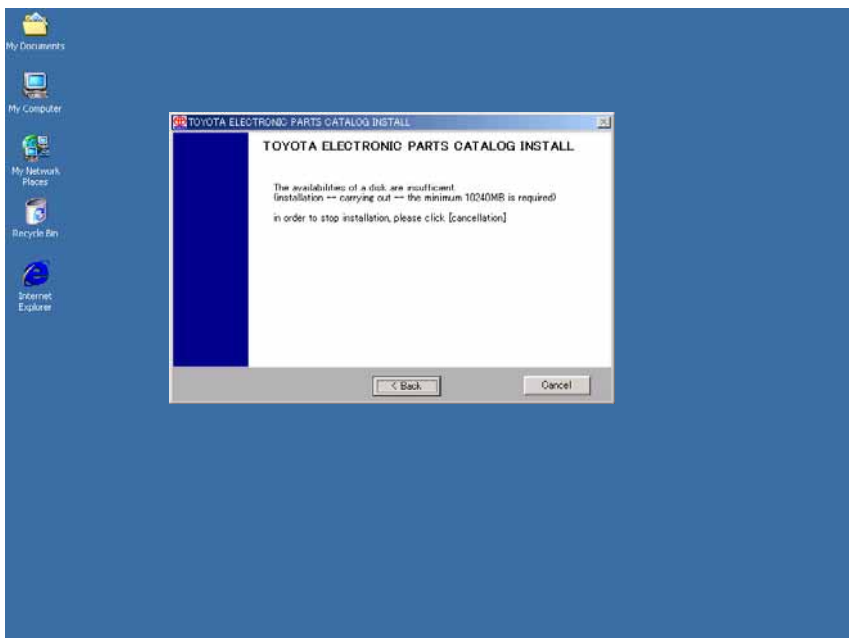

\* To install it again, left-click the “Next” button to transit to (7) [System Installation].

\*\* Even if a new system is already installed, another installation will maintain the existing setup information.

\* To go back to the previous screen (4) [Selecting a drive for the installation], left-click the “Back” button.

\* To cancel the installation, left-click the “Cancel” button.

B)In case that the disk space isn't enough,

\* The EPC installation needs the disk space of 10 MB.

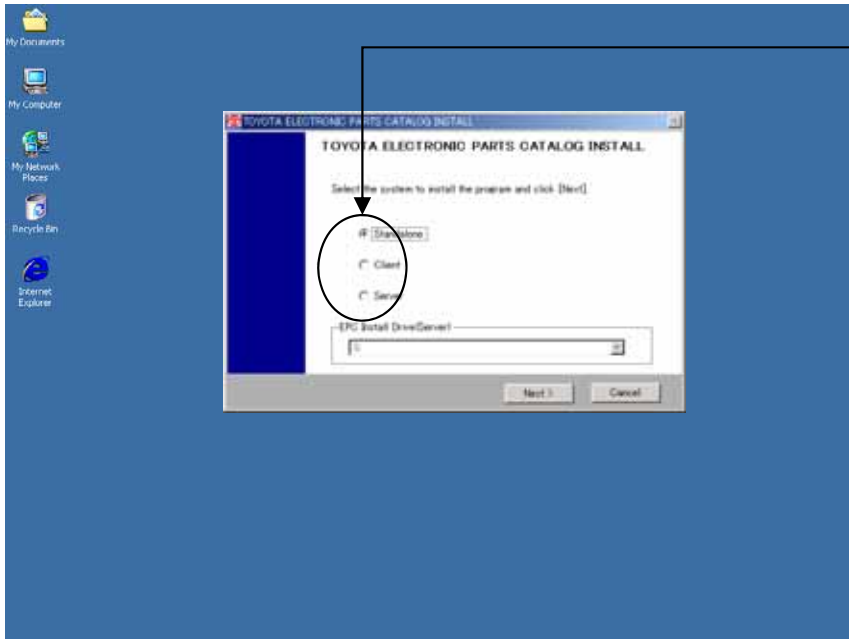

To change the drive for the installation, left-click the “Back” button to go back to the previous screen (4) [Selecting a drive for the installation].

\* To cancel the installation, left-click the “Cancel” button.

**Go on to the next page**

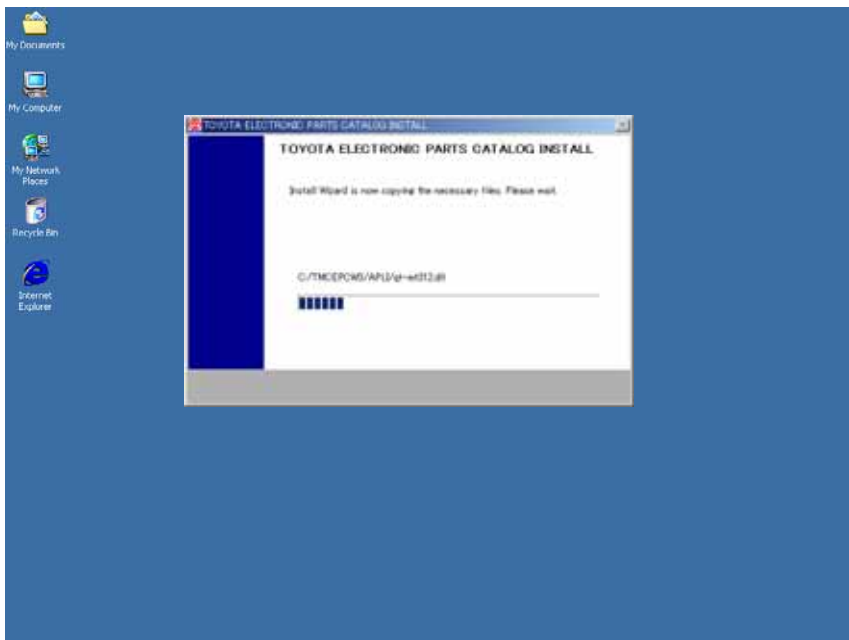

## 3-2.Setup at Server PC-4

### (6)Selecting a system configuration

- \* Select a system configuration (“Server”) , and left-click the “Next” button.
- \* To cancel the installation, left-click the “Cancel” button.

### (7)System Installation

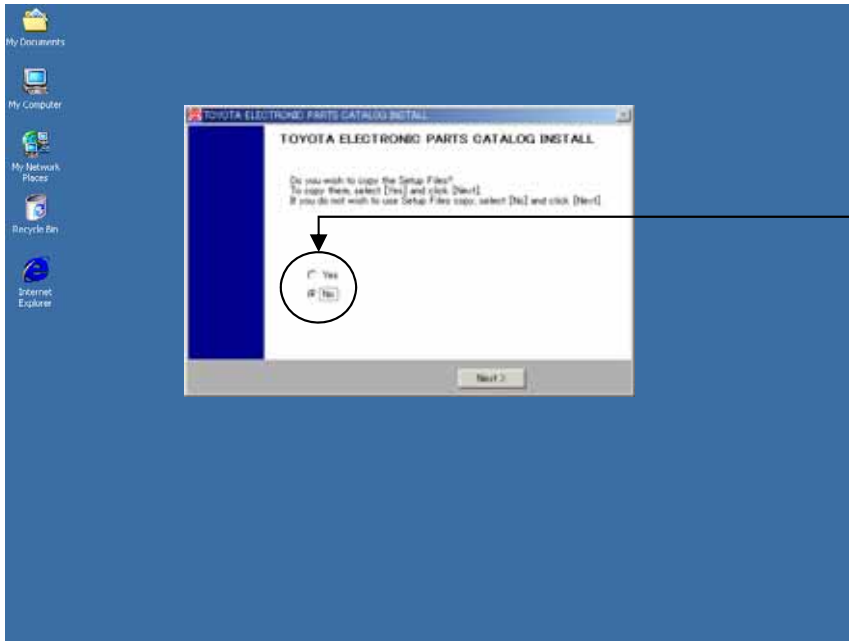

- \* Wait for a while until the installation from the CD has been completed.

Go on to the next page

## 3-2.Setup at Server PC-5

### (8)Copying a setup file

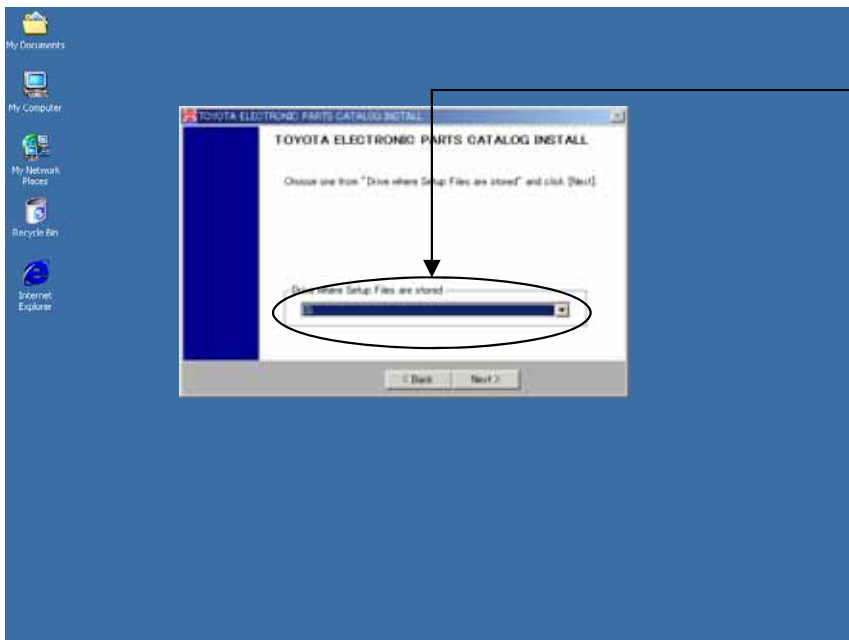

\* If there isn't the copy of the setup file, select the "No" and left-click the "Next" button to transit to (11) [Setting a background image].

\* If there is the setup file, select the "Yes" and left-click the "Next" button to transit to (9) [Selecting the drive where the setup file is inserted].

See (p.137) for the setup file copy

### (9)Selecting the drive where the setup file is inserted.

\* Insert a floppy with the setup file to the floppy drive, select the drive where you inserted the floppy, and then left-click the "Next" button.

\* To cancel the copy of the setup file, left-click the "Back" button to go back to the previous screen (8) [Copying a setup file].

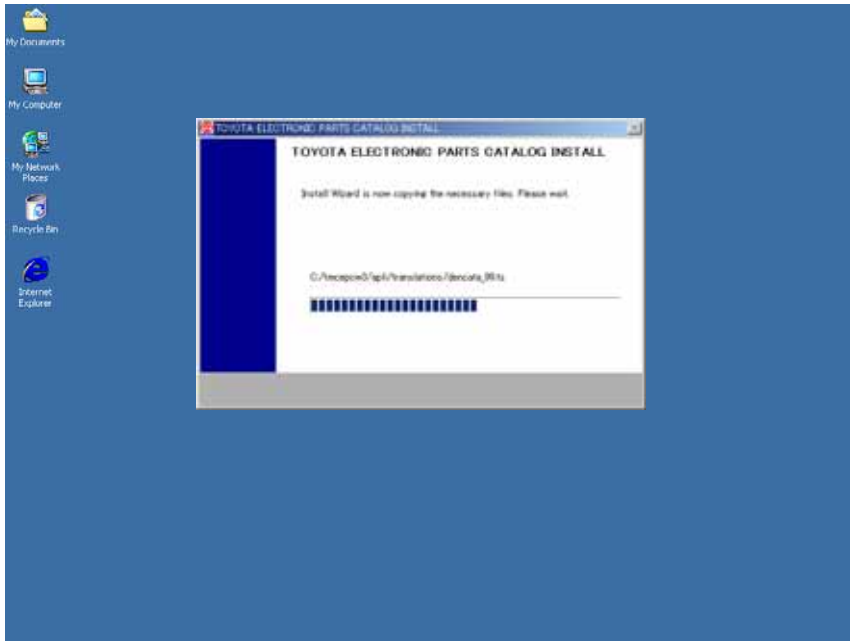

\*\* In the case that a correct floppy drive or a floppy with a correct setup file isn't setup, an error message of "An applicable file is not found." will appear. You should setup it again correctly.

**Go on to the next page**

## 3-2.Setup at Server PC-6

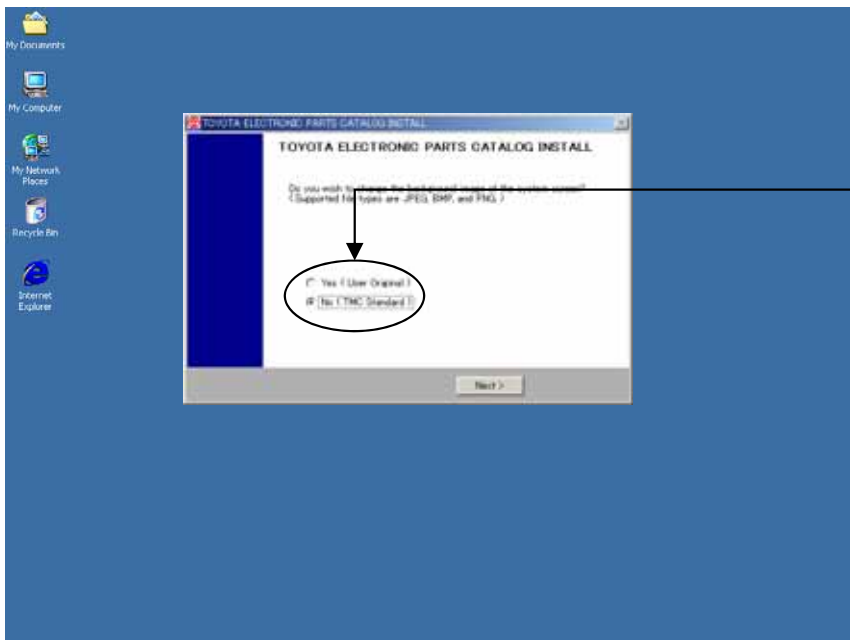

### (10) Copying a file

- \* Wait for a while until the setup file has been copied from the floppy.

### (11) Setting a background image

- \* If you setup the default background image to this EPC screen, select the "No" and left-click the "Next" button to transit to (13) [Completing the installation].
- \* If you want to setup the background image of your own choice to this EPC screen, select the "Yes" and left-click the "Next" button to transit to (12) [Selecting a background].

What is background image?

You can display the image you prefer as background of the menu screen.

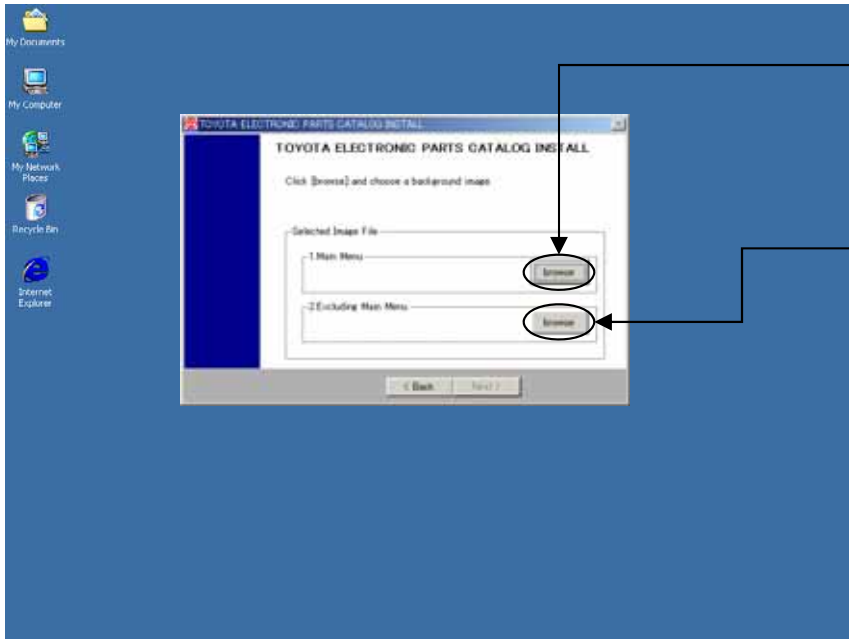

**Go on to the next page**

## 3-2.Setup at Server PC-7

### (12)Selecting a background image

\* To setup the background image to the Main Menu, left-click the “browse” button and select a file, then left-click the “Next” button.

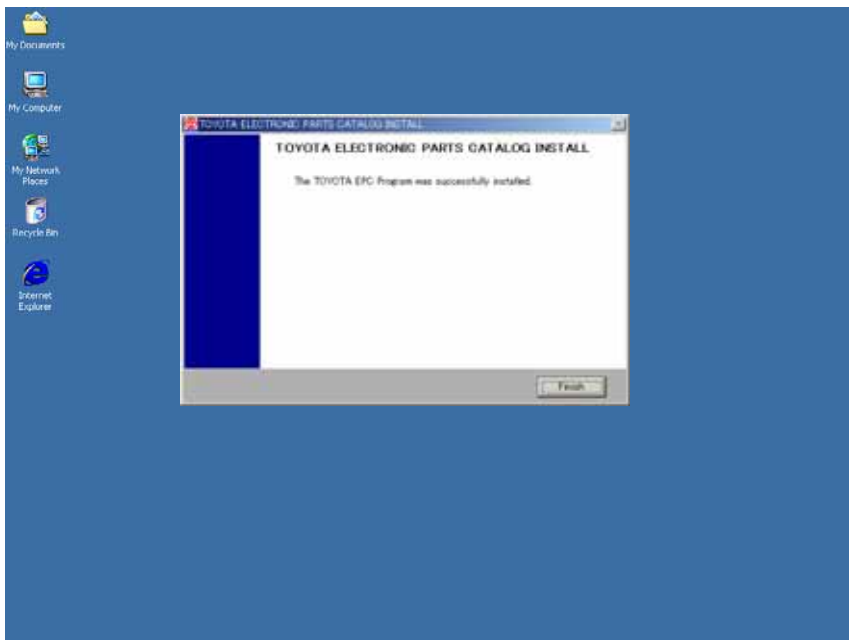

\* To setup the background image to other than the Main Menu, left-click the “browse” button and select a file, then left-click the “Next” button.

\*\* The file types of JPEG, BMP, and PNG can be selected as a background image.

\* To go back to the previous screen (11) [Setting a background image], left-click the “Back” button.

### (13)Completing the installation

\* As the EPC installation is completed, left-click the “Finish” button.

\*\* When the installation is complete, extract the A1DVD from the DVD-ROM drive.

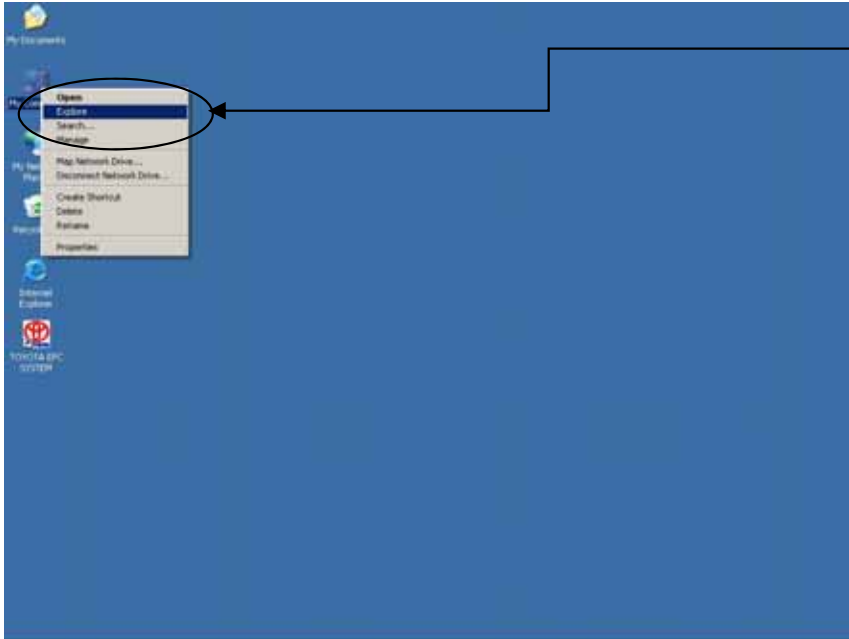

**Go on to the next page**

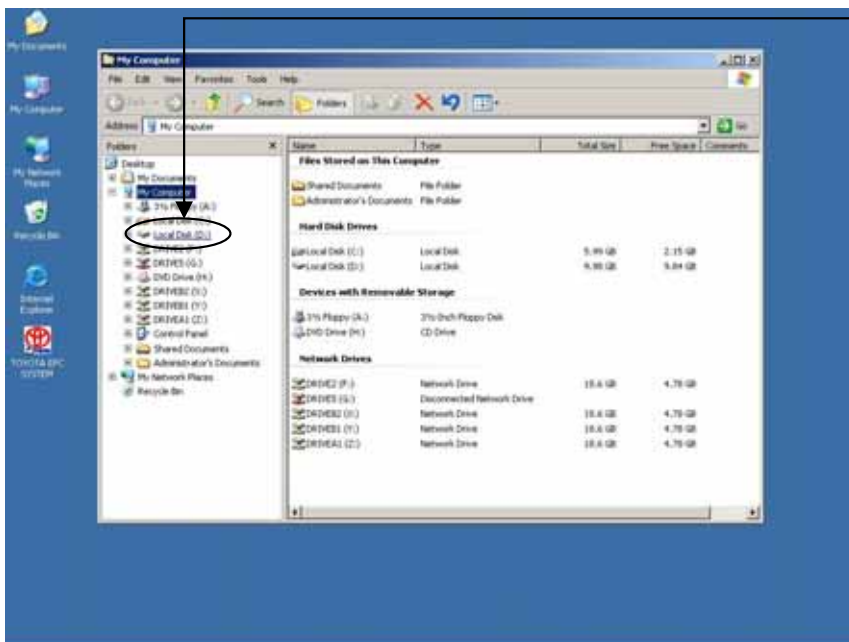

# 3-2.Setup at Server PC-8

When having used the 2007 version of this New EPC, please kindly follow the following procedure of (14) and (15).  
When newly using the 2008 version of this New EPC, you do not need to follow the procedure of (14) and (15).

(14)Deleting number information of the old frames

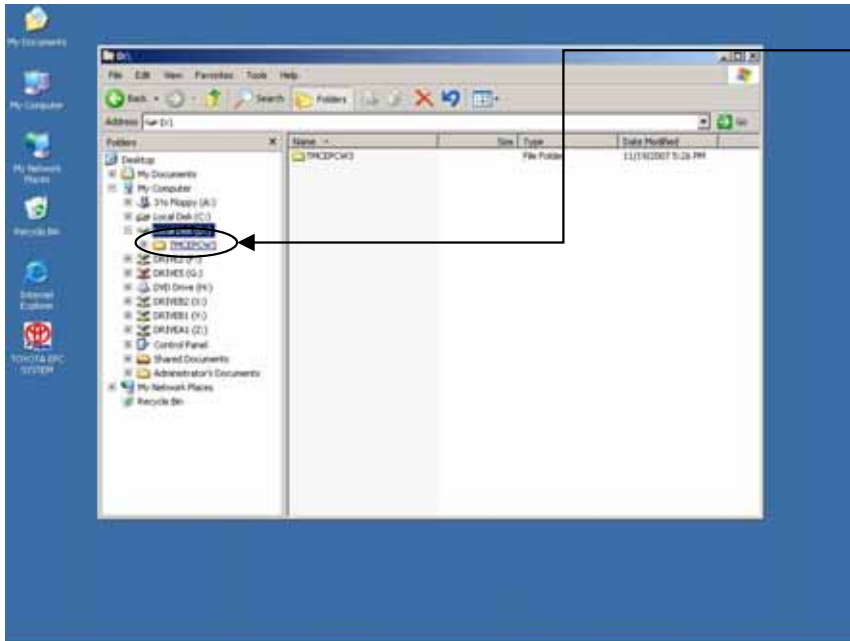

\* Right-click the “My Computer” on the desktop and left-click the “Explore”.

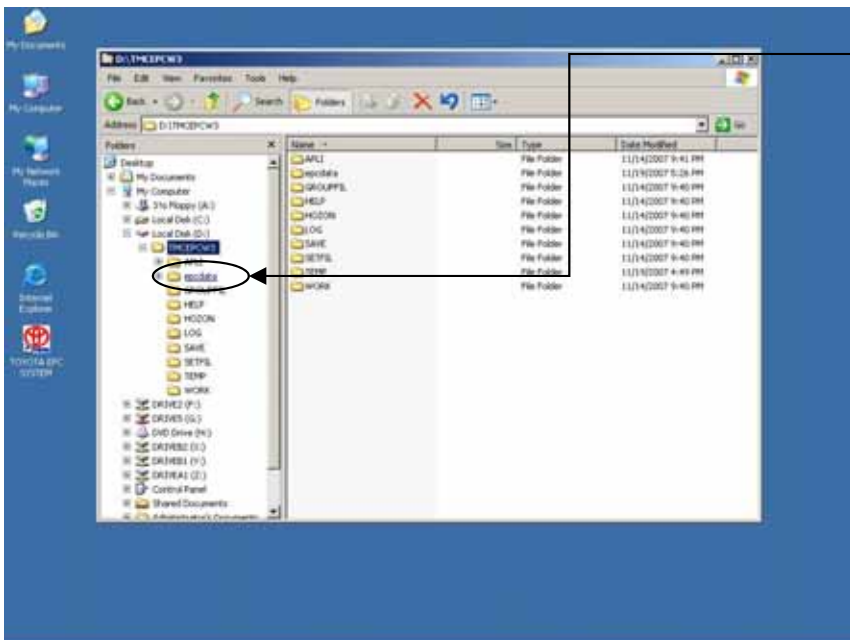

\* Left-click the drive where the data is set up.

# 3-2.Setup at Server PC-9

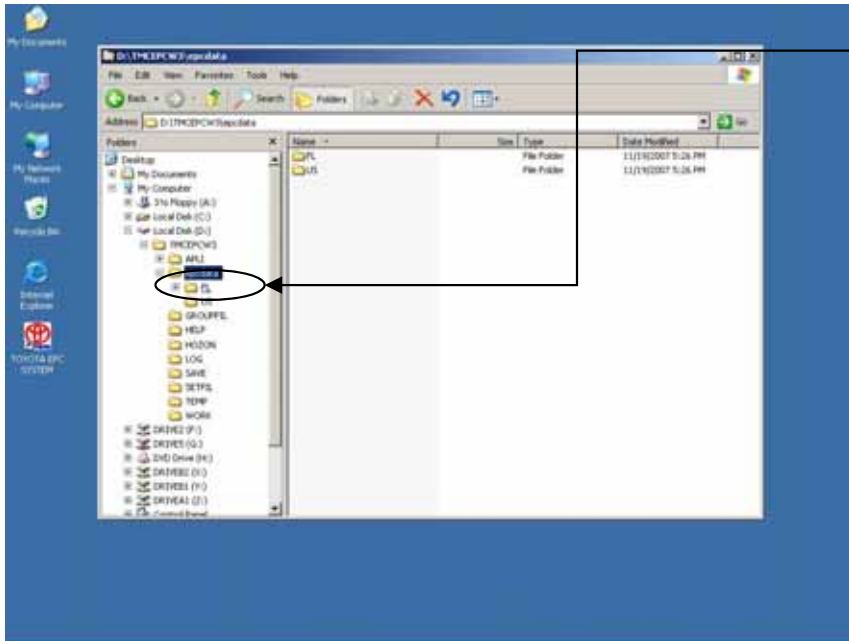

\* Left-click the "TMCEPCW3" folder.

\* Left-click the "epcdata" folder.

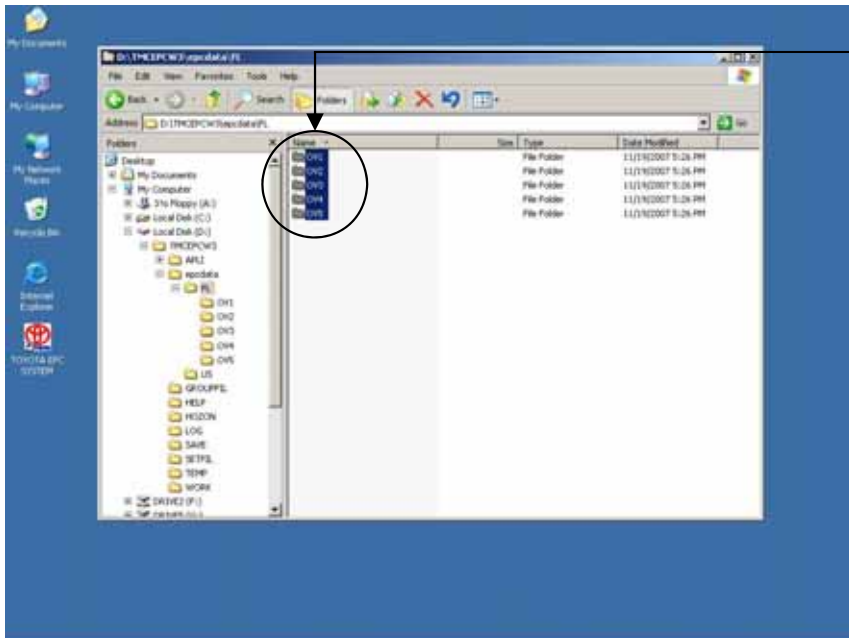

## 3-2.Setup at Server PC-10

\* Left-click the "FL" folder.

### (15) Deleting the folders OV1-OV5

\* If the folders "OV1"- "OV5" exist, delete them with Shift+Delete.

\*\* If the "OV" folder already exists, do not delete this folder.

## 3-2.Setup at Server PC-11

### (16)Starting the TOYOTA EPC SYSTEM

\*Insert the A1DVD to the DVD drive.

\* Double-click the “TOYOTA EPC SYSTEM” on the desktop to start the TOYOTA EPC SYSTEM.

**\*If using the current EPC group setup file...**

#### Setup procedure

- 1.Copy the Group Setup Files to the Floppy Disk.  
(Group Setup Files: TMC MSTW2YGCGRPMEL.D and TMC MSTW2YGCGRPPNC.D)
- 2.See (8) [Copying a setup file] on (p.44).

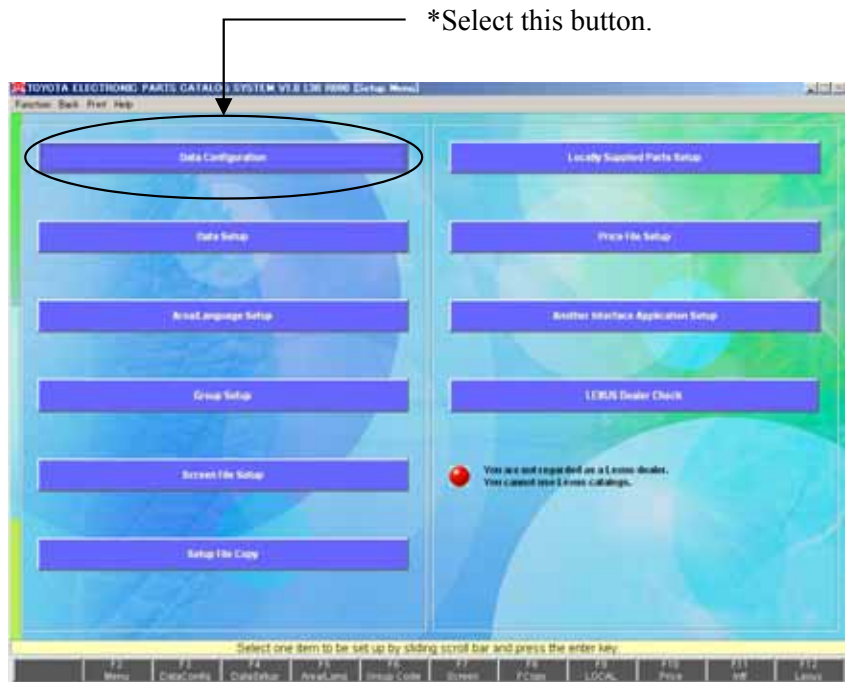

# 3-2.Setup at Server PC-12

## 3-2-2.EPC Data Setup

### (1) Data environment setup

**\* Press Setup Menu.**

**Click Data Configuration button.**

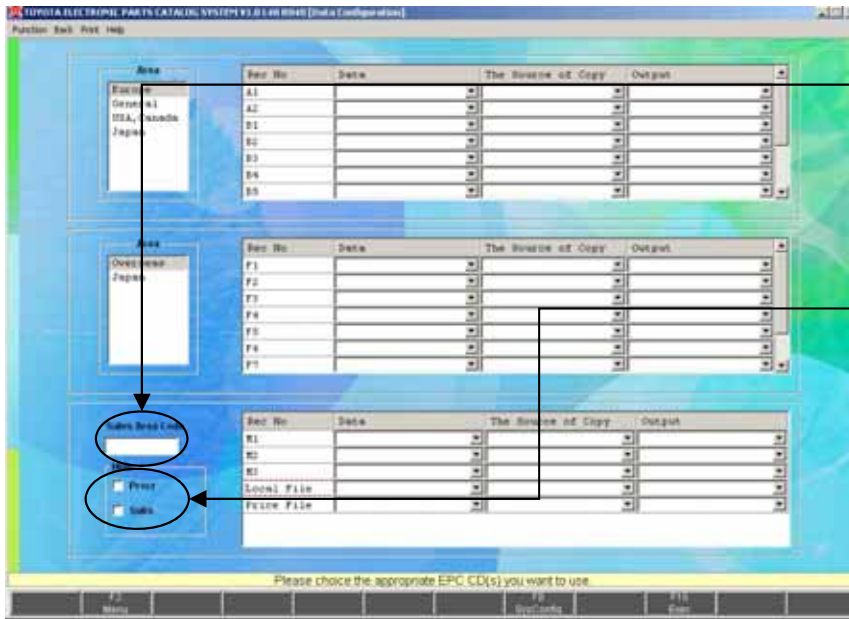

#### Reference: Description of the buttons in Setup Menu screen

- \* Data Configuration : Sets up Data Operation(DVD/Hard Disk/Server). Run this setup first after the EPC system is installed.
- \* Data Setup : Sets up the data with the contents created on the [Data Configuration] screen. This setup must be run whenever the data is updated.
- \* Area/Language Setup : Sets up Data Language and Screen Language. Select an Area when the data of multiple Areas are set up.
- \* Group Setup : Catalog Codes and Part Name Codes which are often searched should be registered here so that you can search the data by Group Code.
- \* Screen File Setup : Use when changing a displayed title on the screen.
- \* Setup File Copy : The setup Environment can be copied on other computers. It will be helpful to operate multiple computers under the same environment.
- \* Locally Supplied Parts Setup : Set up the data here when searching for Locally Supplied Parts.
- \* Price File Setup : Set up the data here when searching Price File.
- \* Another Interface Application Setup : Use when operating another system using the search results on EPC system.
- \* LEXUS Dealer Check : Lexus Dealer must enter a given password so that you can search Lexus catalog.
- \*\* Clicking the "Menu" button ends the Setup Menu and goes back to the Main Menu.

# 3-2.Setup at Server PC-13

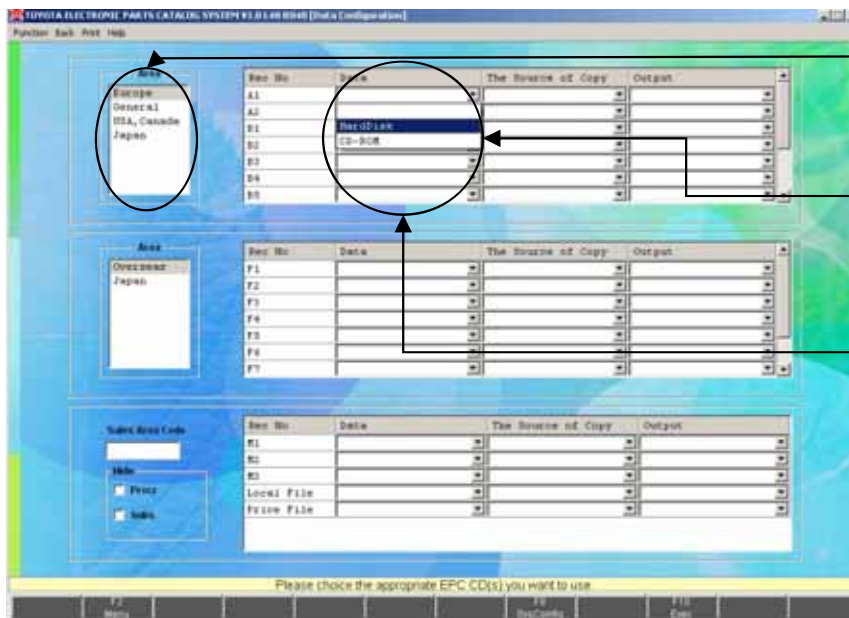

## (2) Entering Sales Area Code

- \* In order to search substitution part number/procurement part number corresponding to the region, enter the 5-digit Sales Area Code.
- \* Sales Area Code will be described separately.
- \* The ticked product numbers will not be searched.
  - If "Procr" is ticked, the procurement part number will not be displayed.
  - If "Subs" is ticked, the substitution part number will not be displayed.

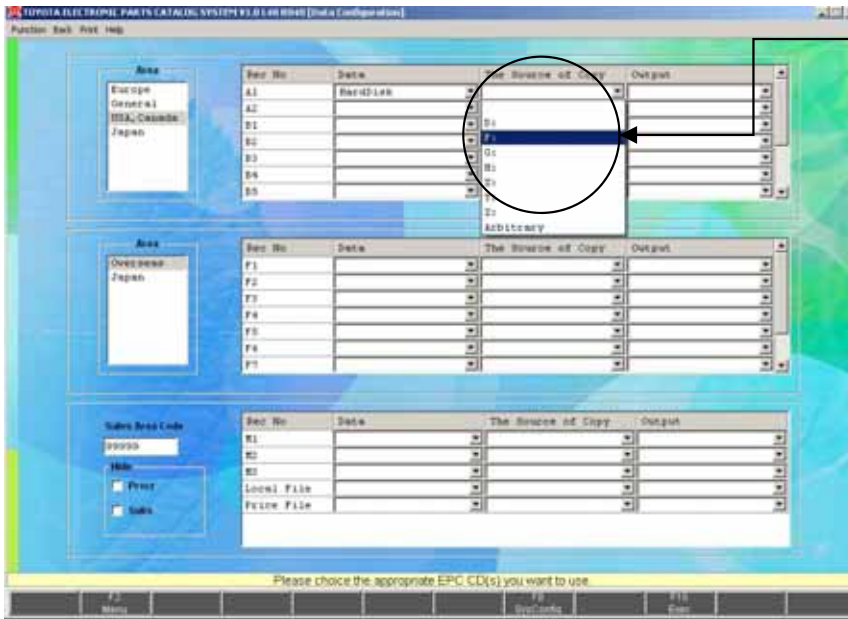

## (3) To setup the operation for EPC (Catalog) data

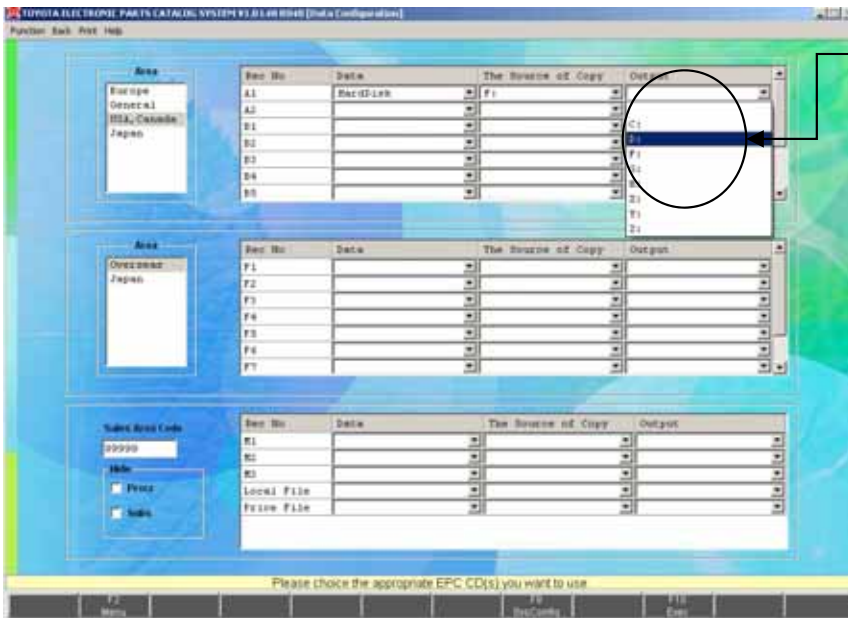

- \* Select the Area you want to setup. Select the type of DVD (Area) you want to set.
- \* Setup the EPC data here. Select the Area you want to setup, and setup the method for operating and the recorded place of the data for each Rec#.
- \* Setup the method of your operation. Select a CD-ROM/HardDisk /Server from a pull-down list box.
- \*\* When installed with "Server", you can select only "HardDisk".

# 3-2.Setup at Server PC-14

\* Select the drive where the catalogue data is set.

\* In the case that the Hard Disk is set, select a drive where the data is copied.

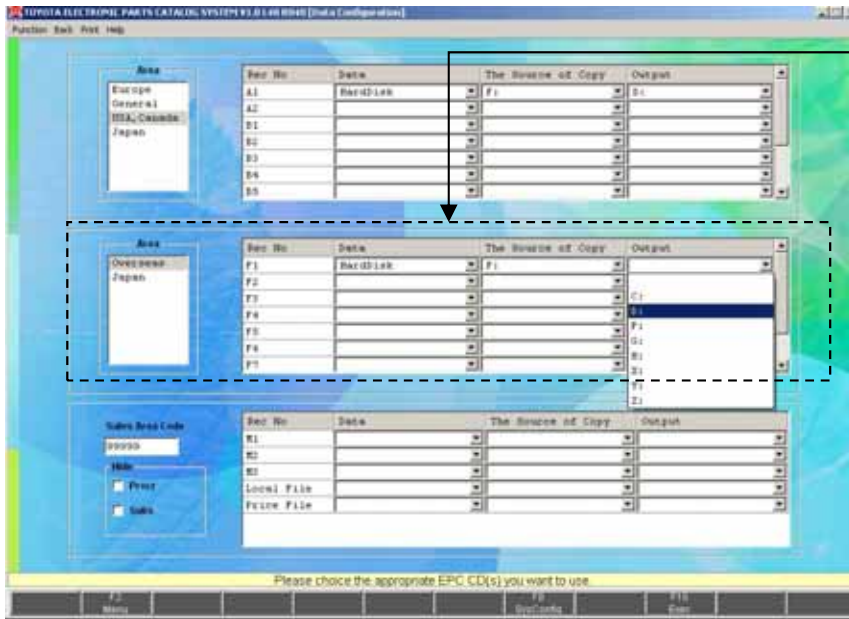

\*\* In case of the Server, you can't set the drive.

# 3-2.Setup at Server PC-15

(4) To setup the operation for EPC (FrameNo) data

- \* Perform the same operation about FrameNo DVD
- \* As the number becomes bigger, the frame information will be newer. (F1 is the oldest DVD.)

(5) To setup the operation for JPIO, Local File, and Price File

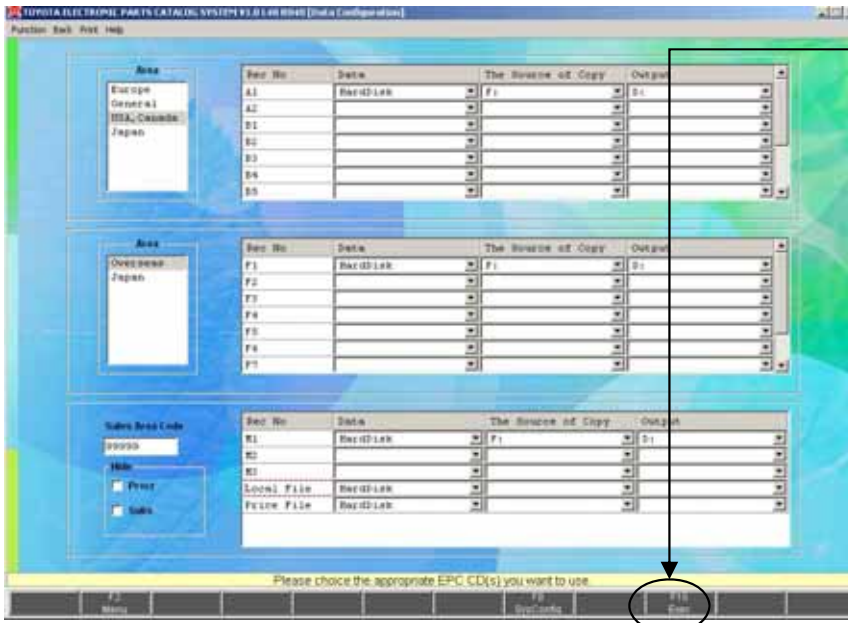

- \* Perform the same operation about JPIO, Local File and Price File as well.
- \*\* As for Local File and Price File, only operation method (HardDisk only) and the Output place can be selected. The actual data should be set on the [Locally Supplied Parts Setup] and [Price File Setup] screen.

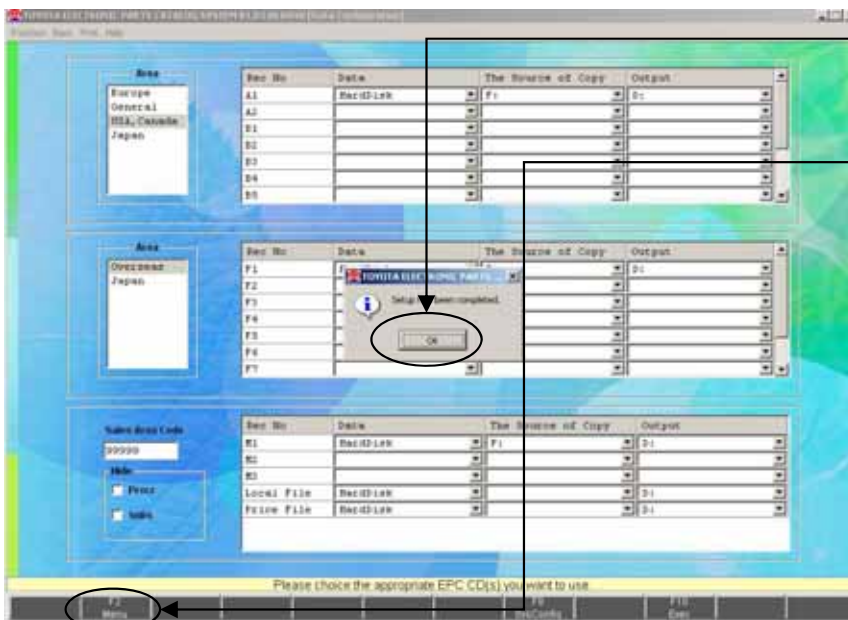

- Setup J-PIO to M1
- See (p.96) for Locally Supplied Parts Setup
- See (p.94) for Price File Setup

## 3-2.Setup at Server PC-16

\* After you set the data environment, click the “Exec” button.

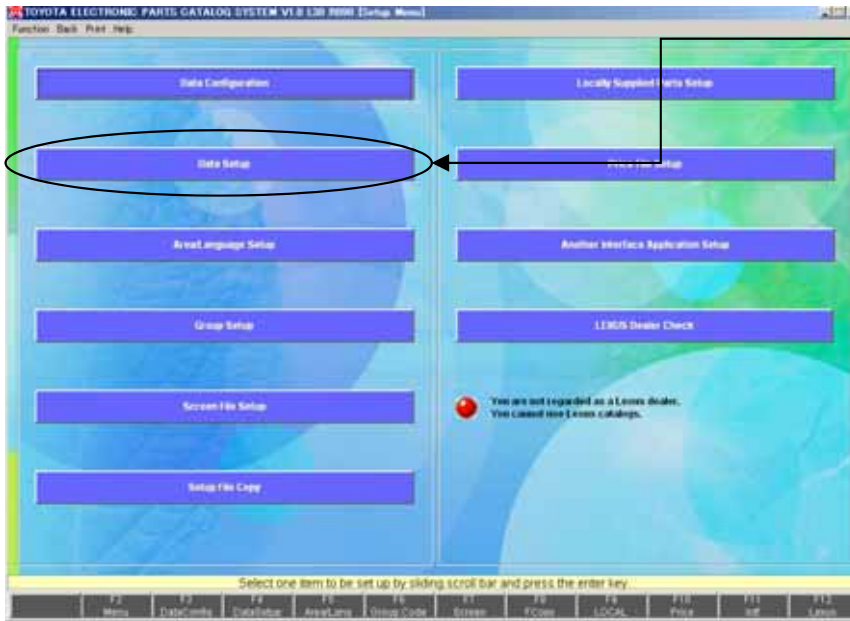

\* Click the “OK” button.

\* Click the “Menu” button to return the “Setup Menu”.

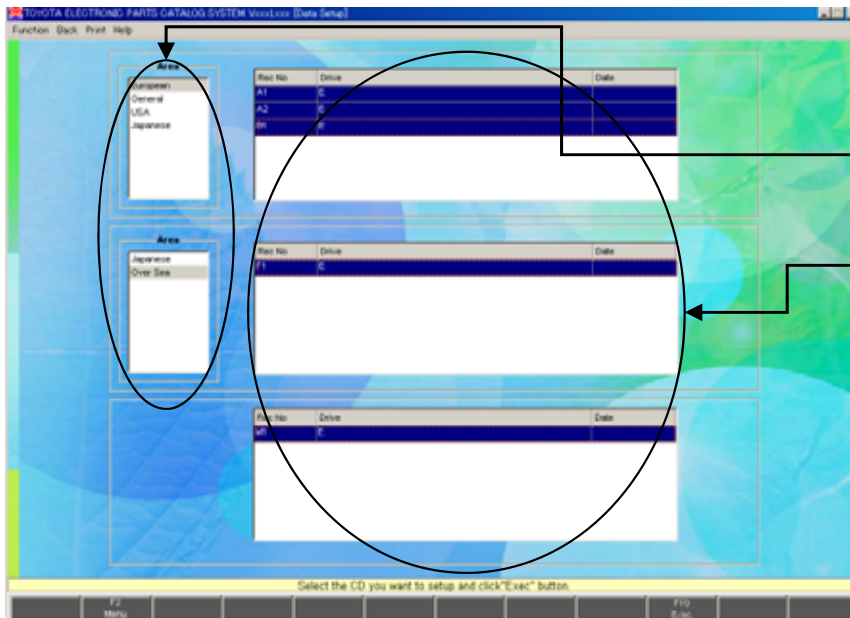

# 3-2.Setup at Server PC-17

## (6) Data Setup

\* Click the "Data Setup" button.

\* The setup Information on the setup Area is displayed.

\* Select an Area.

\* Select a Rec# of the data .  
- You can select multiple Rec#s.

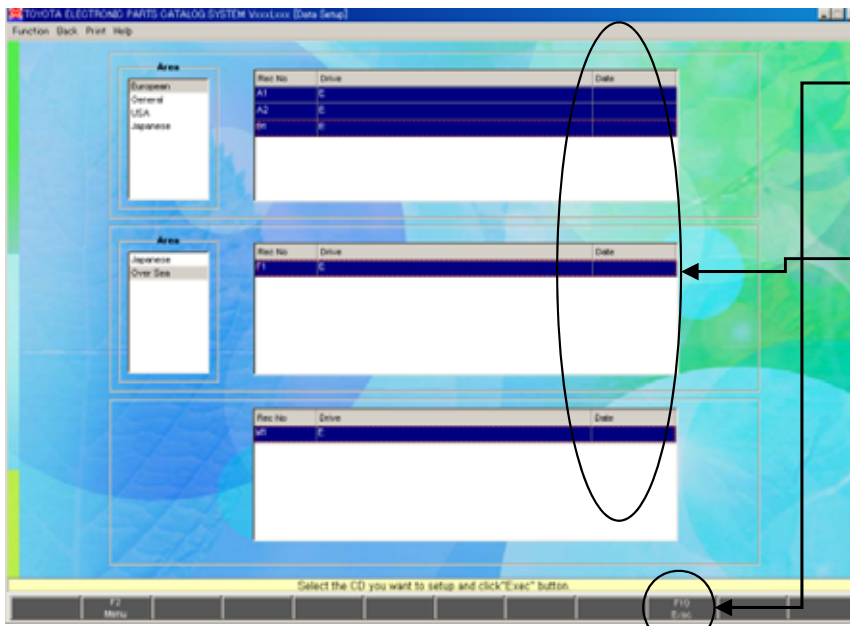

\*\* If an Area or a Rec# you want to setup isn't listed, setup the environment on the [Data Configuration] screen.

See (p.51) for Data Environment Setup

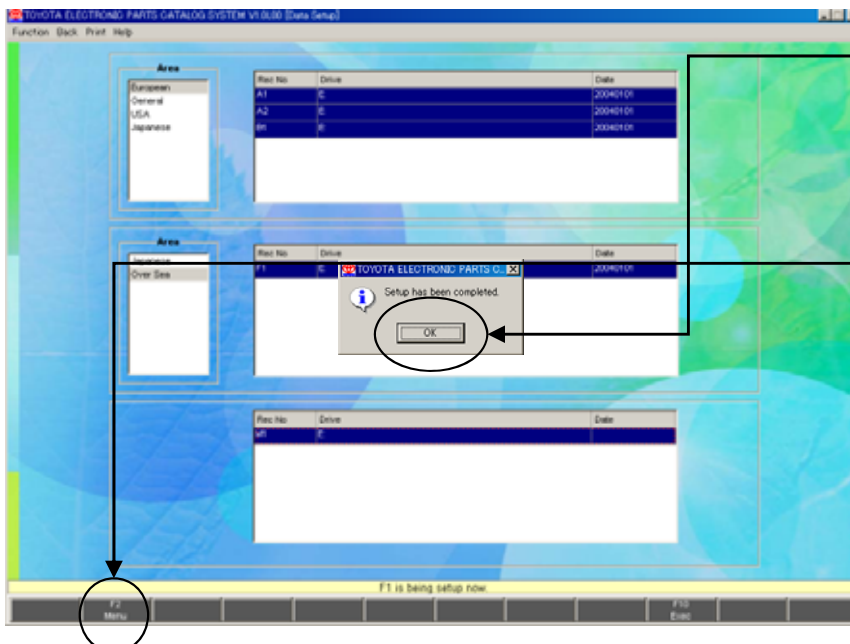

## 3-2.Setup at Server PC-18

\* After you select the Rec#, click the “Exec” button.  
DVD confirmation message will be displayed.  
Set the corresponding DVD.

\*\* When the setup is complete, the date of the data will be updated.

\*\* When setting up the data for several Areas, change the Area and select the Rec#.

\* When the setup is complete, dialog is displayed.  
And then click the “OK” button.

\*\* If you want to setup other Area, repeat the same operation after changing Area.  
After all setup is complete, click the “Menu” button to go to the “SETUP MENU”.

# 3-2.Setup at Server PC-19

## 3-2-3.Area / Language Setup

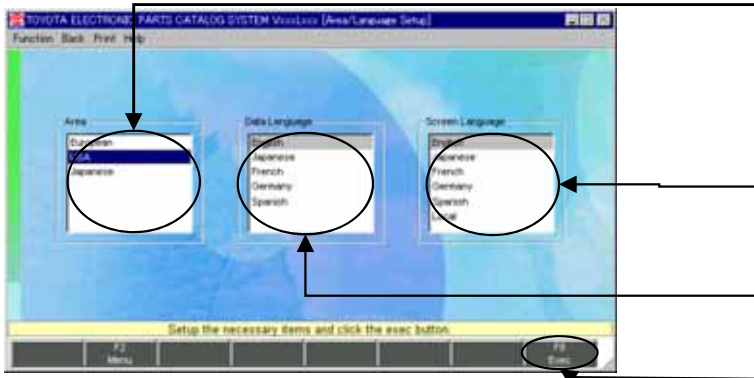

The Area you want to search on the EPC system and the Screen Language can be selected.

- Area : The Area which has setup on the [Data Setup] screen can be selected. The Area which is selected here is searched.
- Data Language : When the data such as Part Names, Illustration Name etc, is provided by each language, the Language Data which is selected here is displayed.
- Screen Language : The contents on the screen are written in the Language which is selected here.

Please select “Area/Language Setup” of “SETUP MENU”.

\* Click the “Area / Language Setup” button.

- \* By running the Data Setup, the setup Area is displayed. See (p.56) for Data Setup.
- \* Select a type of DVD (Area).
- \* Select the Language you want to display on the screen.
- \* When you select “Local” , see (p.120) for Screen / Message box Language.
- \* Select the Data Language you want to use.
- \* After you select each item, click the “Exec” button.

# 3-2.Setup at Server PC-20

## 3-2-4.LEXUS Dealer Check

\* In order to use the LEXUS catalog, you need the LEXUS password.

\* Click the “LEXUS Dealer Check” button.

\* Enter a LEXUS Password and click the “Exec” button.

- The only right password allows you to use this LEXUS Catalog.

**To clear the displayed contents ;**

Clear

\* Click the “Clear” button to delete the displayed data.

# 3-2.Setup at Server PC-21

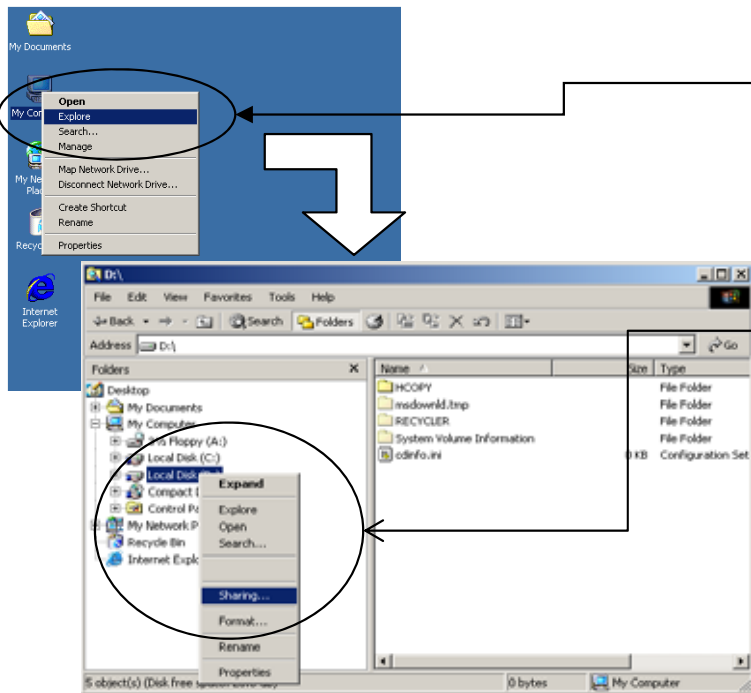

## 3-2-5.Prior Check (sharing folders)

In order to allow the client to read the data in the server, perform drive sharing at the server side according to the following procedure:

Drive to perform sharing	→	Drive of the server in which the program is installed
	→	Drive of the server in which the data is set up

Sharing the drive of the server where the program is installed  
(When the EPC System Install Drive is in the "C" drive.)

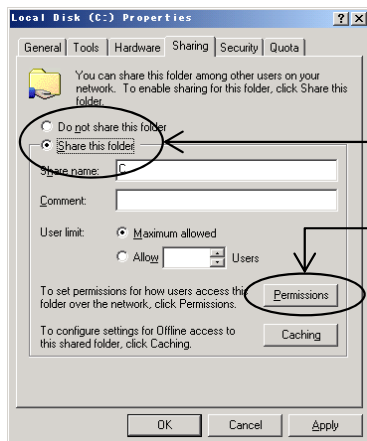

(1) Activate the Explorer and display the property of the "C" drive

\* Right-click the "My Computer" on the desktop and left-click the "Explore".

\* Right-click the "C" drive on the Explore and left-click the "Sharing".

(2) Share the "C" drive.

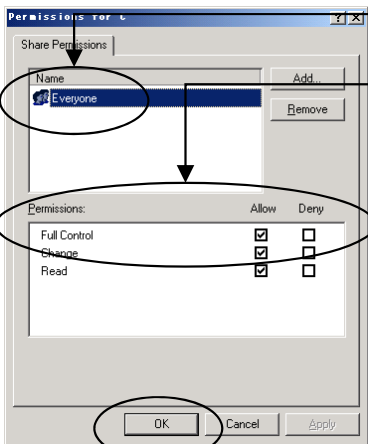

\* Select "Share this folder" with left-click

\* Left-click the "Permissions" button to perform the setting of the access permit.

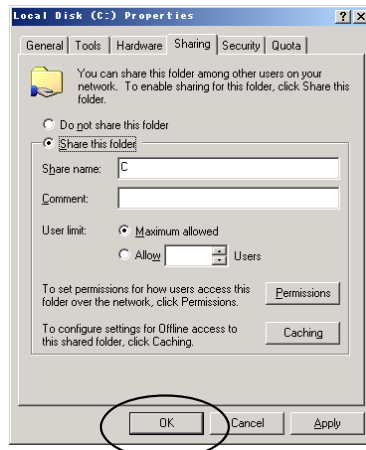

# 3-2.Setup at Server PC-22

## (3) Setting the access permit

\* Tick "Full Control" in the access permit of "Everyone" user, and left-click the "OK" button.

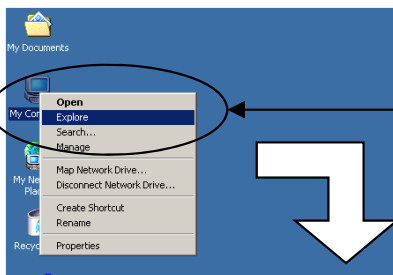

\*\* If the above setting is already applied, left-click the "OK" button to return to the property screen.

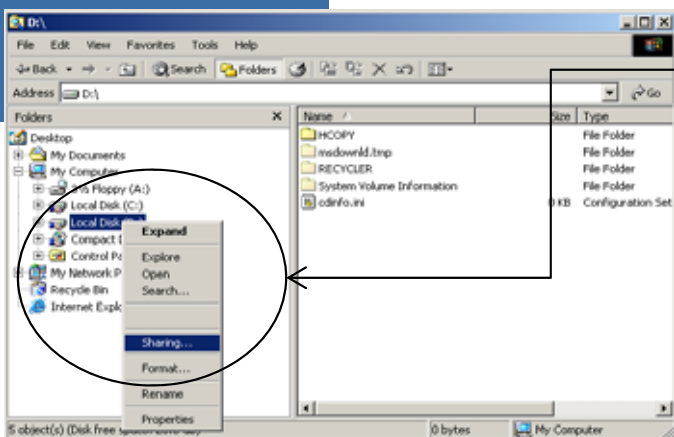

\* Close the property screen by left-clicking the "OK" button.

Sharing the driver of the server where the data are set up  
(When the EPC Data Setup Drive is in the "D" drive.)

## (1) Activate the Explorer and display the property of the "D" drive

\* Right-click the "My Computer" on the desktop and left-click the "Explore".

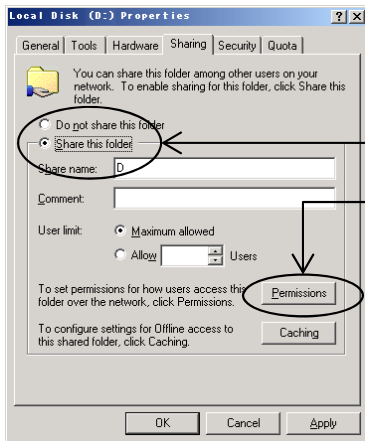

\* Right-click the "D" drive on the Explore and left-click the "Sharing".

# 3-2.Setup at Server PC-23

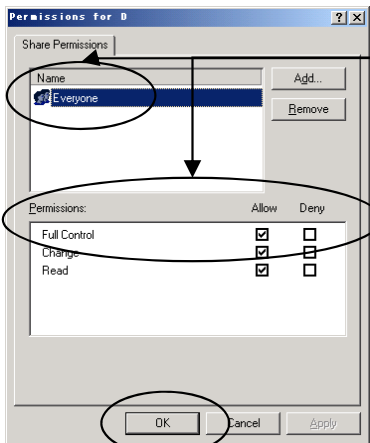

(2) Share the "D" drive.

\* Select "Share this folder" with left-click

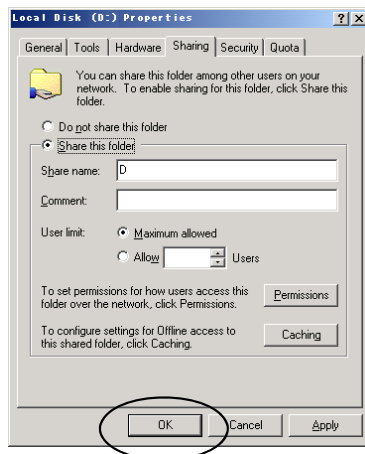

\* Left-click the "Permissions" button to perform the setting of the access permit.

(3) Setting of the access permit

\* Tick "Full Control" in the access permit of "Everyone" user, and left-click the "OK" button.

\*\* If the above setting is already applied, left-click the "OK" button to return to the property screen.

\* Close the property screen by left-clicking the "OK" button.

# 3-2.Setup at Server PC-24

## 3-2-6. Procedure of Program Renewal by A1DVD

### 1. Program Renewal Message

The message appears on the screen if the new program exist in it when setting up A1DVD. In this case, please implement renewing the latest program by referring to "Program renewal by A1DVD"

#### (1) Checking the program renewal message

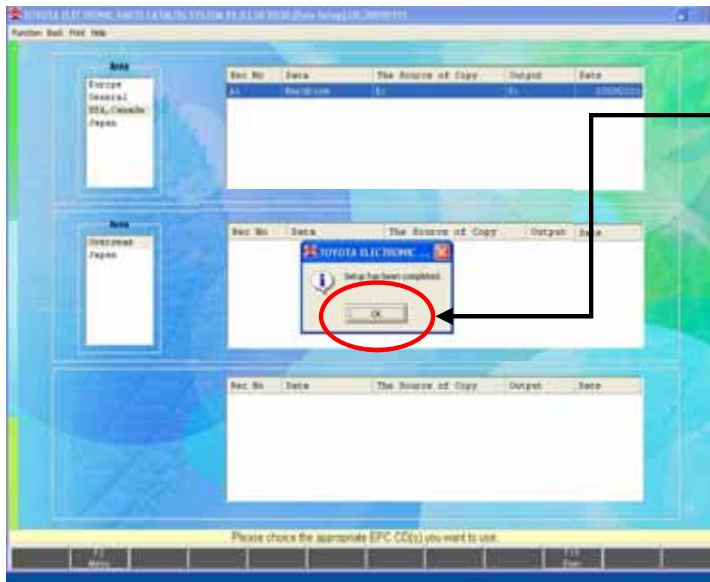

##### 1. EPC Data Setup

\* Setup EPC data according to the normal procedure.

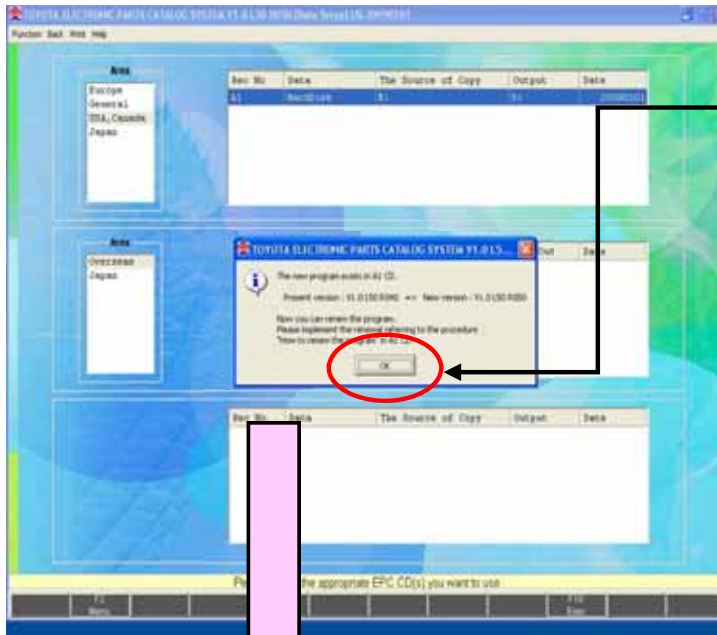

##### 2. The EPC installation is completed

\* When the setup is completed, a dialog is displayed. Please click the "OK" button.

## 3-2.Setup at Server PC-25

### 3.Checking the program renewal message

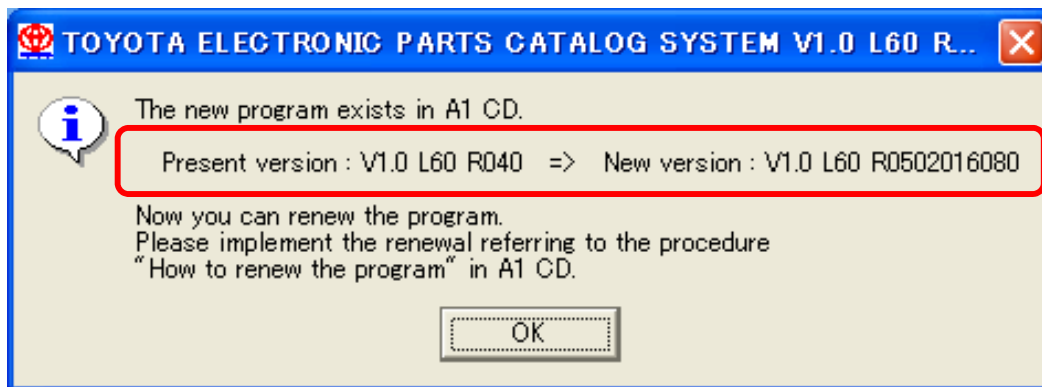

\* The program renewal message appears. Please click the "OK" button.

This message box will not appear when the new program does not exist in A1DVD.

Expanded message box

**\*EPC version = before V1.0 L60 R040**

Check the new version, and then Left-click on the "OK" button.

The program is not renewed automatically just by pressing the "OK" button. Please implement renewing the program by referring to "Program renewal by A1DVD".

**\*EPC version = after V1.0 L60 R050yyyyymm0**

When the new program exist in A1DVD, after "Data Setup", the program is renewed automatically when I push the "Menu" button. (Setting the latest A1 disk at the DVD drive.)

# 3-2.Setup at Server PC-26

## 2 .Program Renewal by A1DVD \*EPC version = before V1.0 L60 R040

Please end "TOYOTA EPC SYSTEM"  
if it is activating to you renew the program by A1DVD.

### (1)EPC the Latest (EPC) Program Update

#### 1.EPC the Latest Program Update-1

\* Insert the latest A1DVD into the DVD-ROM Drive

\* Left-double-click " My Computer" on the desktop

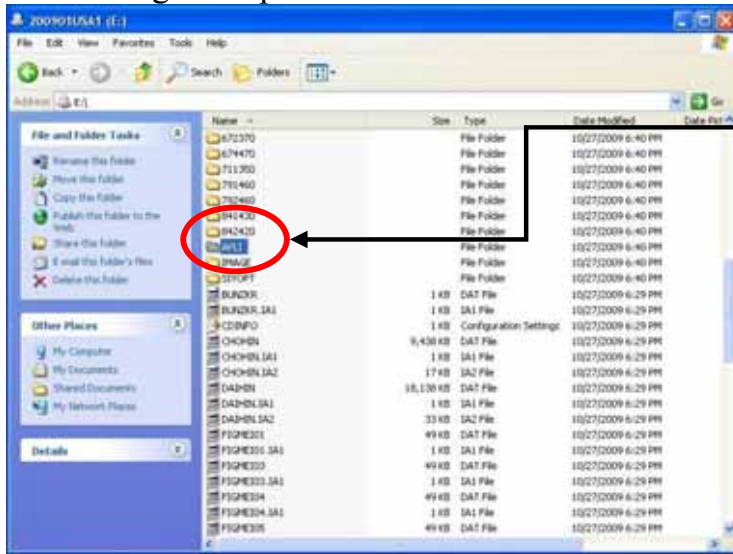

#### 2.EPC the Latest Program Update-2

\* Left-double-click " DVD-ROM Drive"

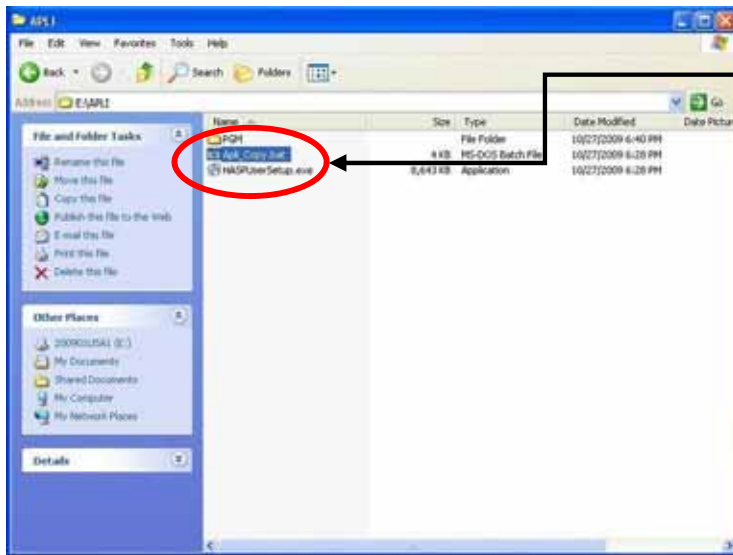

# 3-2.Setup at Server PC-27

## 3.EPC the Latest Program Update-3

\* Left-double-click the " APLI" folder

## 4.EPC the Latest Program Update-4

\* Left-double-click "Apli\_Copy.bat"

## 5.EPC the Latest Program Update-5

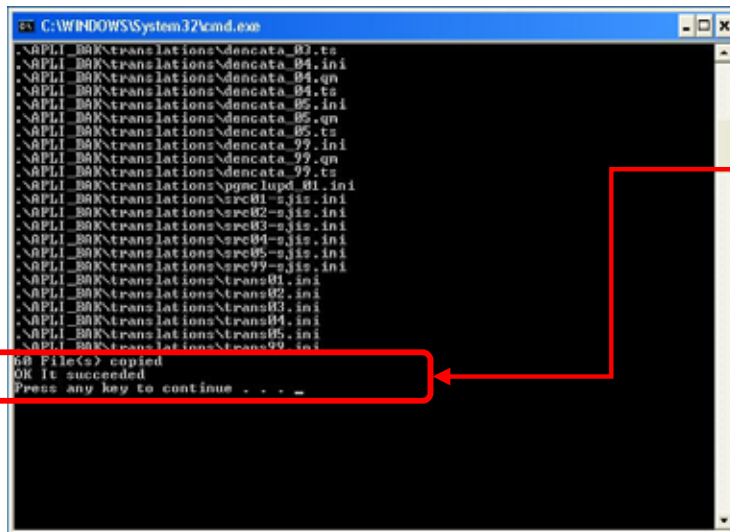

\* A message appears, "Input the destination drive where EPC has been installed ....."  
Input the destination drive where EPC has been installed, then press "Enter" key.

If you inputted the drive where EPC is not installed, input it again correctly. Then press the "Enter" key.

## 3-2.Setup at Server PC-28

### 6.EPC the Latest Program Update-6

OK It succeeded
Press any key to continue . . .
```

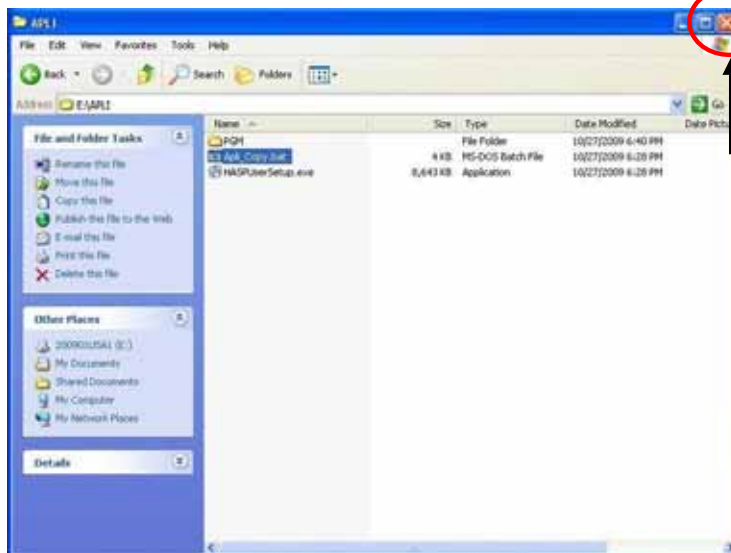

\* Wait for a while .  
And then, a message appears,  
" OK It succeeded. Press any key to  
continue..."  
Then press the "Enter" key.

If a message appear except " OK  
It succeeded. Press any key to  
continue..." ,  
you should restart the PC and  
implement program update from  
"EPC the latest Program Update-  
1" again.

### 7.EPC the Latest Program Update has been completed

\* EPC the latest Program Update  
has been completed. Please left-  
click the "X " button to close the  
window.

## 3-2.Setup at Server PC-29

After EPC the Latest Program Update has been completed, please check the EPC version by starting the "TOYOTA EPC SYSTEM". When the EPC version on the "TOYOTA EPC SYSTEM" corresponds to the version which has been announced by TMC, program renewal has been implemented correctly.

Information of the EPC version

 TOYOTA ELECTRONIC PARTS CATALOG SYSTEM V1.0 L60 R0502016080 [Main Menu]

 TOYOTA ELECTRONIC PARTS CATALOG SYSTEM V1.0 L60 R0502016080 [Main Menu] GE:20160801

## 3-2-7. recovery

### 1. Procedure of Program Recovery

Please end "TOYOTA EPC SYSTEM"  
if it is activating to recover the program.

#### (1) Procedure of Program Recovery

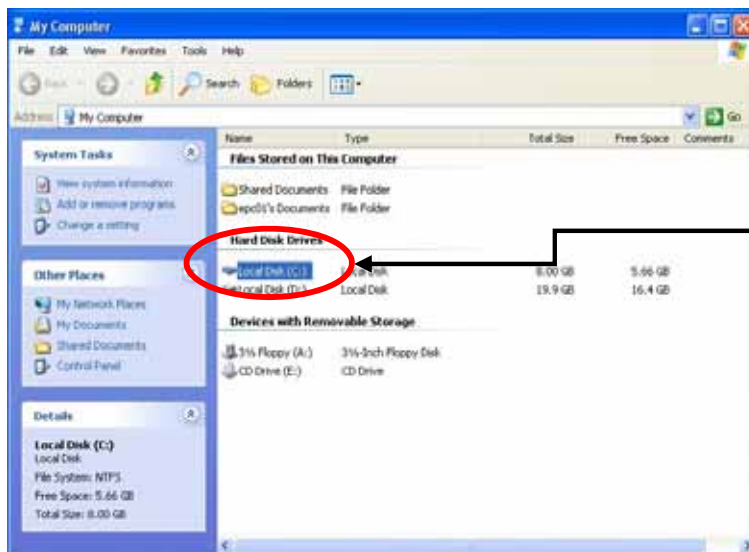

##### 1. Program Recovery-1

\* Left-double-click the "My Computer"  
on the desktop

##### 2. Program Recovery-2

\*Left-double-click " the destination drive where EPC has been installed "

example

When the destination drive where EPC has been installed " is "C Drive", please left-double-click "C Drive"

# 3-2.Setup at Server PC-32

## 6. Program Recovery-6

\* Wait for a while.  
A message appears,  
"OK It succeeded. Press any key to continue..."  
Please press the "Enter" key.

If a message appear except "OK It succeeded. Press any key to continue...", you should restart the PC and implement program recovery again.

## 7. Program recovery has been completed

\* Program recovery has been completed. Please Left-click the "X" button.

After program recovery has been completed, please check the EPC version by starting "TOYOTA EPC SYSTEM". When program recovery has been implemented correctly, the end of the version number becomes " 9 "

[example]            version before recovery : V1.0 L50 **R060**

version after recovery : V1.0 L50 **R069**

# 3-3.Setup at Client PC-1

## 3-3-1.Prior Check (drive allocation)

In order to read the data in the server from the client, perform the network drive allocation for the shared drive according to the following procedure.

Client drive that performs the allocation → arbitrary (drive in which the program of the server side is installed)  
→ arbitrary (drive in which you have set up the data of the server side)

## Setup at Client PC

Allocation of the EPC program

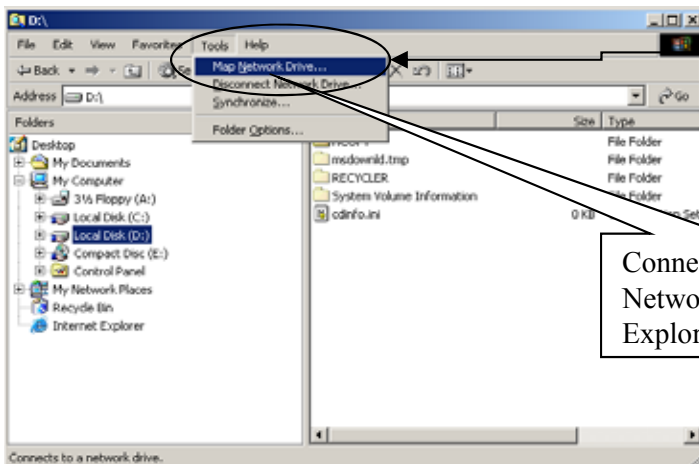

(1) Activate the Explorer

\* Right-click the “My Computer” on the desktop and left-click the “Explore”.

(2) Set the connection for the drive shared by the server.

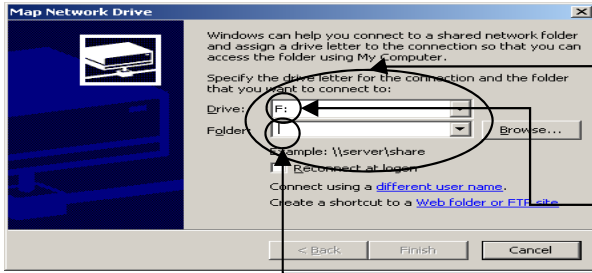

\* Left-click the “tools” on the Explore and left-click the “Map Network Drive”.

Connect to the Network Drive in Explorer.

# 3-3.Setup at Client PC-2

(3)Enter the machine name and shared folder name in the pass column.

\* 3-2-5.For each drive at the server side that shared in the prior check (sharing folders), perform the network drive allocation.

Client side (arbitrary)

Server side (fixed)

## Data allocation

\*The procedure of allocation is same as .

# 3-3.Setup at Client PC-3

## 3-3-2.EPC Program Install

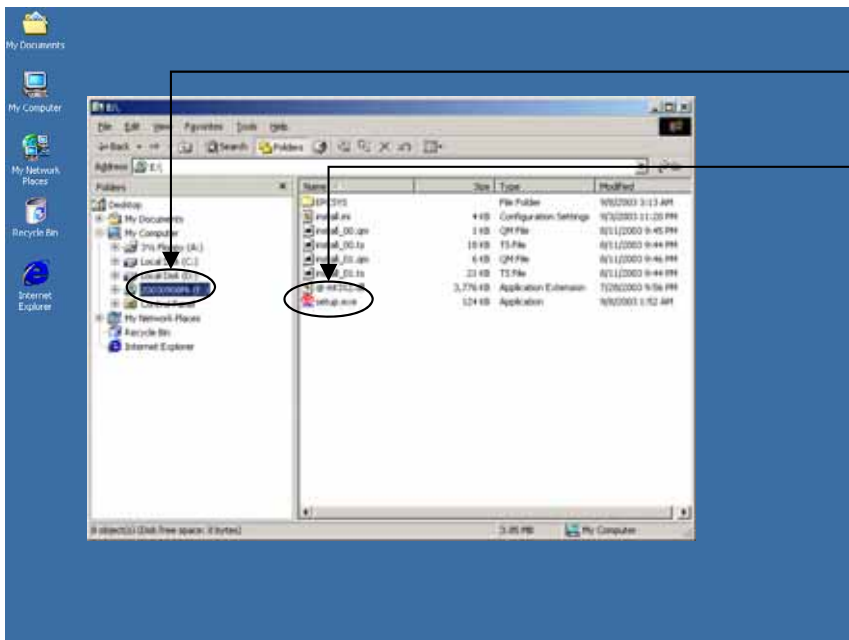

(1)Opening Windows and inserting a A1DVD to the DVD drive.

- \* Turn on your computer to open a Windows.
- \* After the Windows is start up, insert the A1DVD to the DVD-ROM drive.
- \* Right-click the “My Computer” on the desktop and left-click the “Explore”.

(2)Running the install system from a A1DVD.

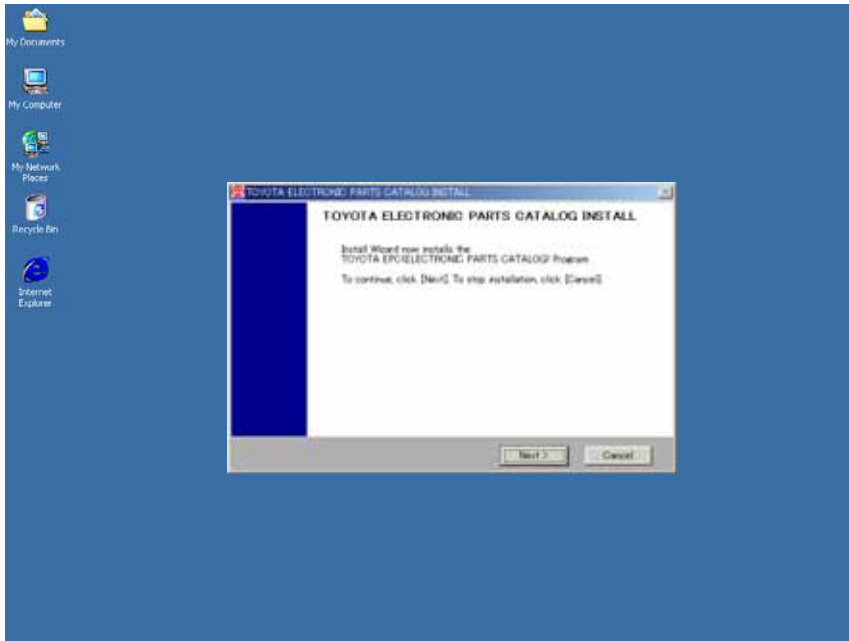

- \* Left-click the drive where you have set the A1DVD.
- \* Double-click the “setup.exe”.

**Go on to the next page**

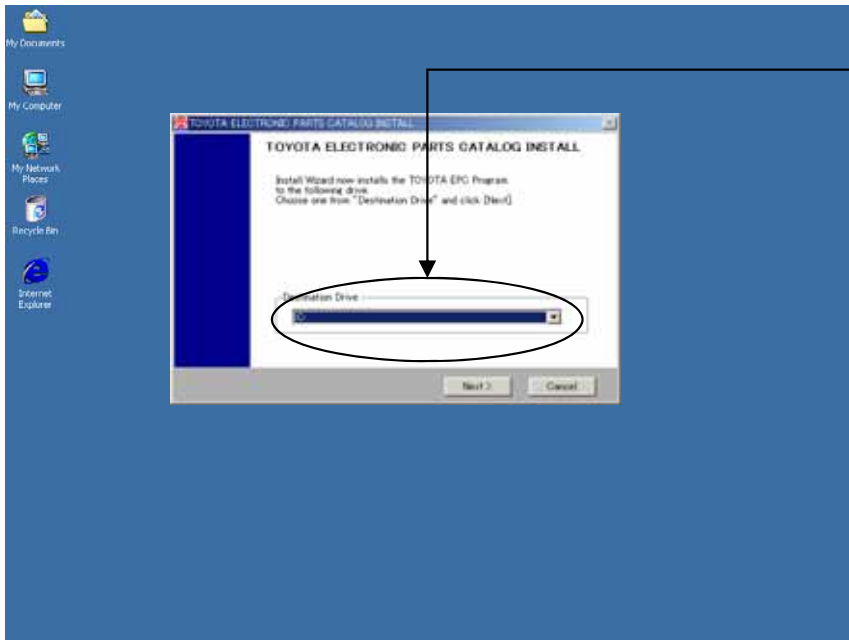

# 3-3.Setup at Client PC-4

## (3)Starting the Installation

- \* To execute the TOYOTA EPC Install, left-click the “Next” button.
- \* To cancel the installation, left-click the “Cancel” button.
- \* A message for asking if you cancel the installation or not will appear again. Click the “OK” button to cancel the installation or click the “Cancel” to continue.

## (4)Selecting a drive for the installation.

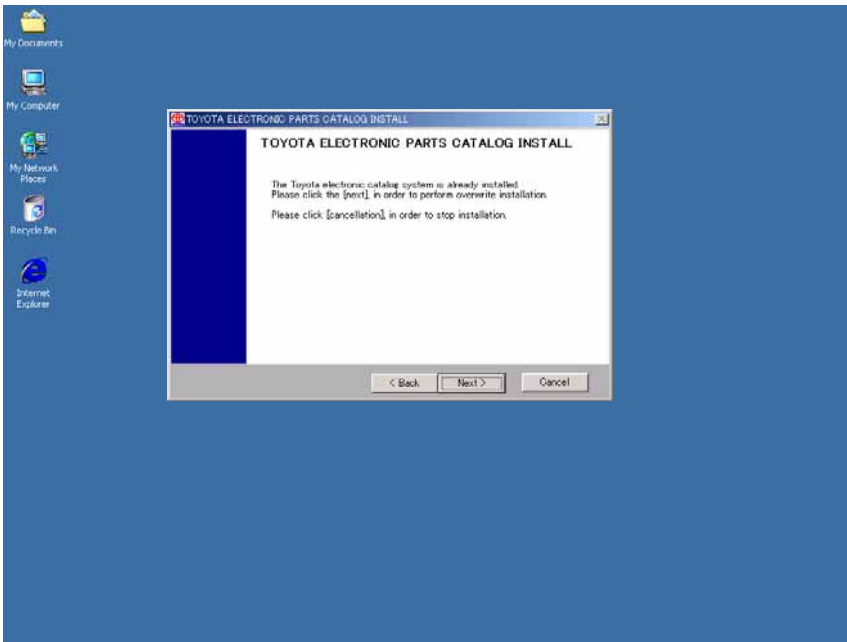

- \* Select the drive where you want to install the TOYOTA EPC, and left-click the “Next” button.
- \* To cancel the installation, left-click the “Cancel” button.
- \* If installing for the first time, go to (6) [Selecting a system configuration].

**Go on to the next page**

## 3-3.Setup at Client PC-5

(5)Checking the Install Configuration [Some install configurations may have the following A) or B) case.]

A)In case that the EPC is already installed,

\* To install it again, left-click the “Next” button to transit to (7) [System Installation].

\*\* Even if a new system is already installed, another installation will maintain the existing setup information.

\* To go back to the previous screen (4) [Selecting a drive for the installation], left-click the “Back” button.

\* To cancel the installation, left-click the “Cancel” button.

B)In case that the disk space isn't enough,

\* The EPC installation needs the disk space of 10 MB.

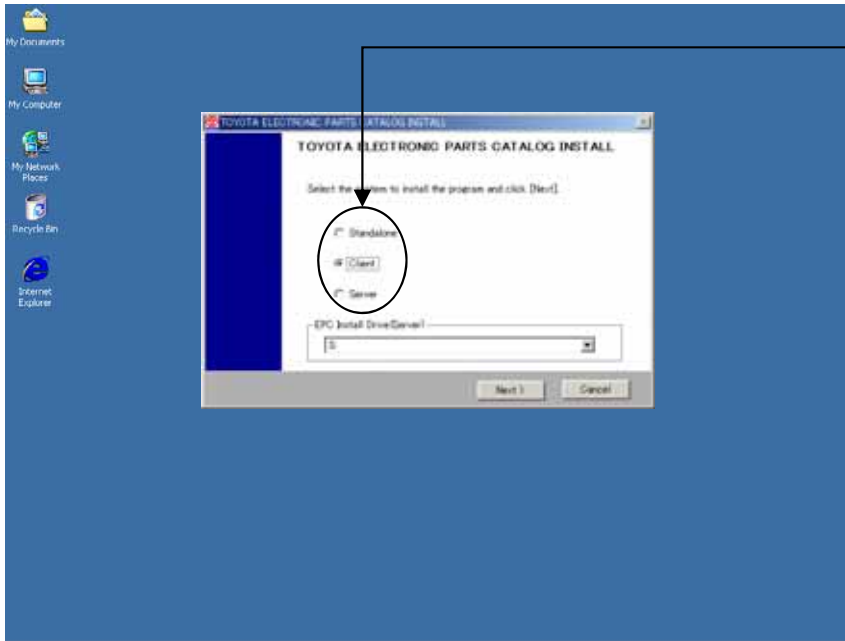

To change the drive for the installation, left-click the “Back” button to go back to the previous screen (4) [Selecting a drive for the installation].

\* To cancel the installation, left-click the “Cancel” button.

**Go on to the next page**

# 3-3.Setup at Client PC-6

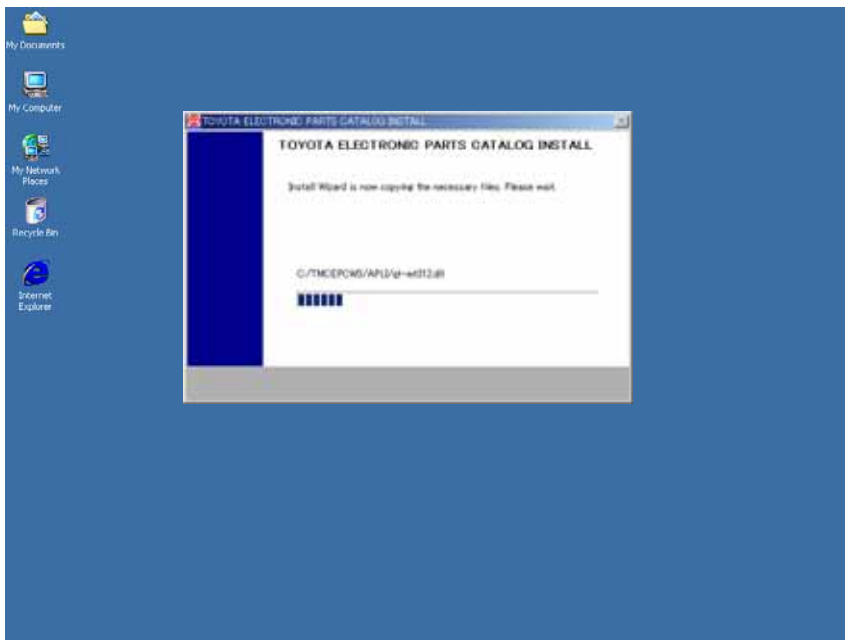

## (6)Selecting a system configuration

- \* Select a system configuration (“Client”) , and left-click the “Next” button.
- \* To cancel the installation, left-click the “Cancel” button.
- \* Select the drive for the program of the server side that is allocated on (p.72) for Prior Check (drive allocation).

## (7)System Installation

- \* Wait for a while until the installation from the DVD has been completed.

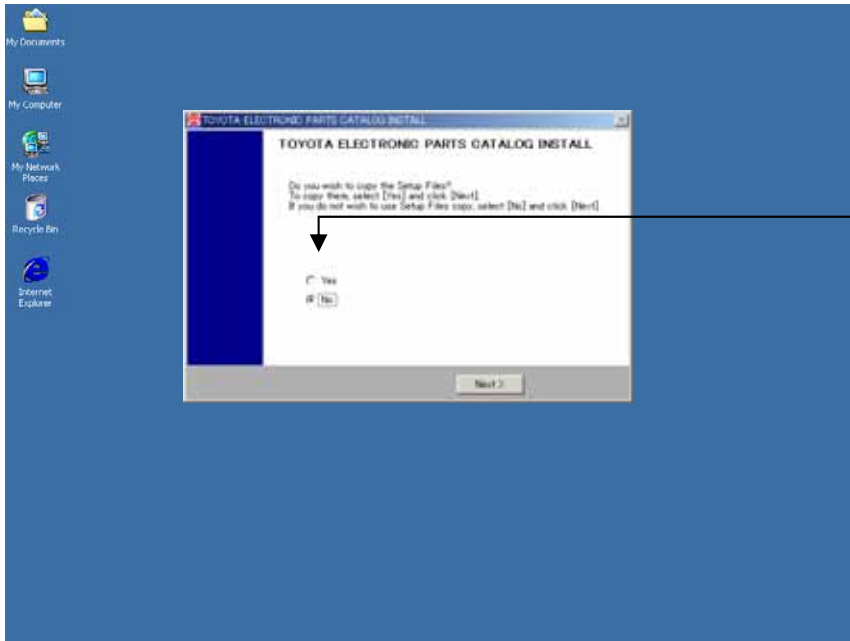

**Go on to the next page**

# 3-3.Setup at Client PC-7

## (8)Copying a setup file

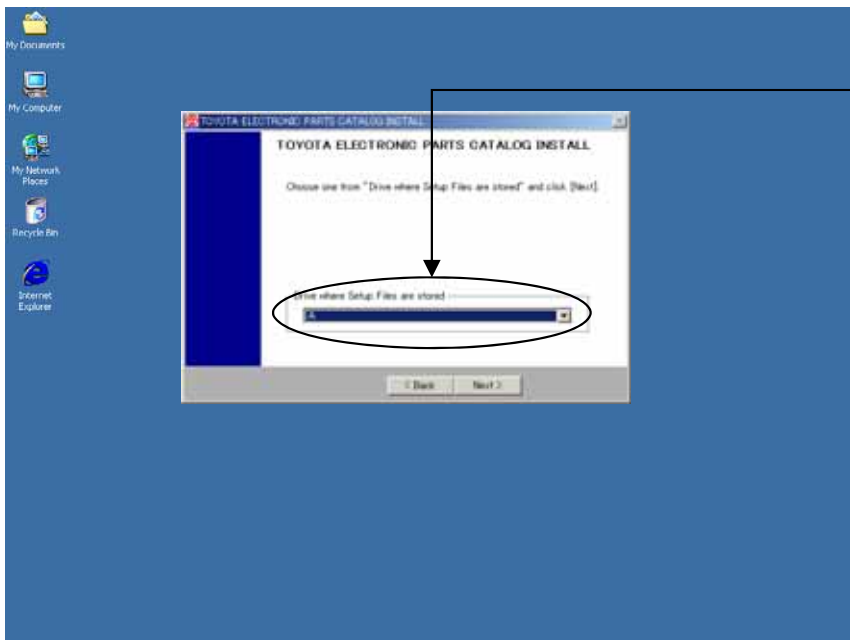

\* If there isn't the copy of the setup file, select the "No" and left-click the "Next" button to transit to (11) [Setting a background image].

\* If there is the setup file, select the "Yes" and left-click the "Next" button to transit to (9) [Selecting the drive where the setup file is inserted].

See (p.137) for the setup file copy

## (9)Selecting the drive where the setup file is inserted.

\* Insert a floppy with the setup file to the floppy drive, select the drive where you inserted the floppy, and then left-click the "Next" button.

\* To cancel the copy of the setup file, left-click the "Back" button to go back to the previous screen (8) [Copying a setup file].

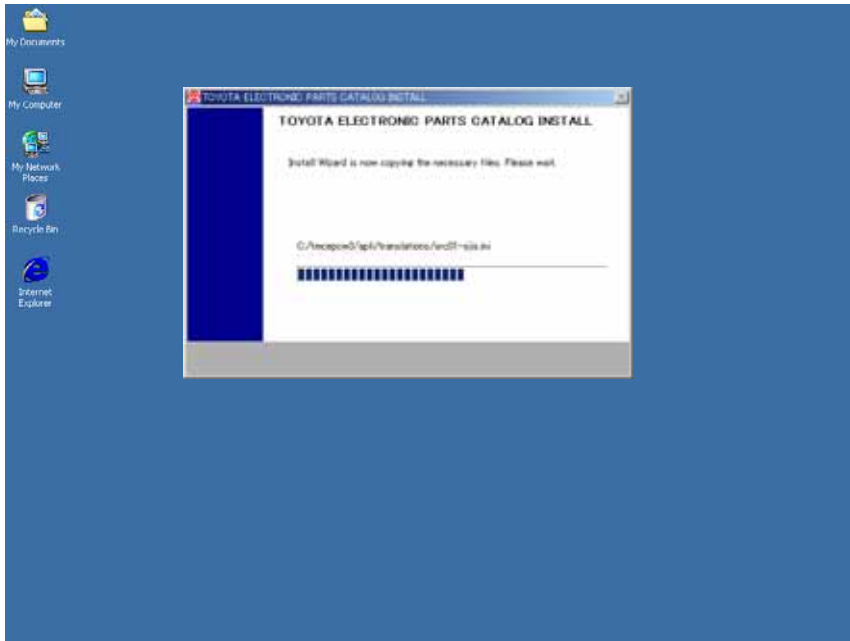

\*\* In the case that a correct floppy drive or a floppy with a correct setup file isn't setup, an error message of "An applicable file is not found." will appear. You should setup it again correctly.

**Go on to the next page**

# 3-3.Setup at Client PC-8

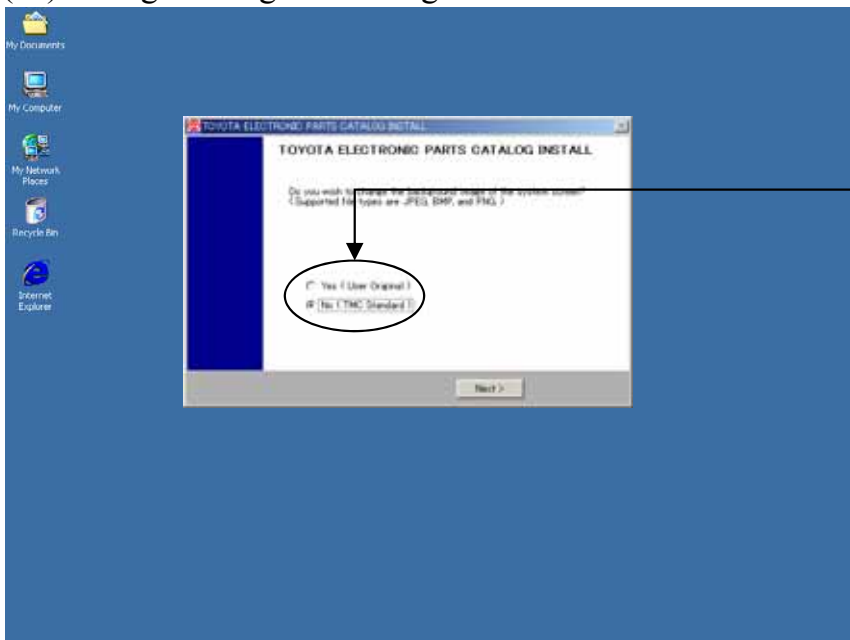

## (10) Copying a file

\* Wait for a while until the setup file has been copied from the floppy.

## (11) Setting a background image

\* If you setup the default background image to this EPC screen, select the “No” and left-click the “Next” button to transit to (13) [Completing the installation].

\* If you want to setup the background image of your own choice to this EPC screen, select the “Yes” and left-click the “Next” button to transit to (12) [Selecting a background].

What is background image?

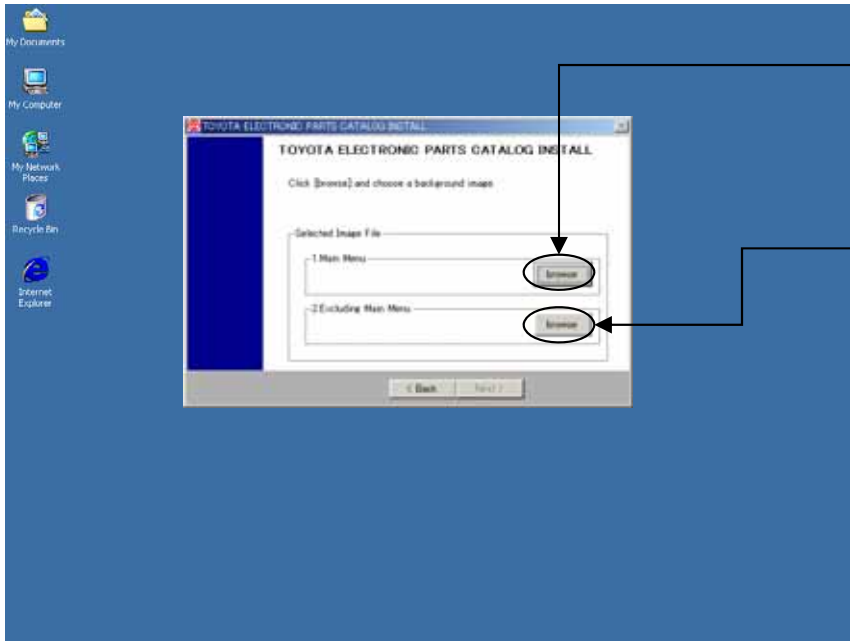

You can display the image you prefer as background of the menu screen.

**Go on to the next page**

# 3-3.Setup at Client PC-9

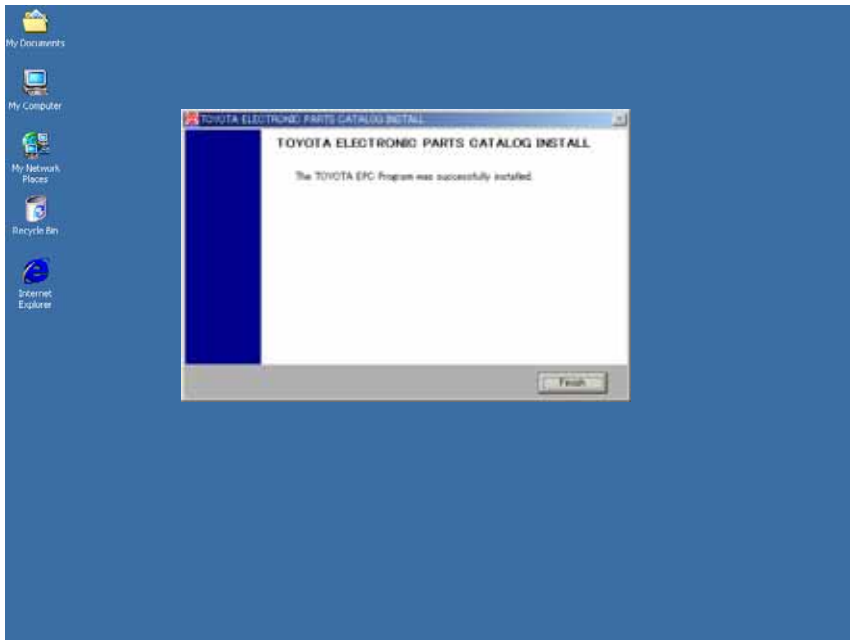

## (12)Selecting a background image

- \* To setup the background image to the Main Menu, left-click the “browse” button and select a file, then left-click the “Next” button.
- \* To setup the background image to other than the Main Menu, left-click the “browse” button and select a file, then left-click the “Next” button.
- \*\* The file types of JPEG, BMP, and PNG can be selected as a background image.
- \* To go back to the previous screen (11) [Setting a background image], left-click the “Back” button.

## (13)Completing the installation

- \* As the EPC installation is completed, left-click the “Finish” button.

**Go on to the next page**

# 3-3.Setup at Client PC-10

## (14)Starting the TOYOTA EPC SYSTEM

\*Insert the A1DVD to the DVD drive.

\* Double-click the “TOYOTA EPC SYSTEM” on the desktop to start the TOYOTA EPC SYSTEM.

**\*If using the current EPS group setup file...**

### Setup procedure

- 1.Copy the Group Setup Files to the Floppy Disk.  
(Group Setup Files: TMC MSTW2YGCGRPMEL.D and TMC MSTW2YGCGRPPNC.D)
- 2.See (8)[Copying a setup file] on (p.78).

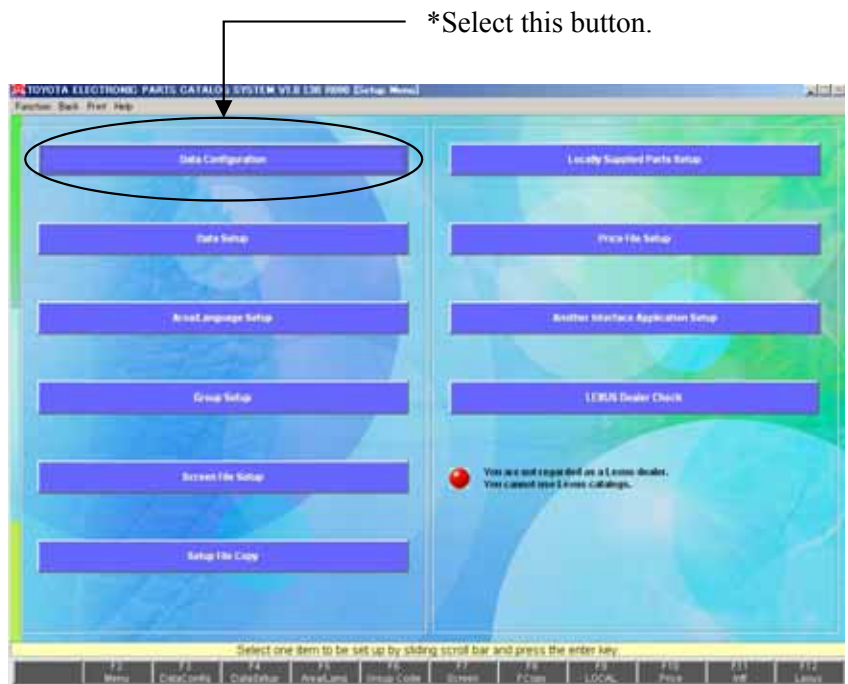

# 3-3.Setup at Client PC-11

## 3-3-3.EPC Data Setup

### (1) Data environment setup

**\* Press Setup Menu.**

**Click Data Configuration button.**

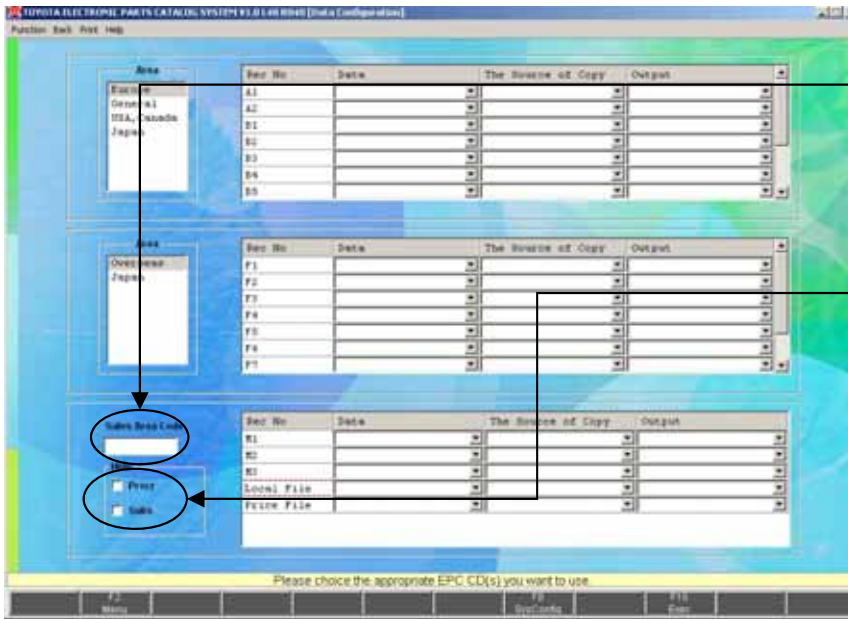

#### Reference: Description of the buttons in Setup Menu screen

- \* Data Configuration : Sets up Data Operation(DVD/Hard Disk/Server). Run this setup first after the EPC system is installed.
  - \* Data Setup : Sets up the data with the contents created on the [Data Configuration] screen. This setup must be run whenever the data is updated.
  - \* Area/Language Setup : Sets up Data Language and Screen Language. Select an Area when the data of multiple Areas are set up.
  - \* Group Setup : Catalog Codes and Part Name Codes which are often searched should be registered here so that you can search the data by Group Code.
  - \* Screen File Setup : Use when changing a displayed title on the screen.
  - \* Setup File Copy : The setup Environment can be copied on other computers. It will be helpful to operate multiple computers under the same environment.
  - \* Locally Supplied Parts Setup : Set up the data here when searching for Locally Supplied Parts.
  - \* Price File Setup : Set up the data here when searching Price File.
  - \* Another Interface Application Setup : Use when operating another system using the search results on EPC system.
  - \* LEXUS Dealer Check : Lexus Dealer must enter a given password so that you can search Lexus catalog.
- \*\* Clicking the "Menu" button ends the Setup Menu and goes back to the Main Menu.

# 3-3.Setup at Client PC-12

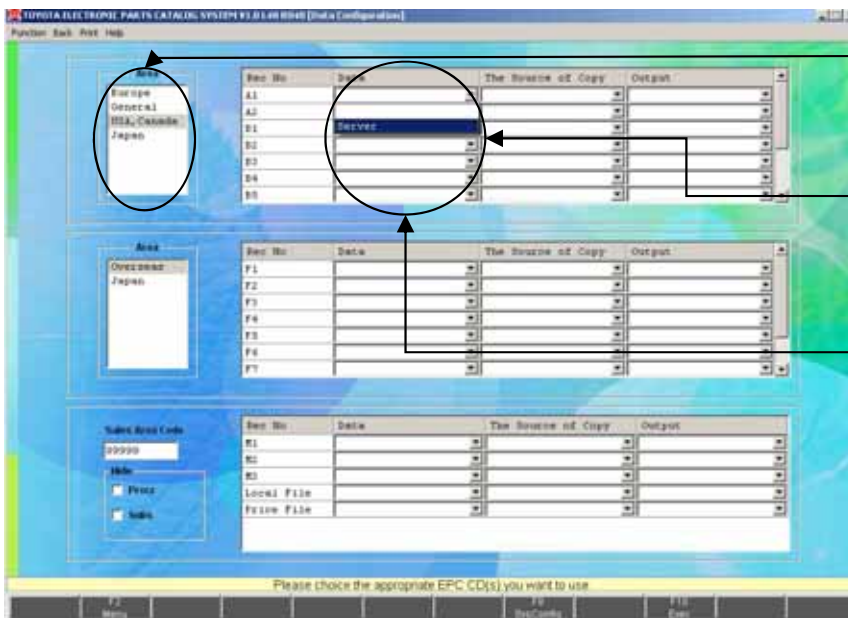

## (2) Entering Sales Area Code

- \* In order to search substitution part number/procurement part number corresponding to the region, enter the 5-digit Sales Area Code.
- \* Sales Area Code will be described separately
- \* The ticked product numbers will not be searched.
  - If "Procr" is ticked, the procurement product number will not be displayed.
  - If "Subs" is ticked, the alternative product number will not be displayed.

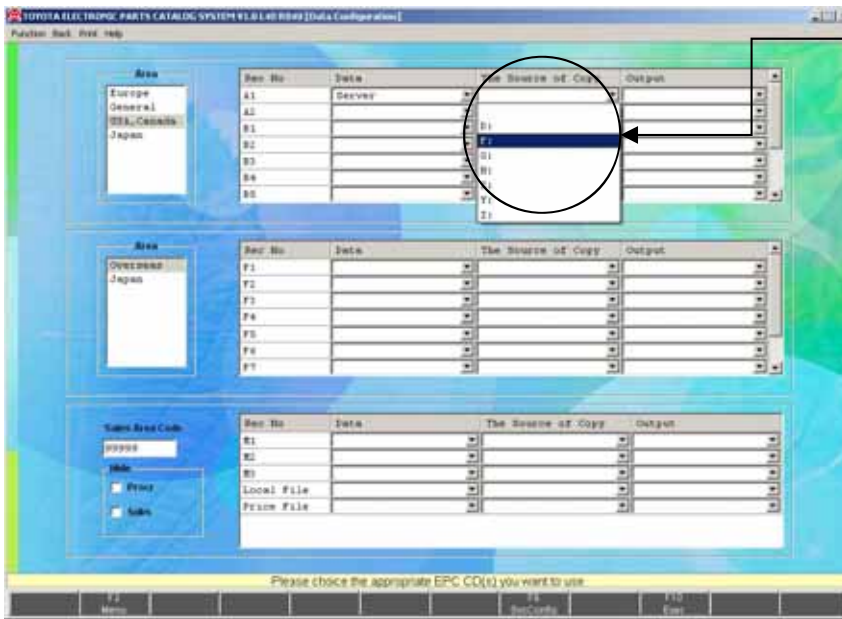

## (3) To setup the operation for EPC (Catalog) data

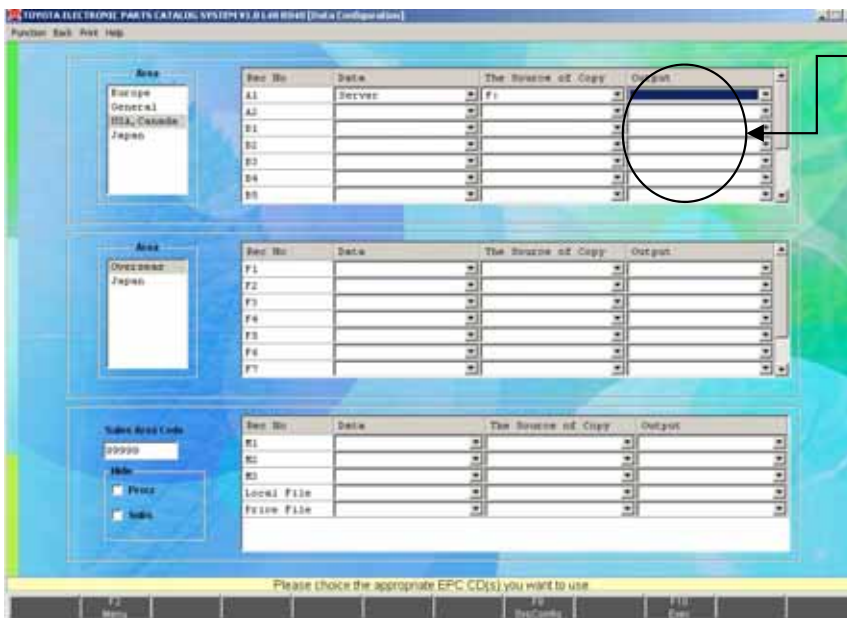

- \* Select the Area you want to setup. Select the type of DVD (Area) you want to set.
- \* Setup the EPC data here. Select the Area you want to setup, and setup the method for operating and the recorded place of the data for each Rec#.
- \* Setup the method of your operation. Select a Server from a pull-down list box.
- \*\* When installed with "Client", you can select only "Server".

# 3-3.Setup at Client PC-13

\* Select the drive where the data is set.  
Select the drive for the data of the server side that is allocated on (p.72) for Prior Check (drive allocation).

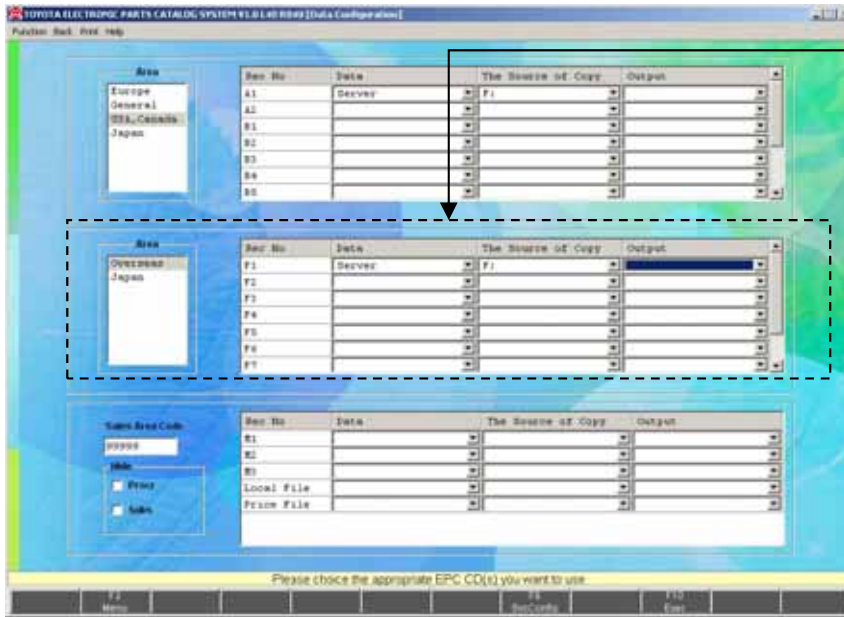

\* In case of Server, you can't set the drive.

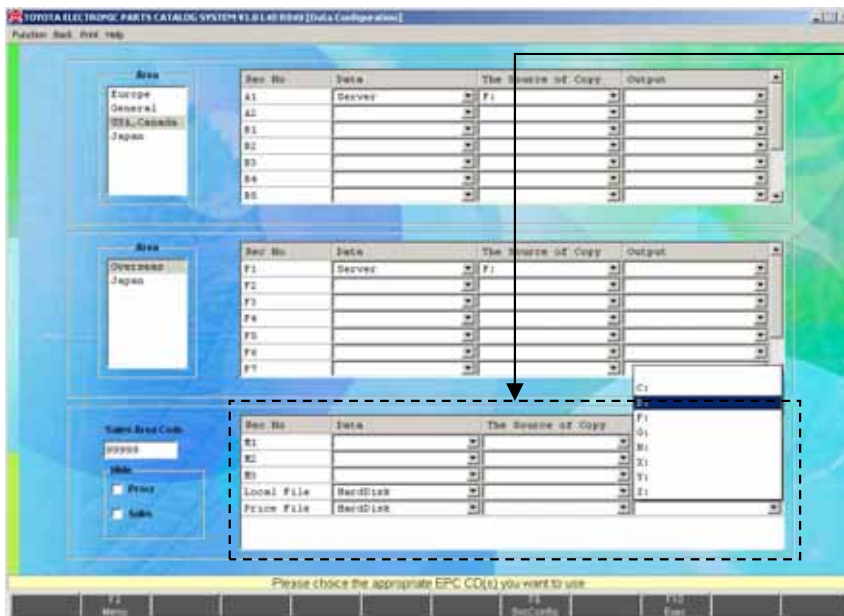

# 3-3.Setup at Client PC-14

(4) To setup the operation for EPC (FrameNo) data

- \* Perform the same operation about FrameNo DVD
- \* As the number becomes bigger, the frame information will be newer. (F1 is the oldest DVD.)

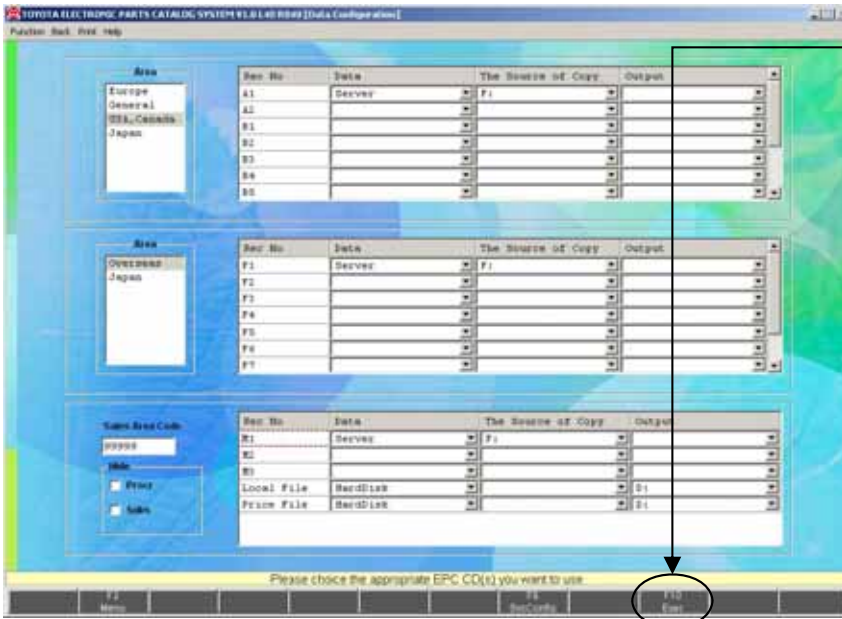

(5) To setup the operation for JPIO, Local File, and Price File

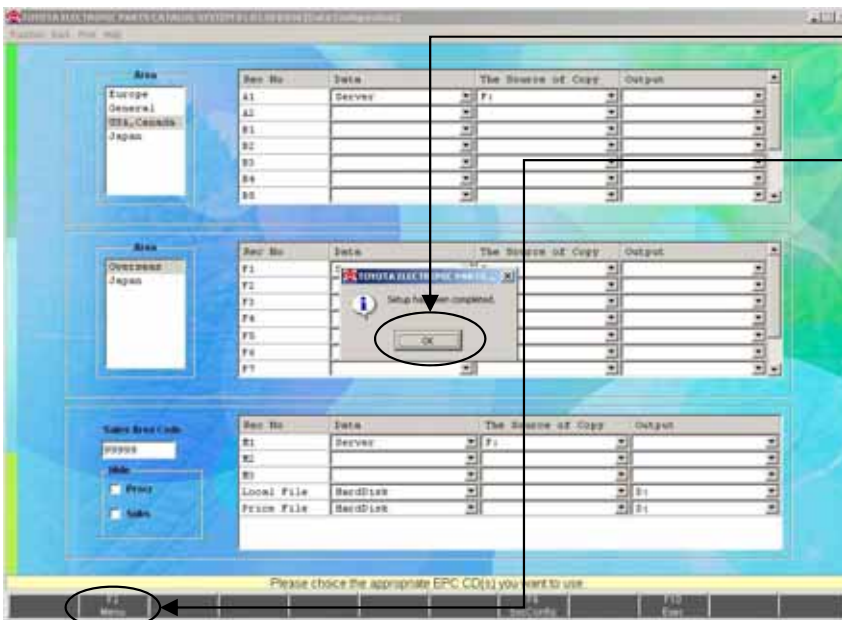

- \* Perform the same operation about JPIO, Local File and Price File as well.
- \*\* As for Local File and Price File, only operation method (HardDisk only) and the Output place can be selected. The actual data should be set on the [Locally Supplied Parts Setup] and [Price File Setup] screen.
- \*\* If Local File and Price File are set up at the server side, the data at the server side can be read by selecting the same drive with the catalog and frames as copy destination. In this case, performing [Locally Supplied Parts Setup] or [Price File Setup] by each client is not required.

# 3-3.Setup at Client PC-15

\* After you set the data environment, click the “Exec” button.

\* Click the “OK” button.

\* Click the “Menu” button to return the “Setup Menu”.

\*\* In case of the client, as you read the data in the server, you do not need to set up the data.

# 3-3.Setup at Client PC-16

## 3-3-4.Area / Language Setup

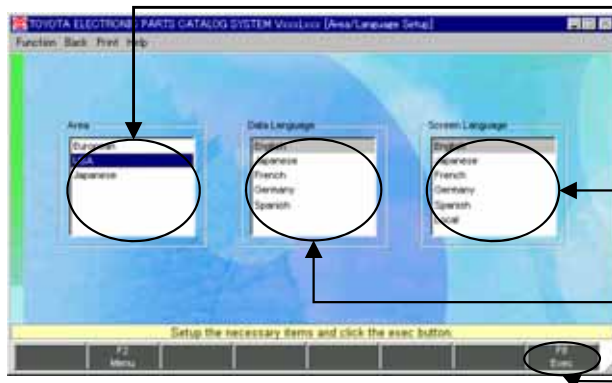

The Area you want to search on the EPC system and the Screen Language can be selected.

- Area : The Area which has setup on the [Data Setup] screen can be selected. The Area which is selected here is searched.
- Data Language : When the data such as Part Names, Illustration Name etc, is provided by each language, the Language Data which is selected here is displayed.
- Screen Language : The contents on the screen are written in the Language which is selected here.

Please select “Area/Language Setup” of “SETUP MENU”.

\* Click the “Area / Language Setup” button.

\* Select a type of DVD (Area).

\* Select the Language you want to display on the screen.

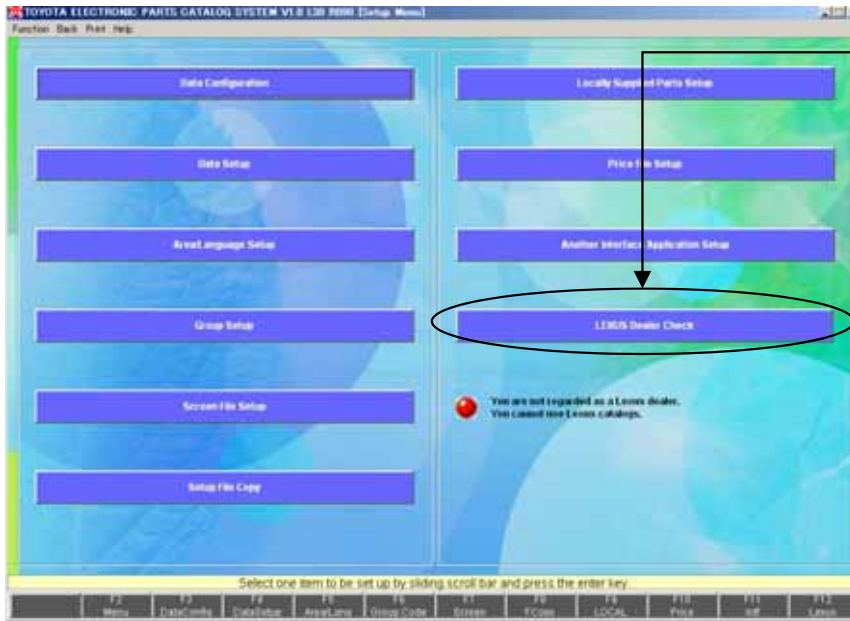

\* When you select “Local” , see (p.120) for Screen / Message box Language.

\* Select the Data Language you want to use.

\* After you select each item, click the “Exec” button.

# 3-3.Setup at Client PC-17

## 3-3-5.LEXUS Dealer Check

\* In order to use the LEXUS catalog, you need the LEXUS password.

\* In case of client, you cannot click “LEXUS Dealer Check” button.  
If it is set at the server, searching the LEXUS catalog from the client becomes possible.

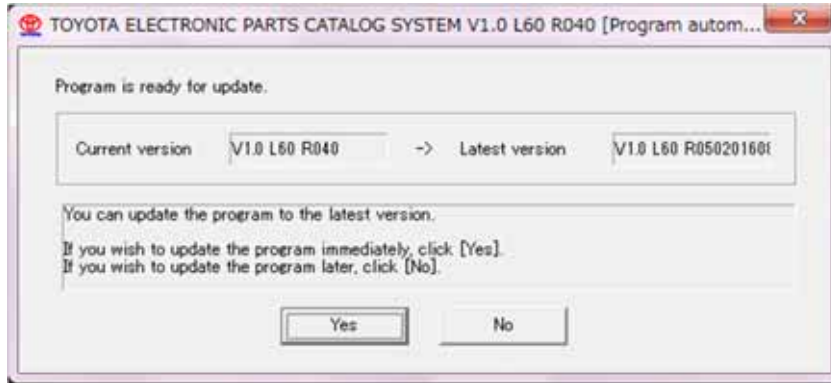

# 3-3.Setup at Client PC-18

## 3-3-6. Procedure of Program Renewal by A1DVD

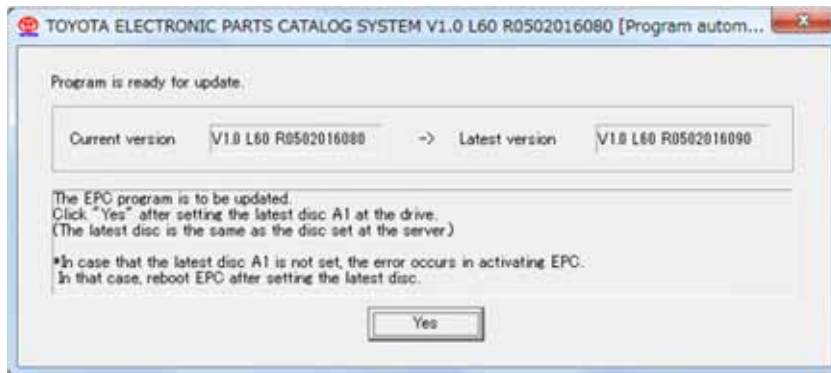

If you use EPC by server/client environment, the message like below will appear when EPC is opened in client PC after renewing the program in server PC. If you press "Yes", program will be renewed in client EPC automatically. Then you don't need to operate of program renewal in client PC any more.

**\*EPC version = before V1.0 L60 R040**

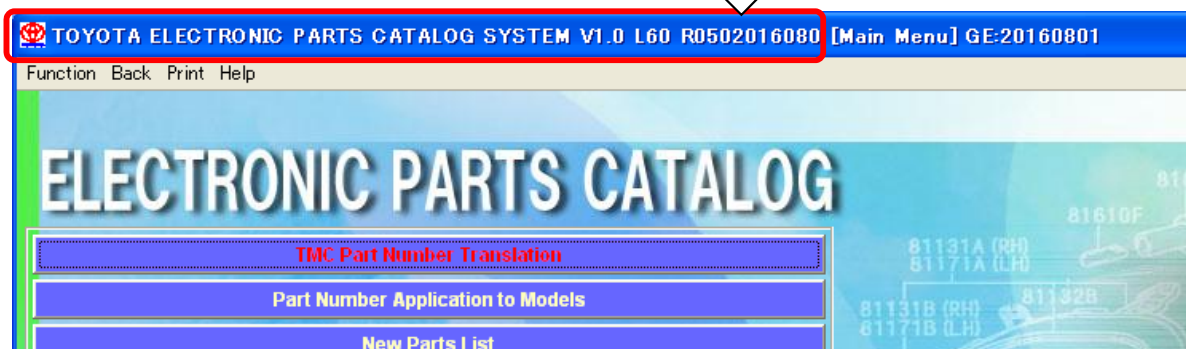

**\*EPC version = after V1.0 L60 R050yyymm0**

After EPC the Latest Program Update has been completed, please check the EPC version by starting the "TOYOTA EPC SYSTEM". When the EPC version on the "TOYOTA EPC SYSTEM" corresponds to the version which has been announced by TMC, program renewal has been implemented correctly.

Information of the EPC version

# 3-3.Setup at Client PC-19

## 3-3-7. recovery

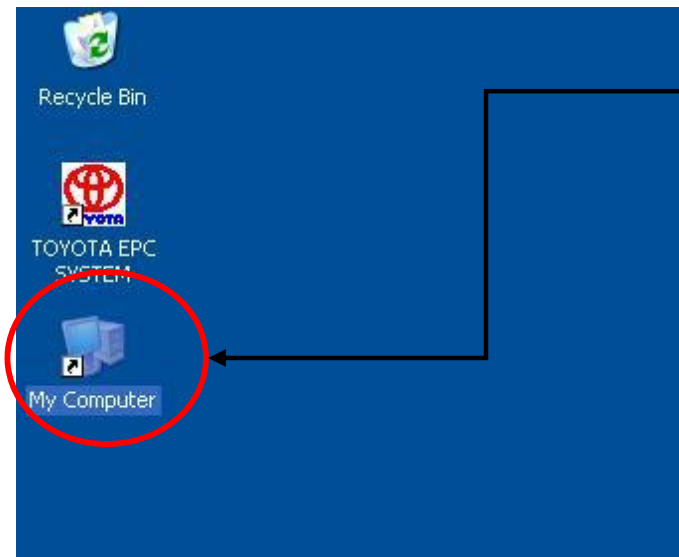

### 1. Procedure of Program Recovery

Please end "TOYOTA EPC SYSTEM"  
if it is activating to recover the program.

#### (1) Procedure of Program Recovery

##### 1. Program Recovery-1

\* Left-double-click the "My Computer"  
on the desktop

##### 2. Program Recovery-2

\*Left-double-click " the destination  
drive where EPC has been installed "

example

When the destination drive where EPC  
has been installed " is "C Drive",  
please left-double-click "C Drive"

# 3-3.Setup at Client PC-21

## 6. Program Recovery-6

\* Wait for a while.  
A message appears,  
"OK It succeeded. Press any key to continue..."  
Please press the "Enter" key.

If a message appear except "OK It succeeded. Press any key to continue...",  
you should restart the PC and  
implement program recovery again.

## 7. Program recovery has been completed

\* Program recovery has been completed. Please Left-click the "X" button.

After program recovery has been completed,  
please check the EPC version by starting "TOYOTA EPC SYSTEM".  
When program recovery has been implemented correctly ,  
the end of the version number becomes " 9 "

[example]            version before recovery : V1.0 L50 **R060**

version after recovery : V1.0 L50 **R069**

## 4. EPC Functions To Be Localized By Users

# 4-1. Price File Setup-1

## Description of the functions

The Local Price File prepared in the following way can be used by TOYOTA Electronic Parts Catalog System to display prices.

\* In case of including only one kind of price, prepare a text file named "PRICE".

On the other hand, in case of including three kinds of price, prepare a text file named "PRICE3".

See [5.File layout] for price file formats.

-The text file must be prepared either by a user program or by an edit program which allows editing in binary mode. The system considers that the Price File must not have an CR (carriage return), LF(line feed), and EOF(end of file) characters.

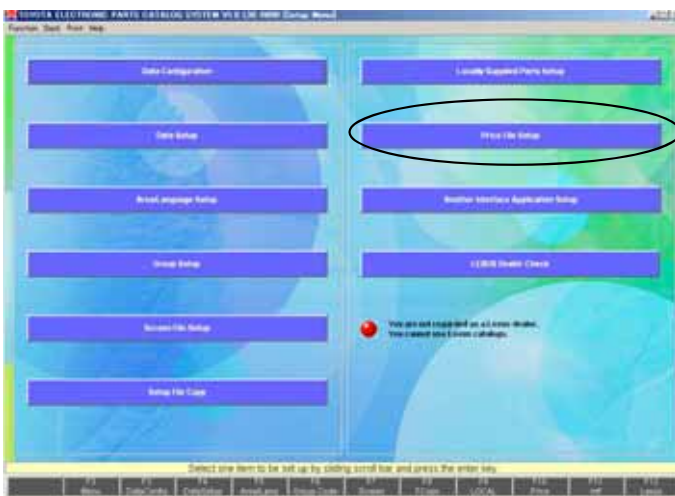

\* You can setup the Local Price File for EPC from the file prepared in diskette or HardDisk by pressing the "Refer" button and selecting the File Name. (In case of HardDisk, you can also add new data to the file or up-date necessary data in the file one by one.)

\*\* A Price File Setup needs to setup a Price File on the [Data Configuration] screen beforehand. (See the section "Data Configuration" for more information)

\* Create the price file at each Dist if necessary.

## Setup procedure

Please select "Price File Setup" of "SETUP MENU".

\* Click the "Price File Setup" button.

To setup a Price File ;

\* Select the Price File you want to setup.

- "1 Kind of Price"

=>One kind of price file

- "1 Kind of Price(CSV File)"

=>One kind of price file

- "3 Kind of Price"

=>3 kinds of price(List, Trade, Cost) file

- "3 Kind of Price(CSV File)"

=>3 kinds of price(List, Trade, Cost) file

\* Click the "Brows" button so that a dialog box will appear. Select a file you want to setup.

# 4-1. Price File Setup-2

\* After you select it, click the “Open” button.

\* Select the file you want to setup and click the “Exec” button.

When a Price File has been already setup, the following message box will appear.

\* To replace with the selected Price File, click the “Yes” button.

\*\* The Price data which has been setup will be deleted.

\* To cancel the setup, click the “No” button.

\* To setup any other Price File, click the “Yes” button.

- If you setup CSV Files, setup them in ascending order starting from “001”.  
(ex.pric3001.csv => pric3002.csv --)

- If you setup files except CSV, setup them in ascending order of Part Number. Otherwise, files will be replaced.

\* When the setup is complete, click the “No” button.

# 4-2. Locally Supplied Parts Setup-1

## Description of the functions

The Locally Supplied Parts File prepared in the following way can be used by TOYOTA Electronic Parts Catalog System to display Locally Supplied Parts as the results of Part Number Translation.

\* There are three ways to setup Locally Supplied Parts.

-In case of replacing one Japan Source Part Number with one Locally Supplied Part Number, prepare a text file named "LOCALP". It is the same format as that of EPC DOS version.

-You can also use the new format ; CSV format, which is generally supported by MICROSOFT EXCEL etc., to replace one Japan Source Part Number with one or multiple Locally Supplied Part Number. In this case, prepare a file named "LOCALP1".

-In case of adding Local Unique Part Numbers to TMC Part Name Code, prepare CSV format file named "LOCALP2".

-In case of Local Unique Illustrations and Part Numbers, prepare CSV format a file named "LOCALP3".

\* You can setup the Locally Supplied Parts for EPC from the file prepared in diskette or HardDisk by pressing the "Brows" button and selecting a file name. In case of HardDisk, you can also add new data to the file or up-date necessary data in the file one by one.

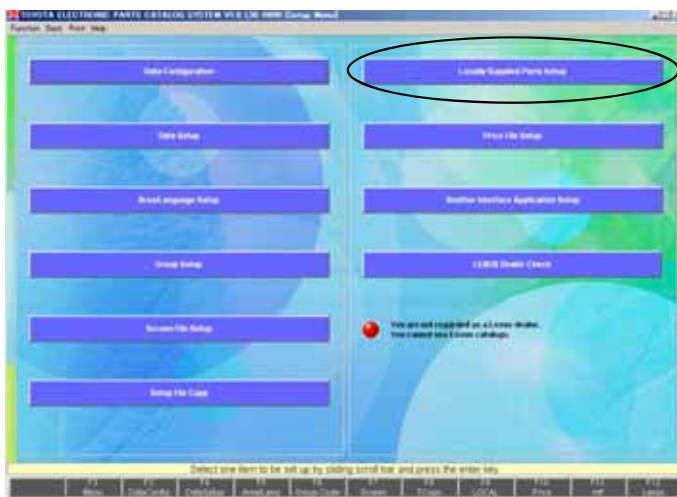

\*\* A Locally Supplied Parts File Setup needs to setup a Local File on the [Data Configuration] screen beforehand. ( See the section "Data Configuration" for more information )

\*\* See [5.File layout] for the file format.

\* Create the Locally Supplied Parts at each Dist if necessary.

## Setup procedure

Please select "Locally Supplied Parts Setup" of "SETUP MENU".

\* Click the "Locally Supplied Parts Setup" button.

\* Select a type of Locally Supplied Parts File you want to setup.

- "TMC Part Number" (LOCALP)  
=>TMC Part Number : Local Part Number = 1 : 1
- "TMC Part Number(CSV)" (LOCALP1)  
=>TMC Part Number : Local Part Number = 1 : N
- "TMC Part Name Code(CSV)" (LOCALP2)  
=>(Catalog Code + PNC of TMC) :  
Local Part Number = 1 : N
- "Local Figure(CSV)" (LOCALP3)  
=> (Catalog Code + Local FigNo) :  
Local Part Number = 1 : N

To setup a Locally Supplied Parts File ;

\* Click the "Brows" button so that a dialog box will appear. Select the file you want to setup.

## 4-2. Locally Supplied Parts Setup-2

\* After you select it, click the “Open” button.

\* Select the file you want to setup and click the “Exec” button.

When a Locally Supplied Parts File has been already setup, the following message box will appear.

\* To add the data to the setup Locally Supplied Parts File, click the “Yes” button.

\* To cancel the setup, click the “Cancel” button.

\* To replace with a new Locally Supplied Parts File, click the “No” button.

\* To setup any other Locally Supplied Parts File, click the “Yes” button.

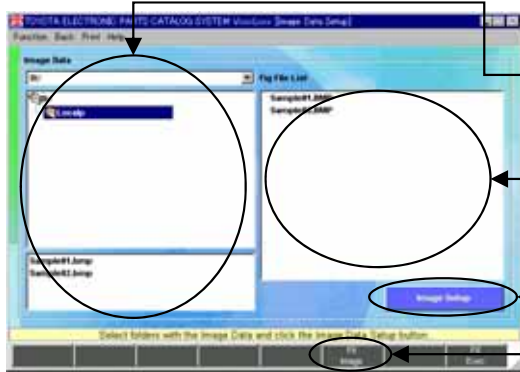

\* Otherwise, click the “No” button.

\*\* If you setup the “Local Figure(CSV)”, you are prompted to setup an Image File.

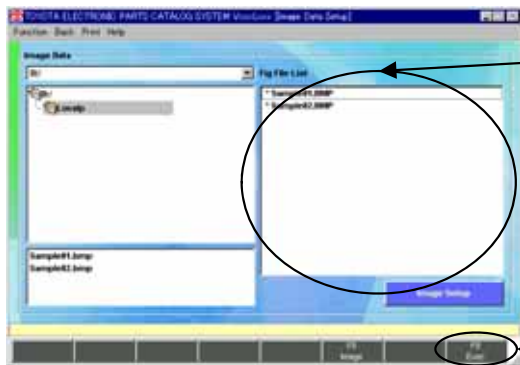

## 4-2. Locally Supplied Parts Setup-3

To setup an Image File ;

- \* Select a path for the Locally Supplied Parts Image File to be related to the setup Local Figure(CSV).
- The Image Files contained in the selected folder will be listed up below.
- \* The Locally Supplied Parts Image File on the setup Local Figure(CSV) will appear.
- \* To setup the Locally Supplied Parts Image File, click the "Image Setup" or "Image" button.

- \* "\*" will be displayed on the left of the setup Locally Supplied Parts Image File.
- \*\* "\*" will be displayed on the same Locally Supplied Parts Image Files which are displayed on the lower left.
- \* When the setup is complete, click the "Exec" button.

# 4-3. Starting EPC System from Another Application-1

## Description of the functions

If you activate the EPC System from another system with the condition under which the linked files are placed in the specified folder, you can search the contents of the linked files at the EPC System side, and display the search result to the screen.

The screens of the EPC System side that can be displayed during the linkage are as follows:

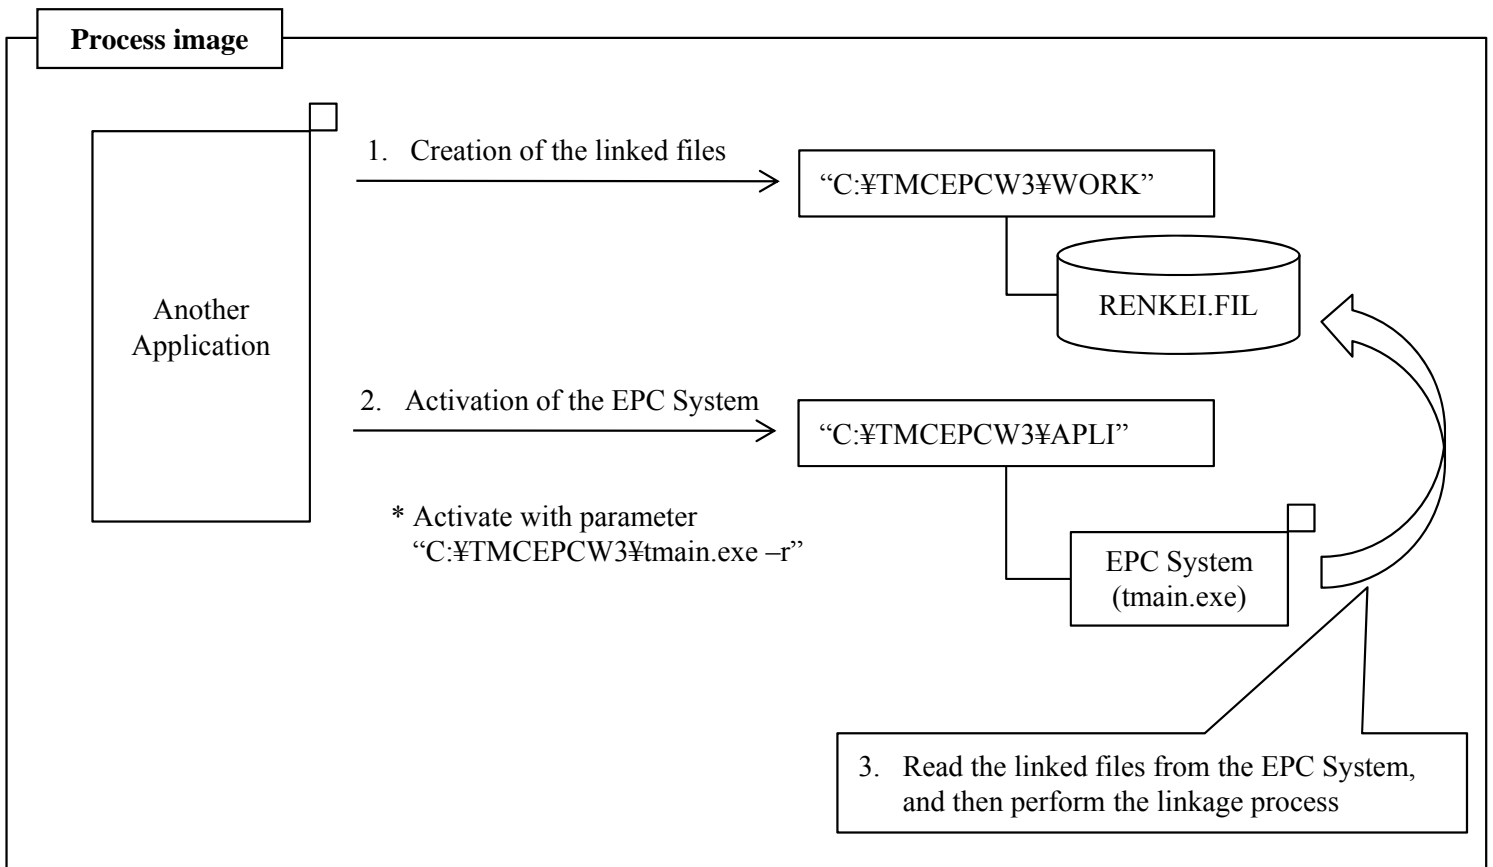

1. [Main Menu]
2. [Vehicle Input]
3. [Parts Number Translation Results]

## Setup procedure

The way of using EPC System from Another Application:

1. You must make the “RENKEI.FIL” located on “C:¥TMCEPCW3¥WORK” directory as detailed in the table above.
2. Click on Windows Start Menu /Run and input the following command : “C:¥TMCEPCW3¥tmain.exe -r”.  
(EX. In case you setup the EPC System on “C”-drive.)

\*RENKEI.FIL is deleted every time the program is run.

\* For layout of the linked files (RENKEI.FIL), see the next page.

## 4-3. Starting EPC System from Another Application-2

### Configuration File layout used when starting the EPC System from Another Application :

File Name: "RENKEI.FIL"( Text file format)

No	Starting column	Length	Content	Note
1	0	1	First Screen Number	1: displaying the "Vehicle Input". 2: displaying the "Main Menu". 3: displaying the "Parts Number Translation Results".
2	1	17	VIN/VDS	
3	18	20	Model	
4	38	7	Serial Number	Frame Numbers
5	45	6	Production Date	YYYYMM
6	51	3	Color Code	
7	54	4	Trim Code	
8	58	6	PNC	
9	64	2	Quantity	
10   N	66		Repetition of field No.8-9	

#### NOTE:

-Text file must not have CR( carriage return), LF( line feed), and EOF( end of file) characters.

# 4-4. Another Interface Application Setup-1

## Description of the functions

The Vehicle Information and Part Number Information that have been searched for on the EPC System can be used by other systems. Another Interface Application Setup has the following 3 types.

- Saving the Vehicle Information and Part Number Information in a file, and starting-up an application.
- Saving the Vehicle Information and Part Number Information in a file (not starting-up an application)
- Starting-up an application only (not interfacing the Vehicle Information and Part Number Information)

## Setup procedure

Please select “Another Interface Application Setup” of “SETUP MENU”.

**To save the Vehicle Information and Part Number Information in a file, and start-up an application ;**

For example(Sample1) :

Another Application	: C:\¥TOYOTA¥INTF.exe
Save File	: C:\¥TOYOTA¥INTF¥INTF.txt (File Type is “Fixed Len”)
To save the Vehicle Information	: Catalog Code (Item Length = 6) ModelName ( Item Length = 20)
To save the Part Number Information	: PNC ( Item Length = 6) PartNumber (Item Length = 15) *changing the Item Length.

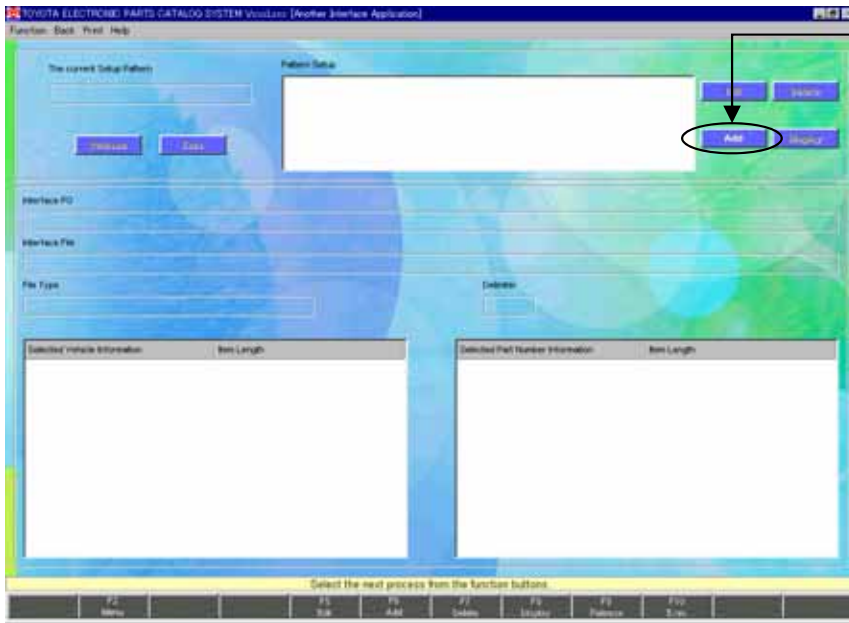

\* Click the “Another Interface Application Setup” button.

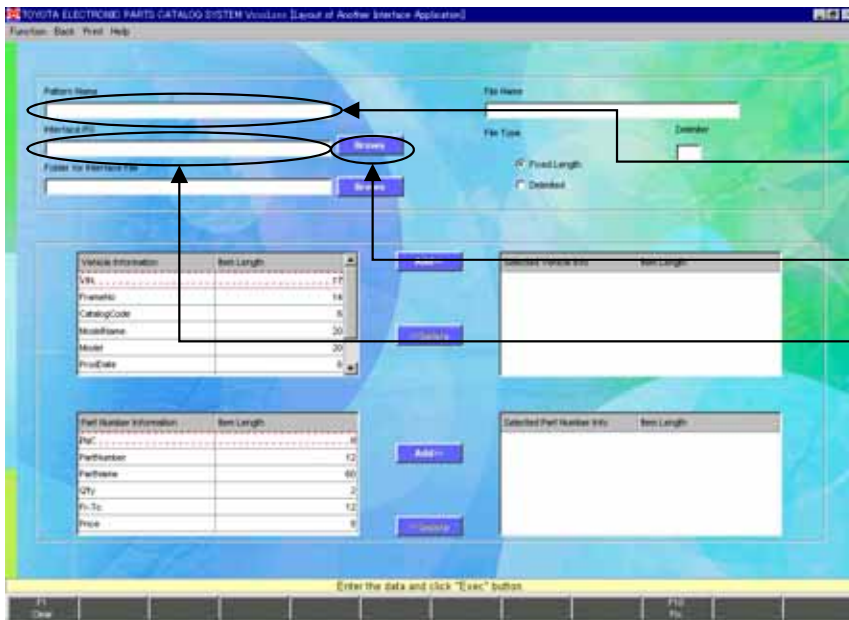

# 4-4. Another Interface Application Setup-2

\* Click the "Add" button.

- When Another Interface Application has been already setup, the contents are displayed on the screen.

\* [Layout of Another Interface Application] screen will appear.

\* Enter the Pattern Name you want to setup here.

\* To setup an application to be started-up, click the "Brows" button.

- You can enter it directly.  
Be sure to enter a Drive Name first.

EX.) If you start-up ”  
C:¥TOYOTA¥INTF.exe”,

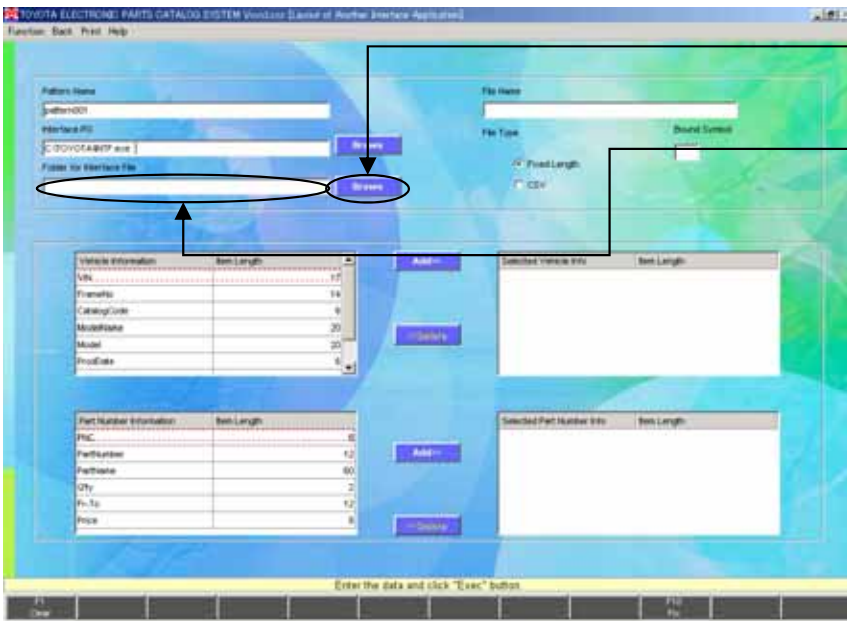

C:¥TOYOTA¥INTF.exe

# 4-4. Another Interface Application Setup-3

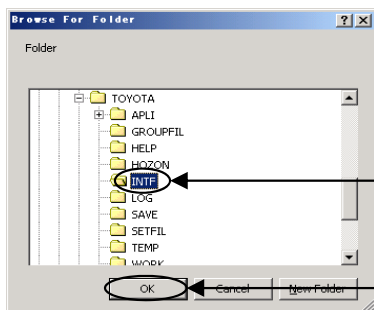

- \* Select an application to be started-up.
  - Without clicking the “Brows” button, this screen won’t appear.
- \* After you selected the application, click the “Open” button.

- \* To setup a folder where a file is created, click the “Brows” button.
  - You can enter it directly.
  - Be sure to enter a Drive Name first.
- EX.) If you create ”  
C:¥TOYOTA¥INTF¥INTF.txt”,

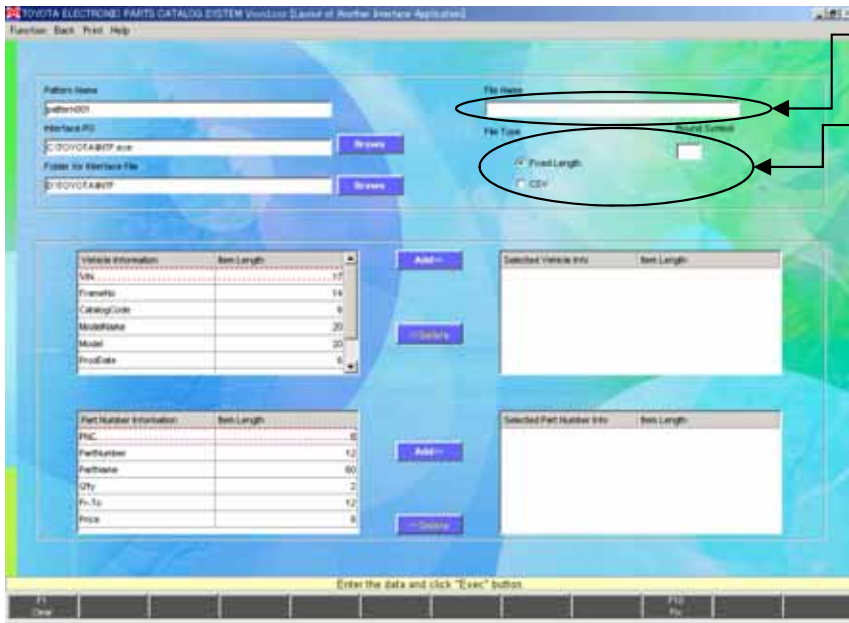

C:¥TOYOTA¥INTF

- \* Select the place where you want to save.
  - Without clicking the “Brows” button, this screen won’t appear.
- \* After you select it, click the “OK” button.

# 4-4. Another Interface Application Setup-4

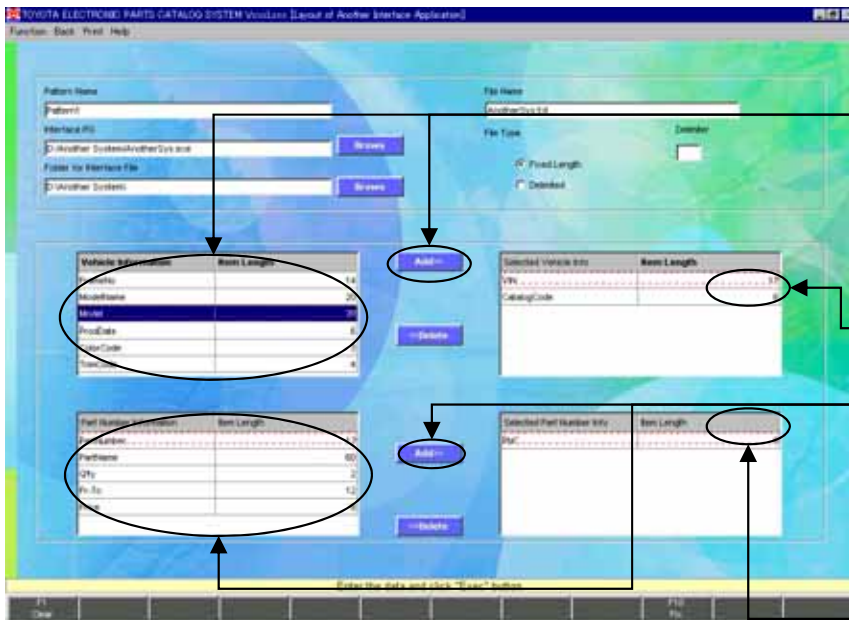

\* Enter a File Name to be saved.

\* Select a File Type to be saved.

\*\* When you selected Delimited, enter a Delimiter.

EX.) If you save the information for  
 "C:\¥TOYOTA¥INTF¥INTF.txt",  
 you input the Filename as "INTF.txt".

\* Setup a File Layout to be saved.

\* Select the Vehicle Information to be saved from the list on the left screen, and click the "Add" button.

- The selected item will be added to the list on the right screen.

- The data will be output in order of the item selected.

- You can change the Item Length.

\* Select the Part Number Information to be saved from the list on the left screen, and click the "Add" button.

- The selected item will be added to the list on the right screen.

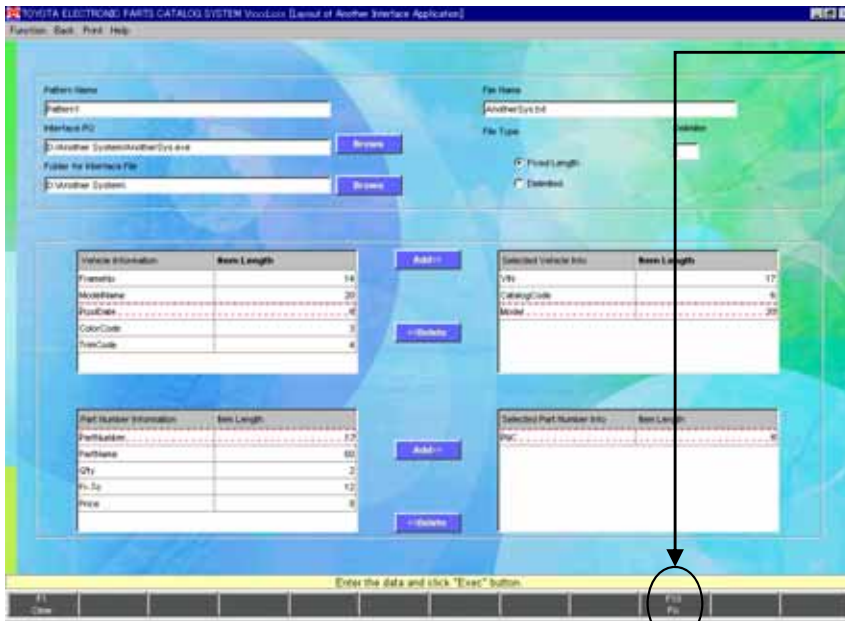

- The data will be output in order of the item selected.

- You can change the Item Length.

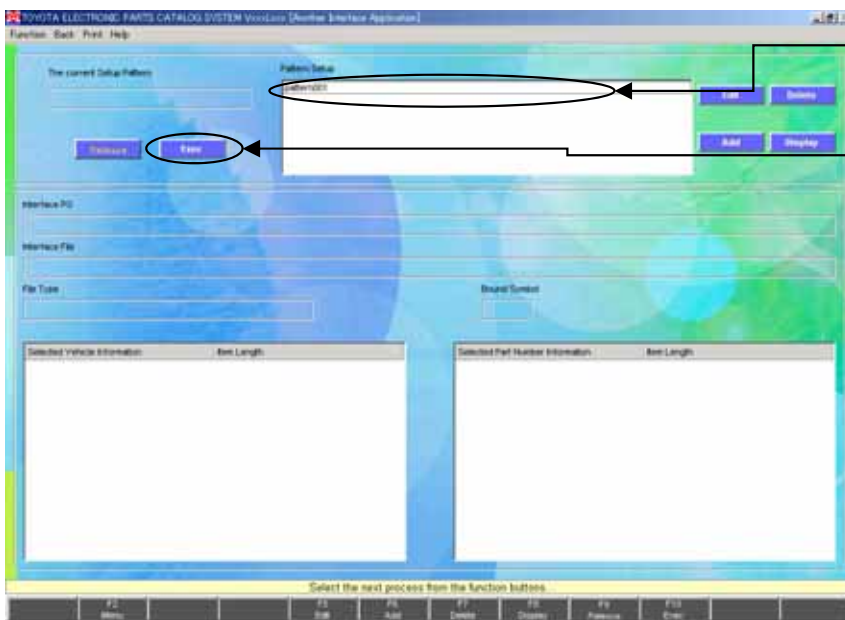

\*\* "Sample1" File Layout is on (p.101)

# 4-4. Another Interface Application Setup-5

\* After the layout is complete, click the "Fix" button.

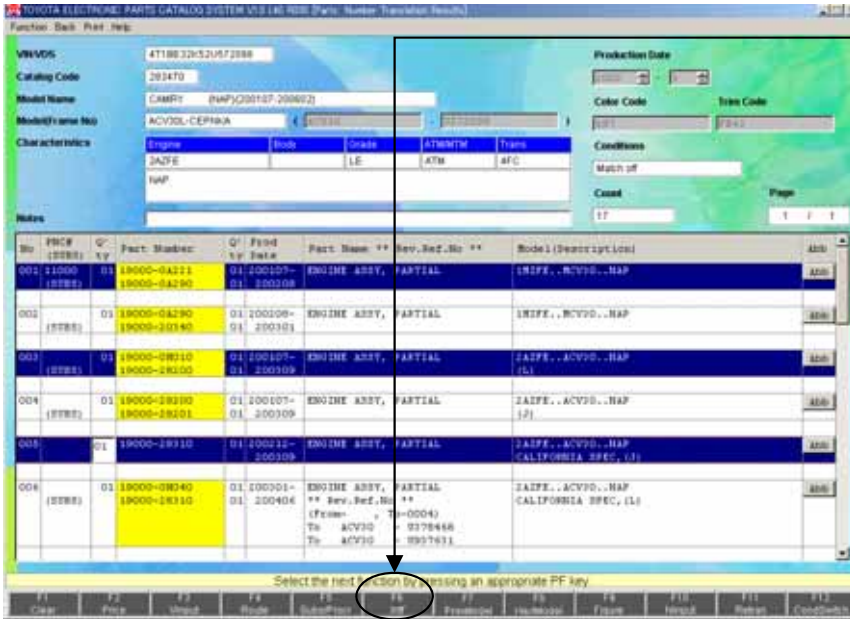

\* The setup Pattern Name will appear.

\* Select the Pattern and click the "Exec" button to end the setup and go back to the [Main Menu] screen.

**Now the setup is complete.**

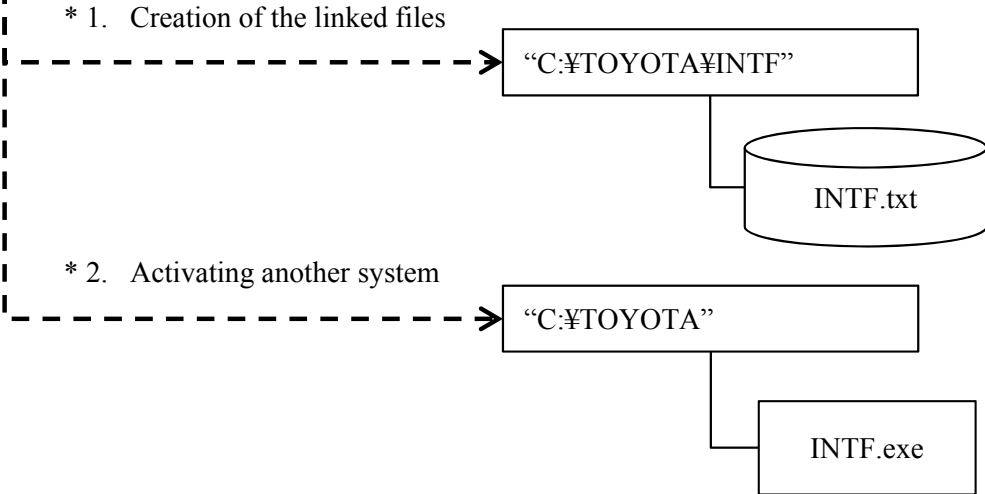

# 4-4. Another Interface Application Setup-6

\* If the [F6 Intf] button is actually pressed in “Parts Number Translation Results”

\* Click the “Intf” button.

- \* 1. The information selected in “Parts Number Translation Results” will be saved to “INTF.txt”.
- \* 2. Activate “INTF.exe”.

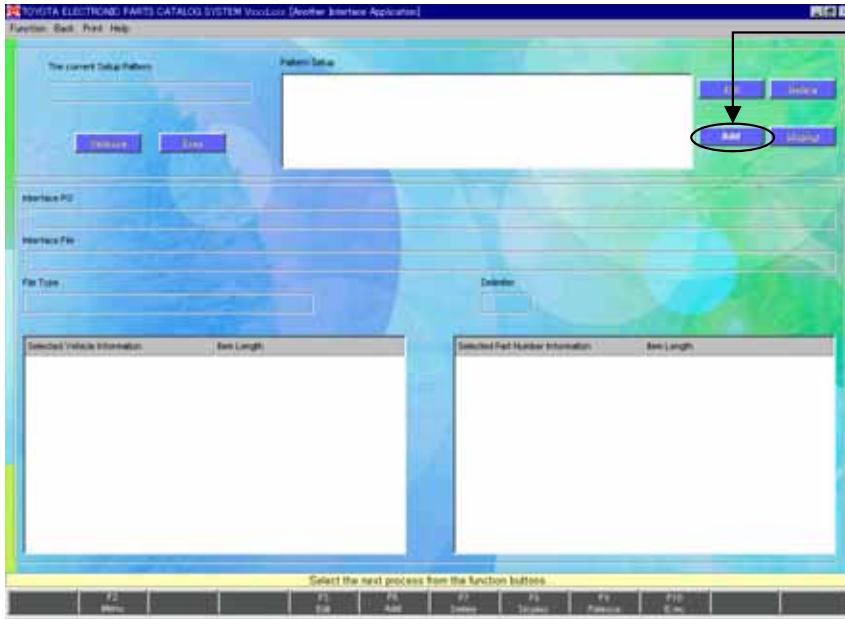

# 4-4. Another Interface Application Setup-7

## To save the Vehicle Information and Part Number Information ;

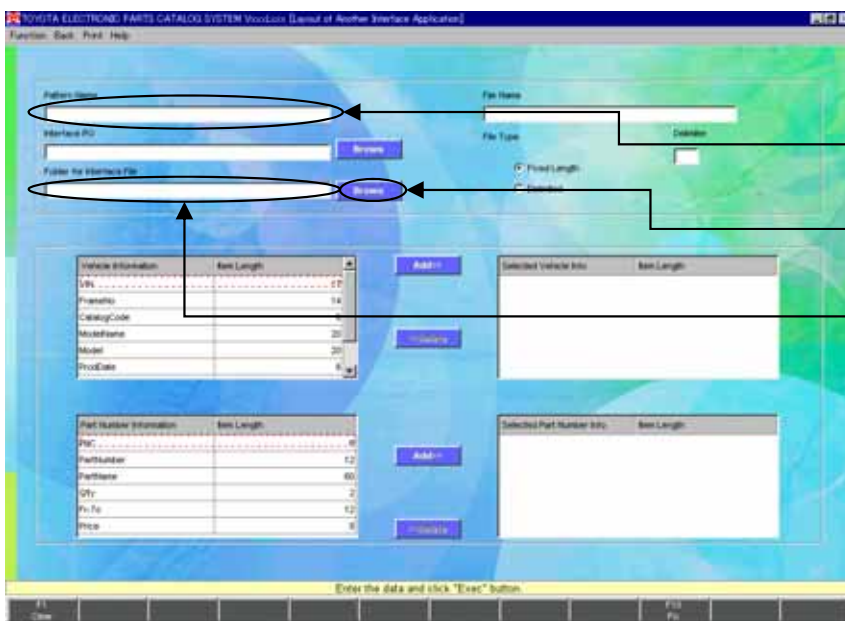

For example(Sample2):

- Save File : C:¥TOYOTA¥INTF¥INTF.CSV (File Type is “Delimited”)
- To save the Vehicle Information : VIN (Item Length = 17)  
Catalog Code (Item Length = 6)
- To save the Part Number Information : PNC ( Item Length = 6)  
PartNumber (Item Length = 12)

\* Click the “Add” button.

- When Another Interface Application has been already setup, the contents are displayed on the screen.

\* [Layout of Another Interface Application] screen will appear.

\* Enter the Pattern Name you want to setup here.

\* To setup a folder where a file is created, click the “Brows” button.

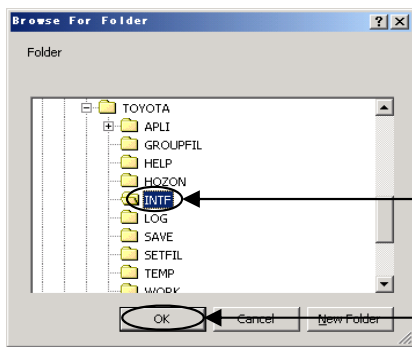

- You can enter it directly.  
Be sure to enter a Drive Name first.

EX.) If you create ”  
C:¥TOYOTA¥INTF¥INTF.CSV”,

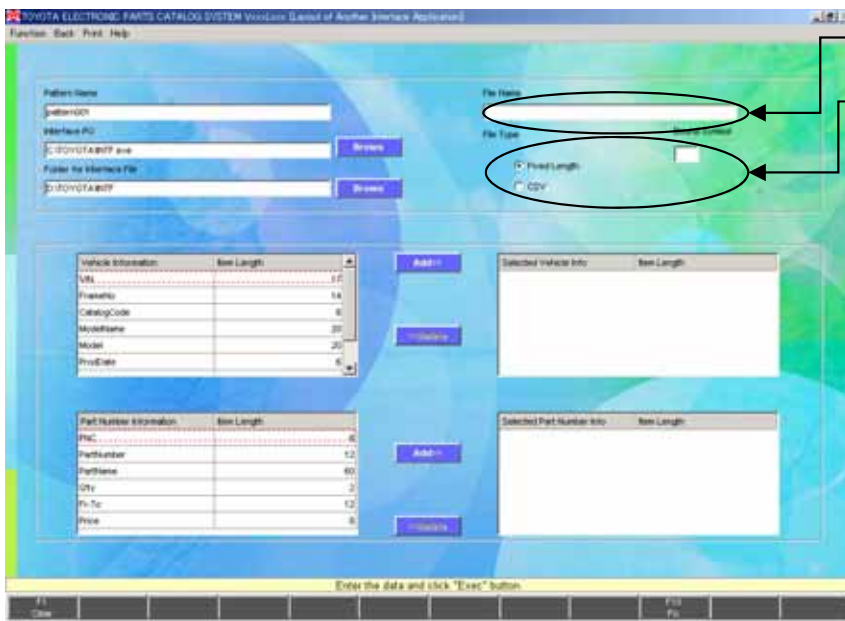

C:¥TOYOTA¥INTF

# 4-4. Another Interface Application Setup-8

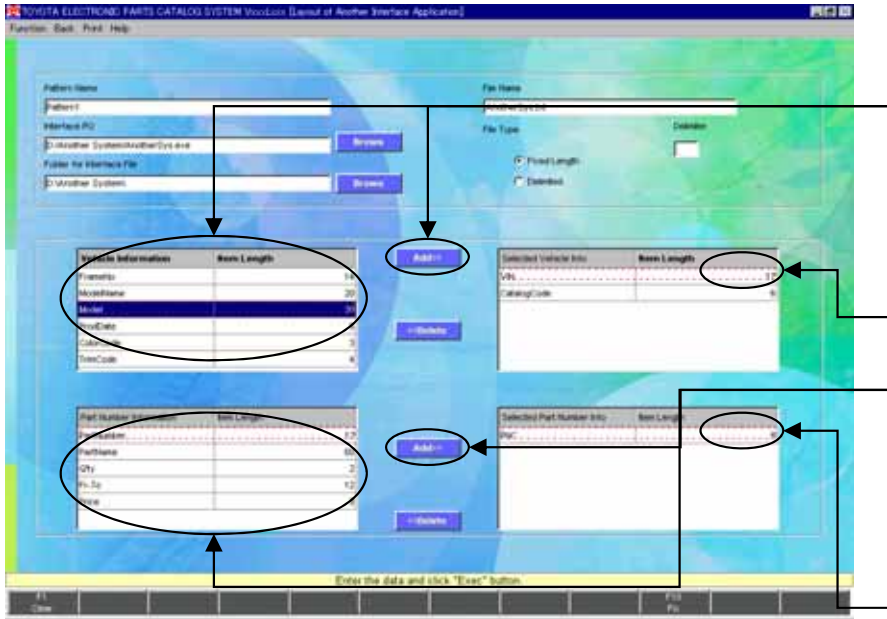

- \* Select the place where you want to save.
- To setup an application to be started-up, click the “Brows” button.
- \* After you select it, click the “OK” button.

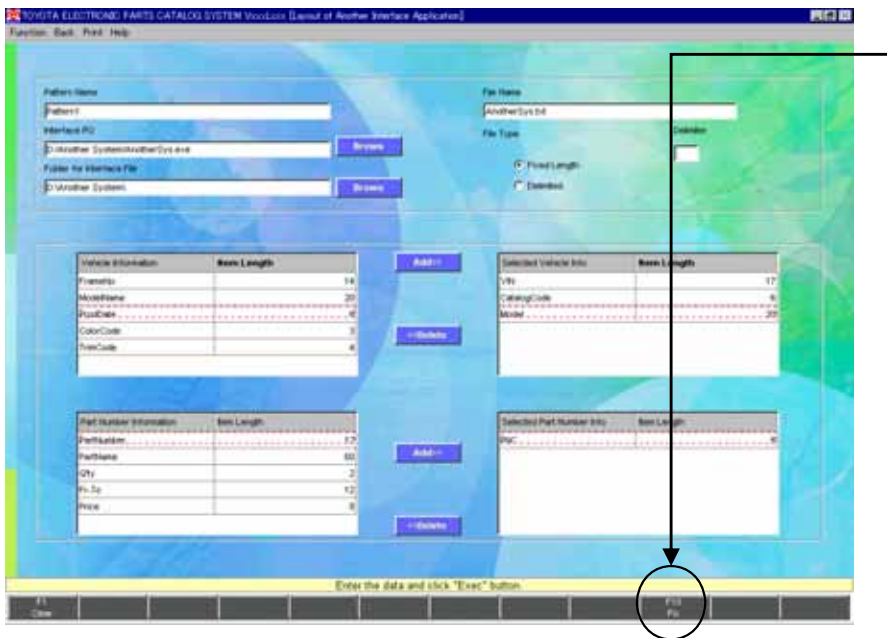

- \* Enter a File Name to be saved.
- \* Select a File Type to be saved.
- \*\* When you selected Delimited, enter a Delimiter.
- EX.) If you save the information for “C:¥TOYOTA¥INTF¥INTF.CSV”, you input the Filename as “INTF.CSV”.

# 4-4. Another Interface Application Setup-9

- \* Setup a File Layout to be saved.
- \* Select the Vehicle Information to be saved from the list on the left screen, and click the “Add” button.
  - The selected item will be added to the list on the right screen.
  - The data will be output in order of the item selected.
  - You can change the Item Length.
- \* Select the Part Number Information to be saved from the list on the left screen, and click the “Add” button.
  - The selected item will be added to the list on the right screen.
  - The data will be output in order of the item selected.
  - You can change the Item Length.
- \*\* “Sample2” File Layout is on (p.107).

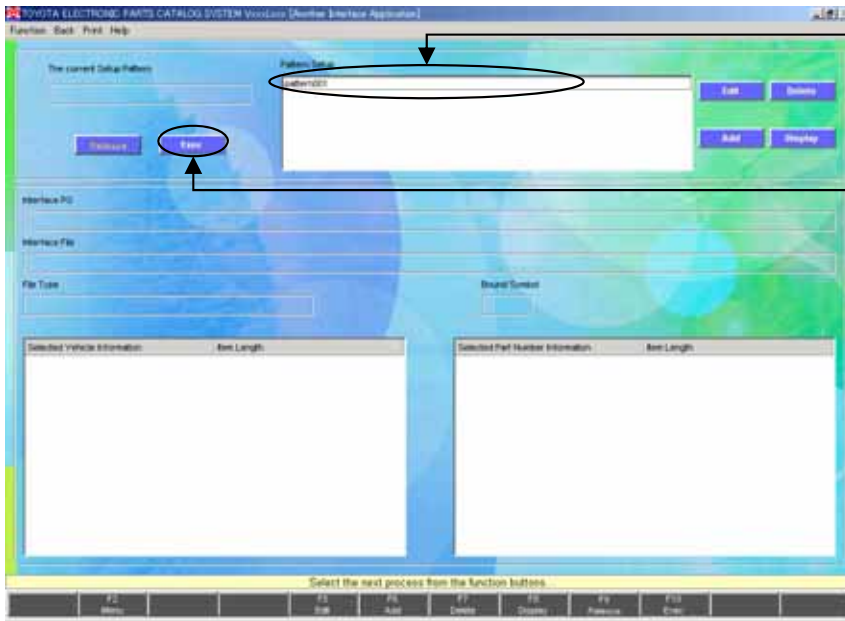

- \* After the layout is complete, click the “Fix” button.

# 4-4. Another Interface Application Setup-10

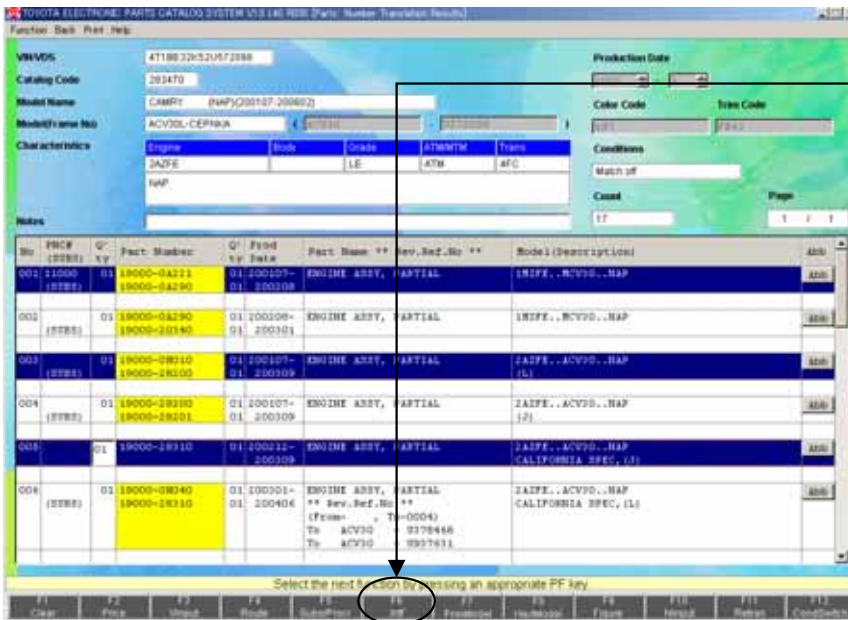

\* The setup Pattern Name will appear.

\* Select the Pattern and click the "Exec" button to end the setup and go back to the [Main Menu] screen.

**Now the setup is complete.**

\* If the [F6 Intf] button is actually pressed in "Parts Number Translation Results"

\* Click the "Intf" button.

\* 1. The information selected in "Parts Number Translation Results" will be saved to "INTF.CSV".

\* 1. Creation of the linked files

"C:\¥TOYOTA¥INTF"

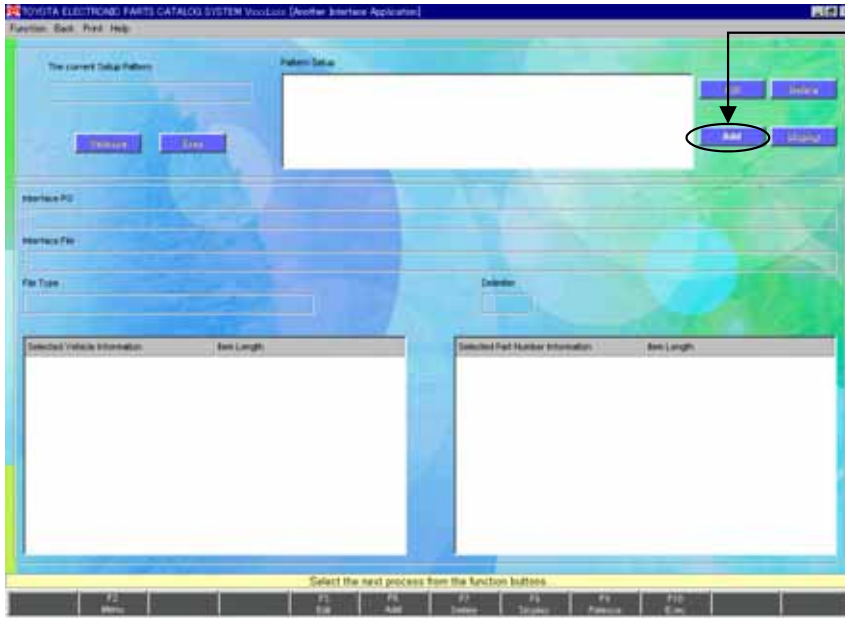

# 4-4. Another Interface Application Setup-11

To start-up an application only ;

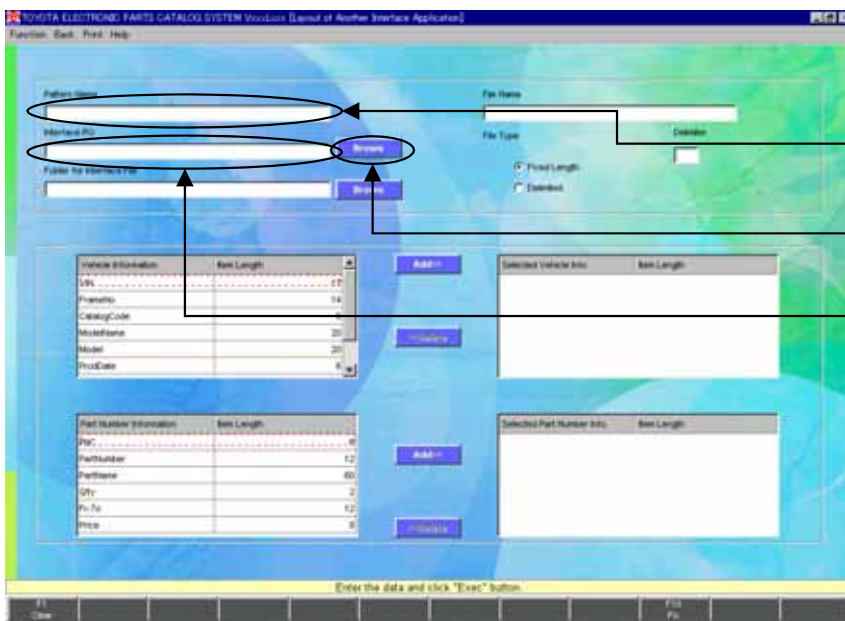

For example:

Another Application : C:\¥TOYOTA¥INTF.exe

\* Click the “Add” button.

- When Another Interface Application has been already setup, the contents are displayed on the screen.

\* [Layout of Another Interface Application] screen will appear.

\* Enter the Pattern Name you want to setup here.

\* To setup an application to be started-up, click the “Brows” button.

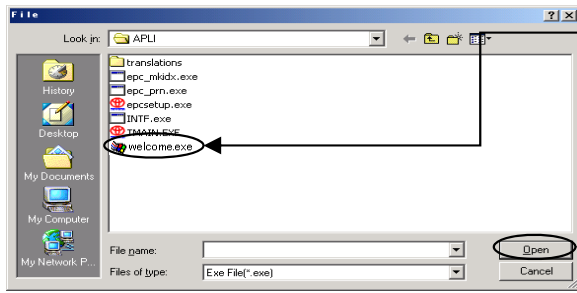

- You can enter it directly.  
Be sure to enter a Drive Name first.

EX.) If you start-up  
“C:\¥TOYOTA¥INTF.exe”,

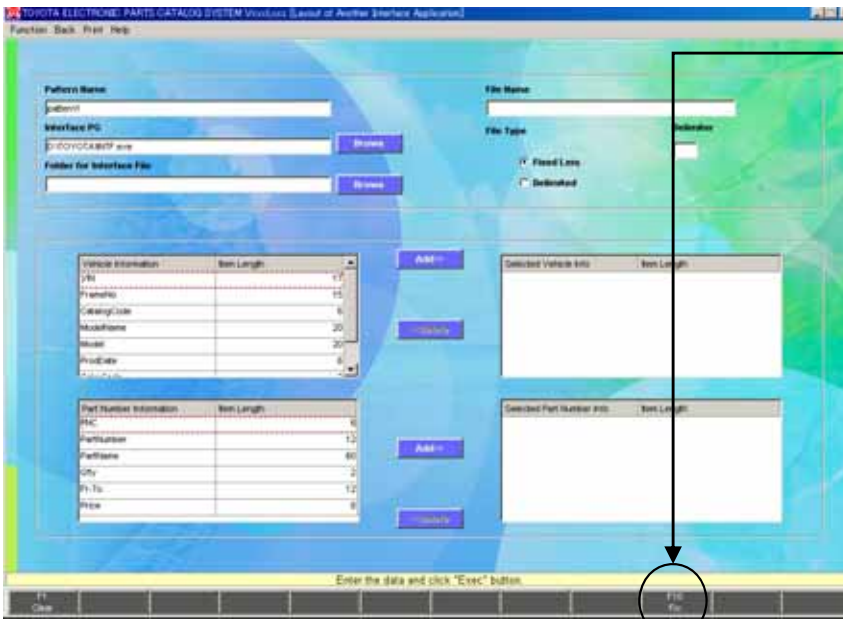

C:\¥TOYOTA¥INTF.exe

# 4-4. Another Interface Application Setup-12

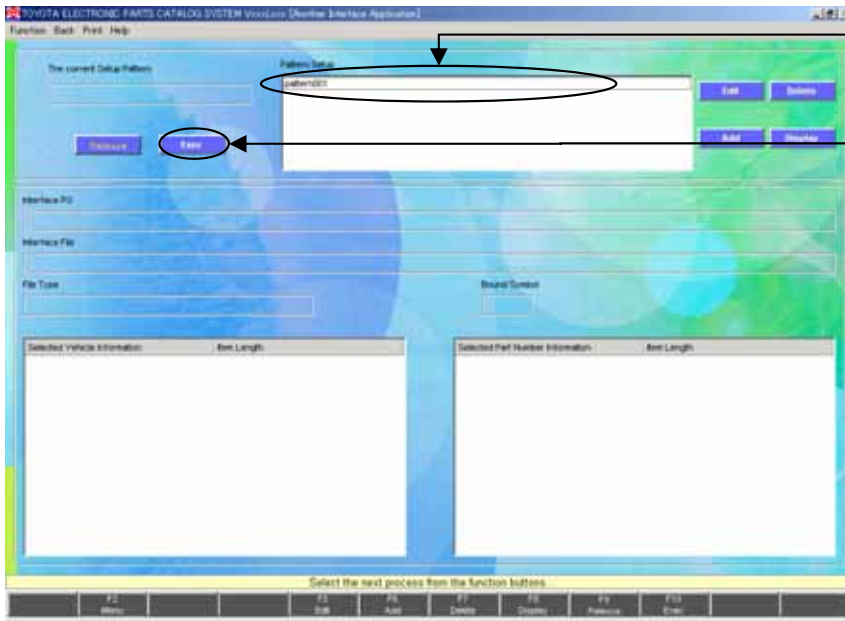

- \* Select an application to be started-up.
  - Without clicking the “Brows” button, this screen won’t appear.
- \* After you selected the application, click the “Open” button.

- \* After the layout is complete, click the “Fix” button.

# 4-4. Another Interface Application Setup-13

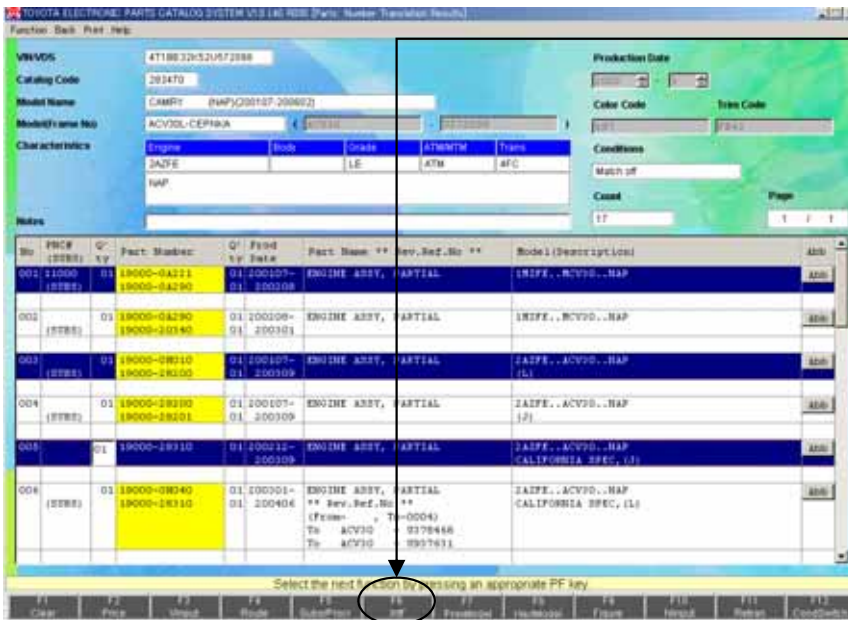

\* The setup Pattern Name will appear.

\* Select the Pattern and click the "Exec" button to end the setup and go back to the [Main Menu] screen.

**Now the setup is complete.**

\* If the [F6 Intf] button is actually pressed in "Parts Number Translation Results"

\* Click the "Intf" button.

\* 1. Activate "INTF.exe".

\* 1. Activating another system

"C:\¥TOYOTA"

# 4-4. Another Interface Application Setup-14

---

## Another Interface Save File :

Sample1: INTF.txt

File Format: (fixed text format)

No	Starting column	Length	Content	Note
1	0	6	Catalog Code	
2	6	20	Model Name	
3	26	6	PNC	
4	32	15	PartNumber	Length is changed.(default = 12)
5   N	47		Repetition of field No.3-4	

Sample2: INTF.CSV

File Format: (CSV format)

No	Length	Content	Note
1	17	VIN	
2	6	Catalog Code	
3	6	PNC	
4	12	PartNumber	
5   N		Repetition of field No.3-4	

# 4-5. Group Setup-1

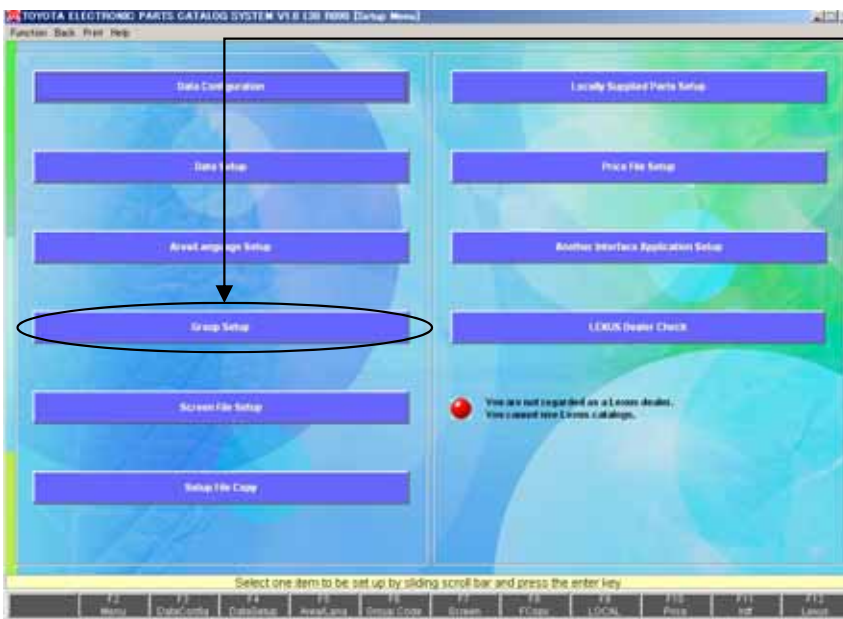

## Description of the functions

Catalog Codes and Part Name Codes which are often searched can be registered all together. This setup enables you to search the data by Group Code. If you don't register a Catalog Code, the Group becomes effective for all Catalog Codes you may input in the "Vehicle Input" screen. In case the Catalog Code list is not left blank, the Group becomes effective when the Catalog Code is input in the "Vehicle Input" screen.

- When performing the operation of the client/server, the group code data will be saved at the server side.

## Setup procedure

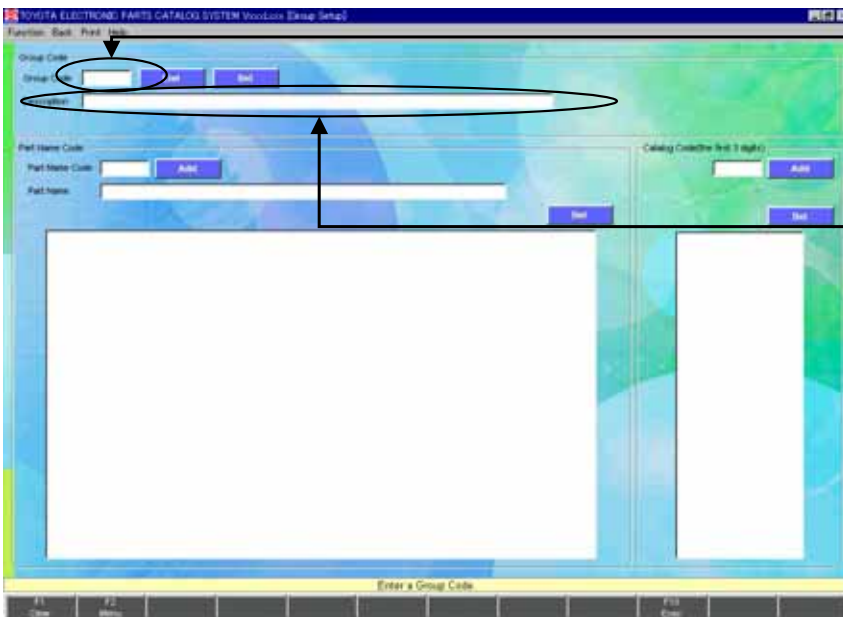

Please select "Group Setup" of "SETUP MENU".

\* Click the "Group Setup" button.

- If one terminal is setting up the group code while performing the operation of the client/server, the following message will be displayed:

It is not possible to use it because it is operating it with another client. Please wait until the group setup is complete.

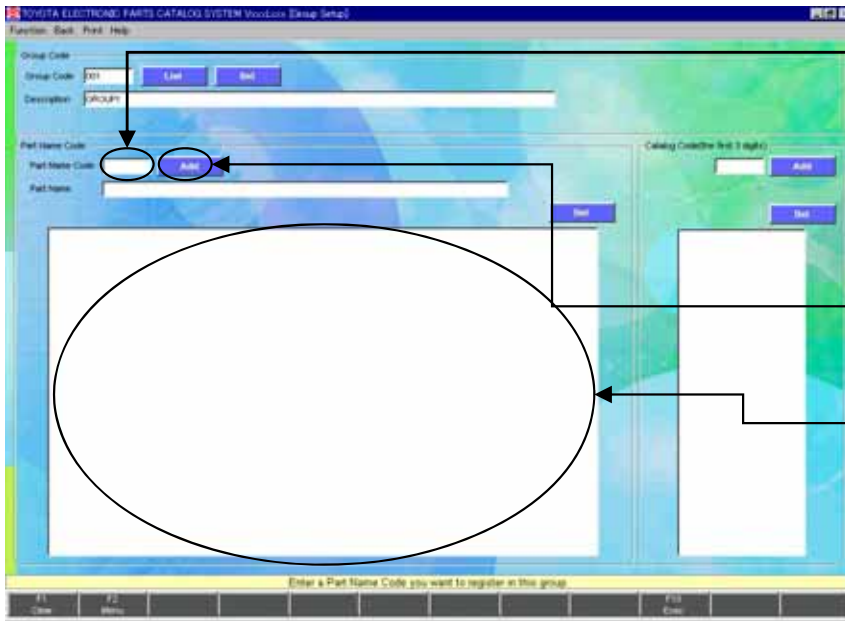

\* Enter the Group Code you want to create.

- Group Code should be 3-digit.
- When the input Group Code is already registered, the details will appear.

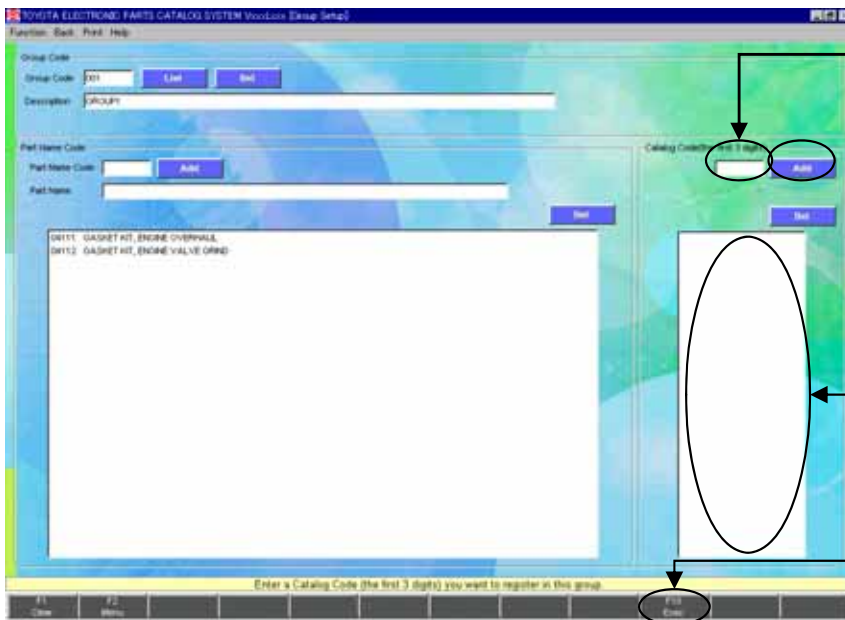

\* Enter a Group Name after you enter the Group Code, and press the "Enter" key.

# 4-5. Group Setup-2

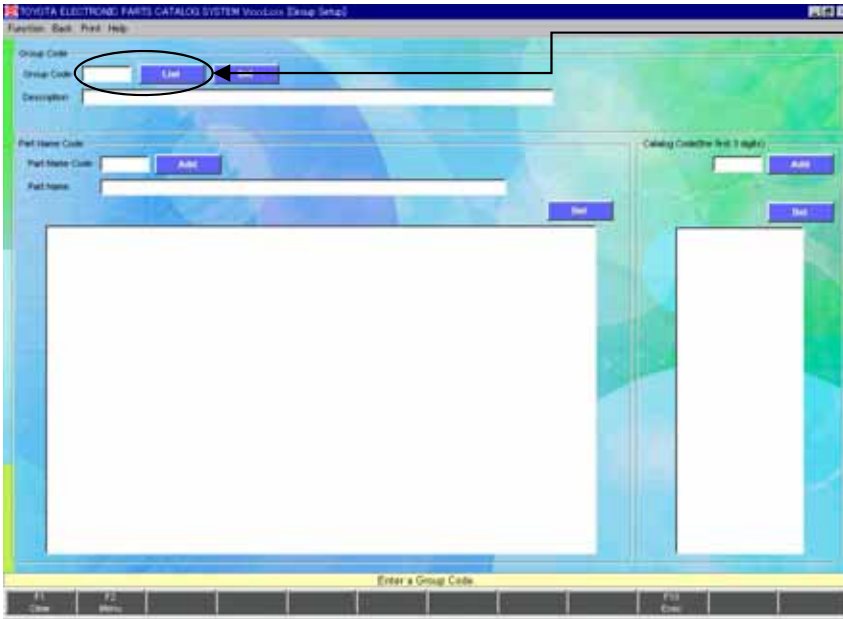

- \* Type a Part Name Code, and press the “Enter” button.
  - If you enter a 5 or 6-digit Part Name Code, the Part Name will appear automatically.
  - Part Name Code : Enter \* after at least 3 letters input of Part Name Code.
- \* After the Part Name Code is entered, click the “Add” button.
  - Both Part Name Code and Part Name will appear in the list.
  - If you have multiple Part Name Codes to be registered repeat the same operation.

- \* Enter the first 3-digit Catalog Code and click the “Add” button.
  - The input data will appear.
  - If you have multiple Catalog Codes to be registered, repeat the same operation.
  - You can skip this input.
- \* After all setups are completed, click the “Exec” button.

# 4-5. Group Setup-3

To change the contents of a registered Group ;

- \* Click the "List" button.
- If you know the Group Code you want to change, enter it directly.

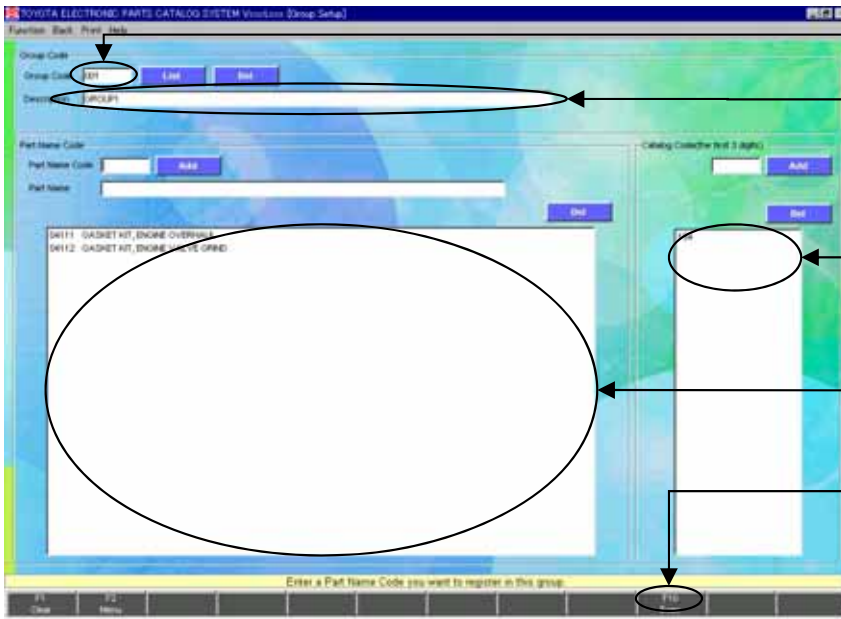

- \* The list of the registered Groups will appear. Select the Group you want to change, and click the "Exec" button or press the "Enter" key.
- If you enter a Group Code directly, this screen won't appear.

# 4-5. Group Setup-4

\* The contents of the selected Group will appear ;

\* Group Code

\* Group Name

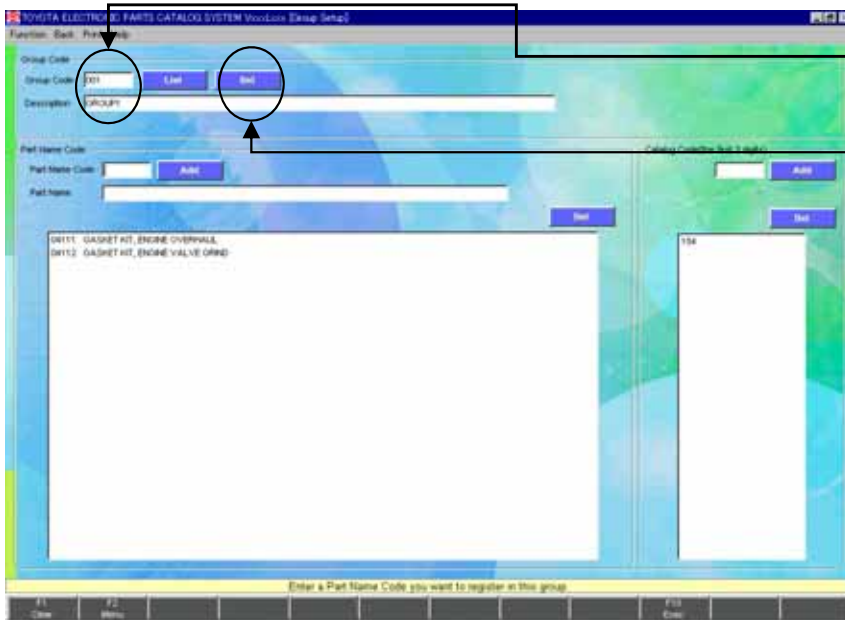

\* Catalog Code (the first 3-digit)

\* Part Name Code (Part Name)

\* Modify the data if needed, and click the "Exec" button.

- The Group Information will be updated with the displayed contents.

## To delete a registered Group ;

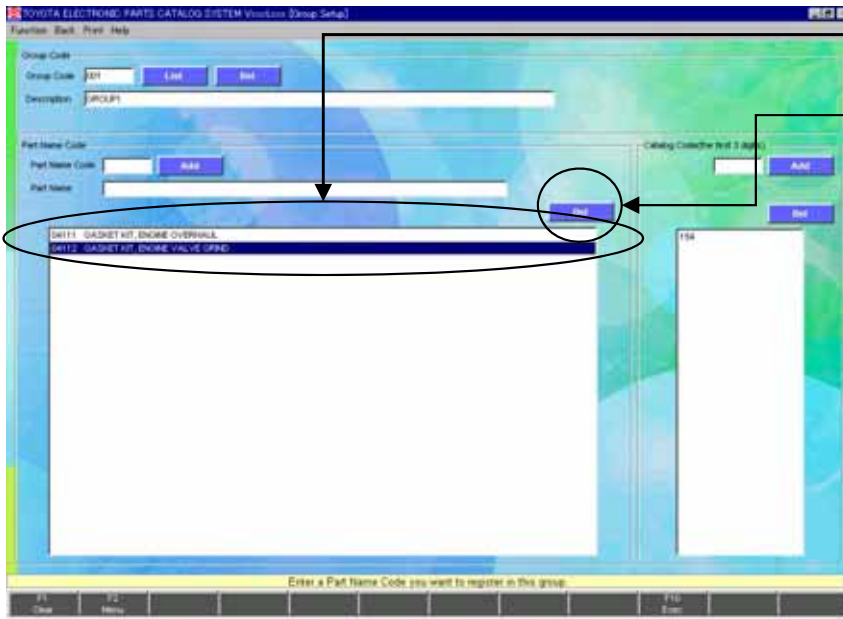

\* Check that the Group Code you want to delete is displayed.

\* Click the "Del" button to delete the displayed Group Code Data.

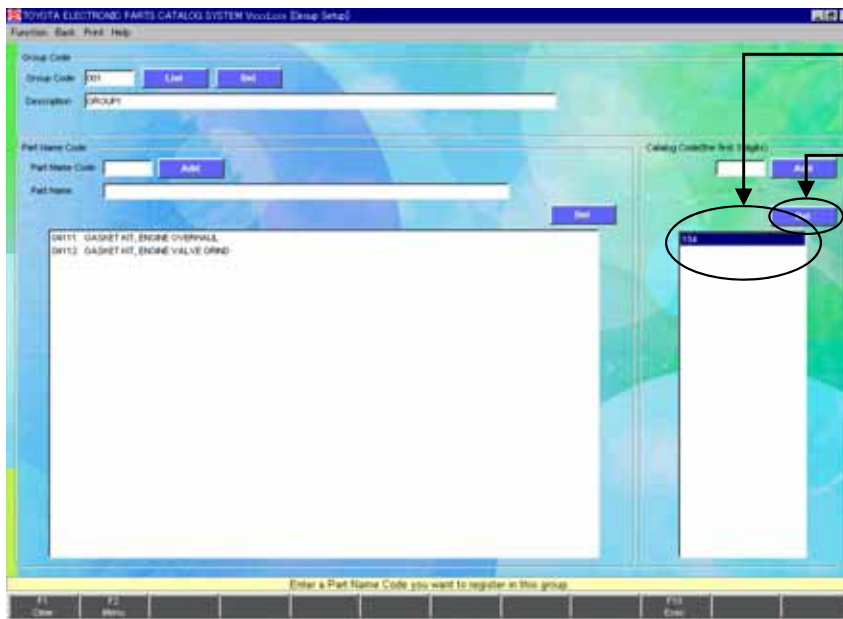

# 4-5. Group Setup-5

## To delete a Part Name Code from a Group ;

- \* Select the Part Name Code you want to delete.
- \* Click the “Del” button to delete the selected Part Name Code from the Group.

## To delete a Catalog Code (the first 3-digit) from a Group ;

- \* Select the Catalog Code (the first 3-digit) you want to delete.
- \* Click the “Del” button to delete the selected Catalog Code (the first 3-digit) from the Group.

## Reference

### System Limits (Group Setup);

Please consider the following system limits in Group Setup.

Limit is set on ;	Limit
Part Name Codes inputted on Group Setup	100
Catalog Codes inputted on Group Setup	50
Group Codes	999

# 4-6. Screen / Message box Language-1

## Description of the functions

Changing screen display items (screen items, buttons, etc.)

The EPC screen titles and messages are provided in English, Japanese, French, German and Spanish by TMC. Use this setup when using the data written in another language and changing the titles on the screen.

-About the Screen Language Setup, you should go to the [Area/Language Setup] screen.

\*NOTICE: Please note that if the text you input was too long, it might get truncated on screen, as in the following cases:

case 1: The rightmost letters of the title are not visible.

case 2: The rightmost letters of the message are not visible.

case 3: The text inside buttons become truncated on its left and right.

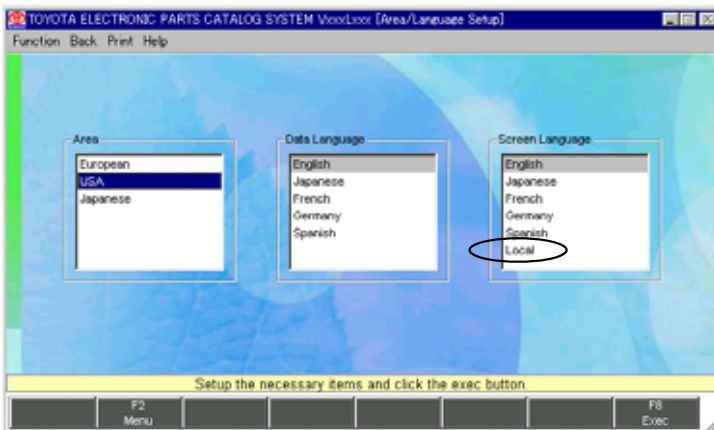

case 4: On the Group Title (ex. Letter of “VIN/VDS” on “Vehicle Input”), some characters aren’t displayed.

Changing the guidance, messages and help

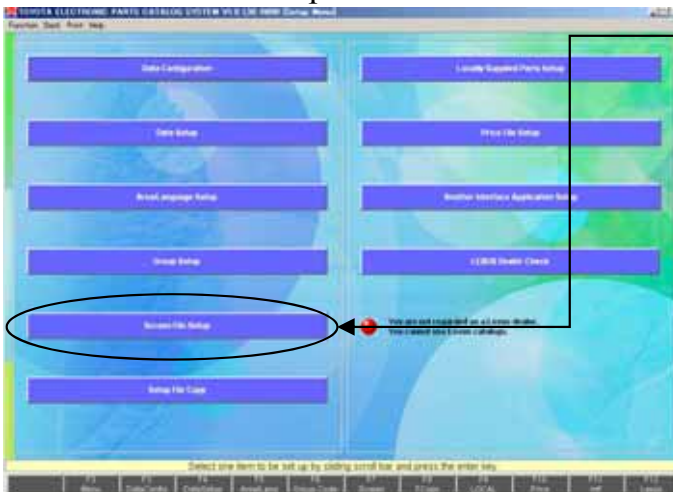

By directly editing the files for each language, you can change the contents that are displayed on the screen.

## Setup procedure

Select “Area/Language Setup” and select “Local” in “Screen Language”(refer to P.58).

Please select “Screen Setup” of “SETUP MENU”.

\* Click the “Screen File Setup” button.

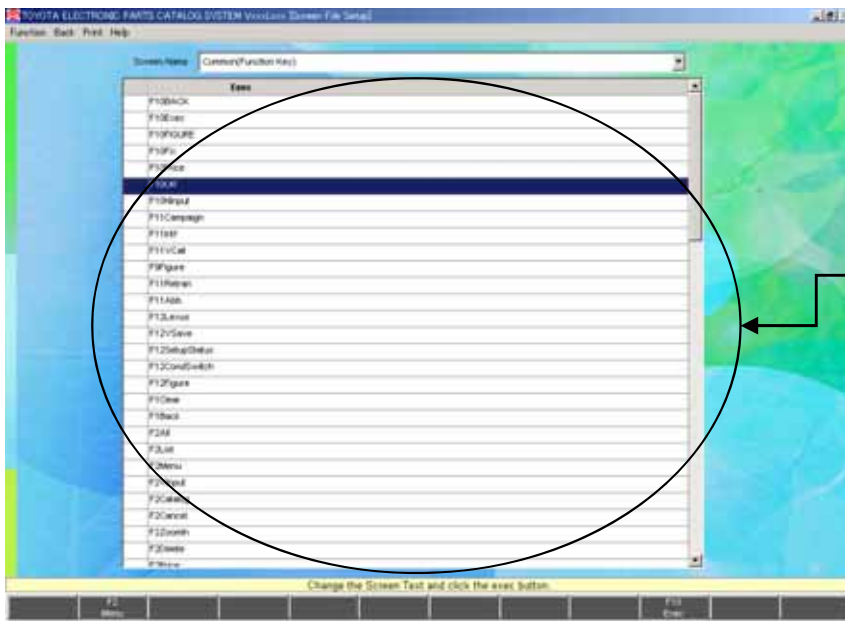

## 4-6. Screen / Message box Language-2

\* Select an item from the drop-down list box.

\*\* The list is classified as follows:

- Function Key  
-> Common(Function Key)
- Menu Item  
-> Common(Menu)
- Items on each screen  
-> Each screen name

\* The items you can change will appear.

\* Select the Screen Text you want to update and press the "Enter" key.

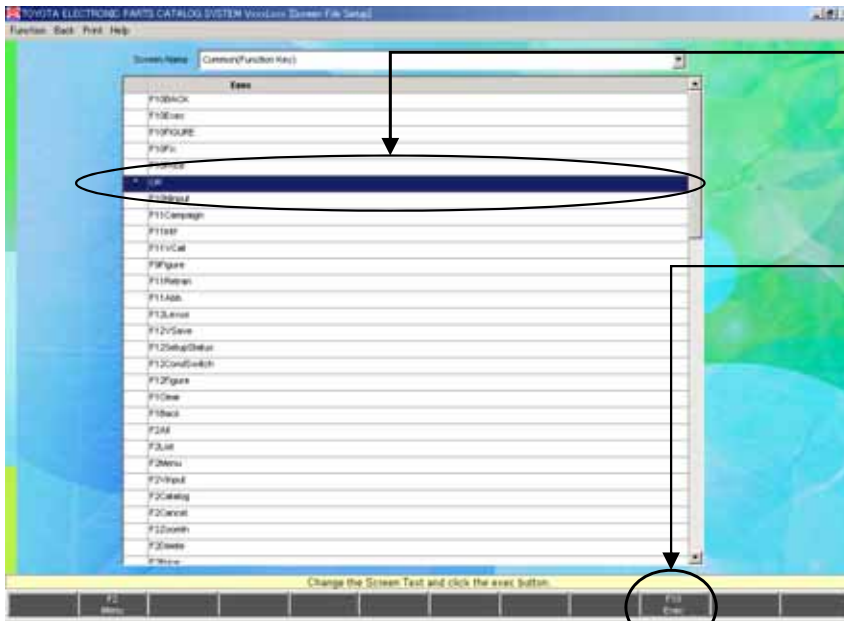

\* Enter the content you want to update with, click the "Exec" button.

- To go back without updating the data, click the "Cancel" button.

## 4-6. Screen / Message box Language-3

- \* "\*" is displayed on the left of the changed Screen Text.
- \*\* If you have any other item to be changed, repeat the same operations.
- \* Click the "Exec" button to reflect your changes to the system.

- \* When "\*" has disappeared, the update process is complete.

Close the EPC and restart it, and your translation will be reflected.

# 4-6. Screen / Message box Language-4

---

## When you need to change .....

### (1) Operation and Error Messages

1. Edit “dencata\_?? .ini” with a text editor. (?: See \*1 for more details. dencata\_?? .ini is located on X:\TMCEPCW3\APLI\translations directory.)
2. Basic rule for the message file is as follows;  
You must change messages after “=”.  
You can’t add a new message ID and change message ID.  
The text of a message should be written on one line (it cannot include carriage returns).  
Message ID including “MG” are guidance messages.  
Message ID including “ME” are error messages.  
Message ID including “MB” are Message Box guidances. (See Appendix B for more details.)
3. After editing, restart the TOYOTA Electronic Parts Catalog System.

### (2) Help

1. Edit GXXXXX?? .txt by use of an edit program.  
(XXXXXX means Screen ID. See < the Help File Name and the Screen >(P.129) for more details.  
?: See \*1 for more details.)  
(GXXXXX ?? .txt is located on X:\TMCEPCW3\HELP directory.)
- \*1: ?? means “Screen Language” selected on “Area/Language Setup”.  
(?: “01” as English, “02” as Japanese, “03” as French, “04” as Germany, “05” as Spanish and “99” as Local.)  
When you selected English as “Screen Language” on “Area/Language Setup”, you must edit “01” files.

## 5. For Distributors (File layout)

# 5. File Layout -1

## < Local Price File >

-In the case of including one kind of price.

PRICE(text file format)

Starting column	Length	Content	Note
0	12	Part Number	
12	8	Price	Including “,” or “.”
20	10	Remarks	
30	20	Part Name	

### **NOTE :**

- “,” in ‘Price’ should be specified by three digits.
- “.” in ‘Price’ means a decimal point.
- ‘Price’(including ‘List Price’) field allows only number except “,” and “.”.

-In the case of including one kind of price.

PRICExxx.CSV(CSV file format)-----xxx is a sequential number starting with ‘001’.

Length	Content	Note
Between 10 and 12	Part Number	
Max 8	Price	Including “,” or “.”
Max 10	Remarks	
Max 20	Part Name	

### **NOTE :**

- “,” in ‘Price’ should be specified by three digits.
- “.” in ‘Price’ means a decimal point.
- ‘Price’(including ‘List Price’) field allows only number except “,” and “.”.
- Each data must be divided by comma(,), but it is not necessary to add double quotation mark(“”).
- In the case of including comma(,), the data must be added double quotation mark(“”).
- You must make sorted price data by the key of Part Number.
  - \* Also, when the several price files are created, the product numbers between the price files should be in ascending sequence.
- CSV file format is generally supported by Microsoft Excel etc.

# 5. File Layout -2

-In the case of including three kinds of price.

PRICE3(text file format)

Starting column	Length	Content	Note
0	12	Part Number	
12	8	List Price	Including “,” or “.”
20	8	Trade Price	Including “,” or “.”
28	8	Cost Price	Including “,” or “.”
36	10	Remarks	
45	20	Part Name	

**NOTE :**

- “,” in ‘Price’ should be specified by three digits.
- “.” in ‘Price’ means a decimal point.
- ’Price’(including ‘List Price’, ‘Trade price’ and ‘Cost Price’) field allows only number except “,” and “.”.

-In the case of including three kinds of price.

PRICE3xxx.CSV(CSV file format)----xxx is a sequential number starting with ‘001’.

Length	Content	Note
Between 10 and 12	Part Number	
Max 8	Price Price	Including “,” or “.”
Max 8	Trade Price	Including “,” or “.”
Max 8	Cost Price	Including “,” or “.”
Max 10	Remarks	
Max 20	Part Name	

**NOTE :**

- “,” in ‘Price’ should be specified by three digits.
- “.” in ‘Price’ means a decimal point.
- ’Price’(including ‘List Price’, ‘Trade price’ and ‘Cost Price’) field allows only number except “,” and “.”.
- Each data must be divided by comma(,), but it is not necessary to add double quotation mark(“”).
- In the case of including comma(,), the data must be added double quotation mark(“”).
- You must make sorted price data by the key of Part Number.
  - \* Also, when the several price files are created, the product numbers between the price files should be in ascending sequence.
- CSV file format is generally supported by Microsoft Excel etc.

## < Locally Supplied Parts File >

-In the case of replacing one Japan source part number with one locally supplied part number.

LOCALP(Text file format, it is the same format as EPC DOS version)

Starting column	Length	Content	Note
0	12	Japan source part number	Part number to be replaced by locally supplied part number
12	12	Locally Supplied Part Number	
24	20	Remarks	

-In the case of replacing one Japan source part number with one or multiple Locally supplied part numbers.

LOCALP1(CSV file format)

Length	Content	Note
Between 10 and 12	Japan Source part Number	
Between 10 and 12	Locally Supplied Part Number	
4	Production Date(From)	YYMM
4	Production Date(To)	YYMM
Max 30	Remarks	

### **NOTE :**

- Each data must be divided by comma(,), but it is not necessary to add double quotation mark("").
- In the case of including comma(,), the data must be added double quotation mark("").
- You can make multiple data with the key of Japan Source Part Number.
- CSV file format is generally supported by Microsoft Excel etc.

-In the case of adding Local unique part numbers to TMC part name code.

LOCALP2(CSV file format)

Length	Content	Note
6	Catalog Code	
Max 6	TMC part name code	
Between 10 and 12	Local Unique Part Number	
4	Production Date(From)	YYMM
4	Production Date(To)	YYMM
Max 30	Remarks	

### **NOTE :**

- Each data must be divided by comma(,), but it is not necessary to add double quotation mark("").
- In the case of including comma(,), the data must be added double quotation mark("").
- You can make multiple data with the key of Catalog Code and TMC part number code.
- CSV file format is generally supported by Microsoft Excel etc.

# 5. File Layout -4

---

-In the case of local unique illustrations and part numbers.

LOCALP3(CSV file format)

Length	Content	Note
6	Catalog Code	
4	Fig No	
Max 30	Fig Name	
Max 12	Image File Name	File name of Local unique illustration
Between 10 and 12	Local Unique Part Number	
4	Production Date (From)	YYMM
4	Production Date (To)	YYMM
Max 30	Part Name	
Max 30	Remarks	

**NOTE :**

- Each data must be divided by comma(,), but it is not necessary to add double quotation mark("").
- In the case of including comma(,), the data must be added double quotation mark("").
- You must make multiple data with the key of Catalog Code, Fig No, Fig Name and Image File Name.
- Image data must be made according to the bitmap format (BMP), JPEG format (JPG or JPEG) and PNG format (PNG).  
Image data size is free. But if image is bigger than display area, the image is displayed with a scale-down.
- CSV file format is generally supported by Microsoft Excel etc.

- MG501200=Enter part name codes and quantities and press F8 key.
- MG801001=Enter abbreviation and press F6 key.
- MG801002=Enter abbreviation and press F6 key.
- MG802001=Check the Vehicle Information.
- MG804001=To print this Help, select "Print>List Prnt" from the menu.
- MG805001=Enter a part number and press enter key.
- MG805002=Please press F1 key to retrieve again.
- MG805003=Enter a part number and press enter key.

# 5. File Layout -11

---

MG901000=Select one item to be set up by sliding scroll bar and press the enter key.  
MG902000=Please choice the appropriate EPC CD(s) you want to use.  
MG902001=Insert the latest %1 to the CD drive and press "Enter" key. When you want to cancel, press "Esc" key.  
MG902002=%1 is being setup now.  
MG902003=The data cannot be copied. Check the [Data Configuration].  
MG902004=Insert the setup %1 to the CD drive and press "Enter" key. When you want to cancel, press "Esc" key.  
MG902005=  
MG902006=Insert the New Layout %1 to the CD drive and press "Enter" key. When you want to cancel, press "Esc" key.  
MG902101=Please choice the appropriate EPC CD(s) you want to use.  
MG902102=Select the System Environment and press F8 key.  
MG903000=Setup the necessary items and press F8 key.  
MG904000=Select both File and Drive, and press F6/F8 key.  
MG904001=Please wait.  
MG905000=Select a File Type and click "Brows" button to specify a file.  
MG905001=Press F8 key.  
MG905002=Please wait.  
MG905100=Select a folder for the Image Data and press F6 key.  
MG905101=Please wait.  
MG906000=Select a File Type, and click "Brows" button to specify a file.  
MG906001=Press F8 key.  
MG906002=Please wait.  
MG907000=Enter the LEXUS dealer password given for this set of CDs and press F8 key.  
MG907001=The Password is wrong. You can't use a Lexus catalog.  
MG907002=Please wait. Your data is being inquired.  
MG907003=The data cannot be copied. Check the [Data Configuration].  
MG908000=Enter group code to retrieve saved data or to create a new one.  
MG908001=Enter a Group Name and pressing enter key.  
MG908002=Enter PNC# for this group code. Filling spaces for a PNC# deletes that entry.  
MG908003=Enter a Catalog Code (the first 3 digits) you want to register in this group.  
MG908100=Select a group code by sliding scroll bar and pressing enter key.  
MG909000=Edit scrrn texts.  
MG909100=Enter a Screen Text (New) and press F8 key.  
MG910000=Select the next function by pressing an appropriate PF key.  
MG910100=Enter the data and press F10 key.  
MG911001=To fax this Log File, select "Print>Print" from the menu.

## 6. EPC System Setup File Copy

# 6. Setup File Copy-1

## Description of the functions

If you perform the reflection of the "Environmental Information" in the Setup File Copy, the environment of the terminal that performed the extract will be copied, so it is useful when creating several terminals with the same environment for the electronic catalog.

The Setup File Copy enables you to "extract" and "reflect" the environment setting information that has been setup on the EPC system and is used as follows:

(Extract)

- stores the current environment settings on the EPC system

(Reflect)

- restores the environment settings on the EPC system in the case it is broken
- creates the same environment on the EPC system in the other machines

You can select the following information and "extract" and "reflect" it.

- Group code data

You can mirror the contents which set up in the [Group Setup] screen.

- Environment data

You can mirror the contents which set up in the [Data Configuration] screen.

- Screen data

You can mirror the contents which set up in the [Screen File Setup] screen.

## Setup procedure

However, if you reflect the environment of the "Server" or "Standalone", the data setup is required.

Please select "Setup File Copy" of "SETUP MENU".

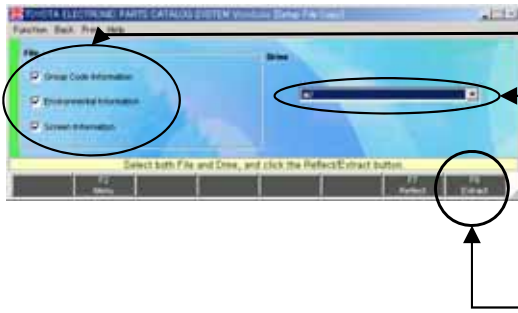

\* Click the "Setup File Copy" button.

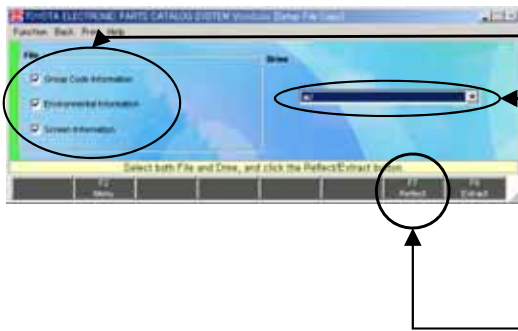

# 6. Setup File Copy-2

## To extract the Setup Information ;

- \* Select the File you want to extract.
- \*\* In case of client, you cannot tick the “Group Code Information”.
- \* Select the drive where you want to store it.
- \*\* If you want to store it on a floppy, insert the floppy disk to the drive.
- \* Click the “Extract” button to execute it.

## To reflect the Setup Information ;

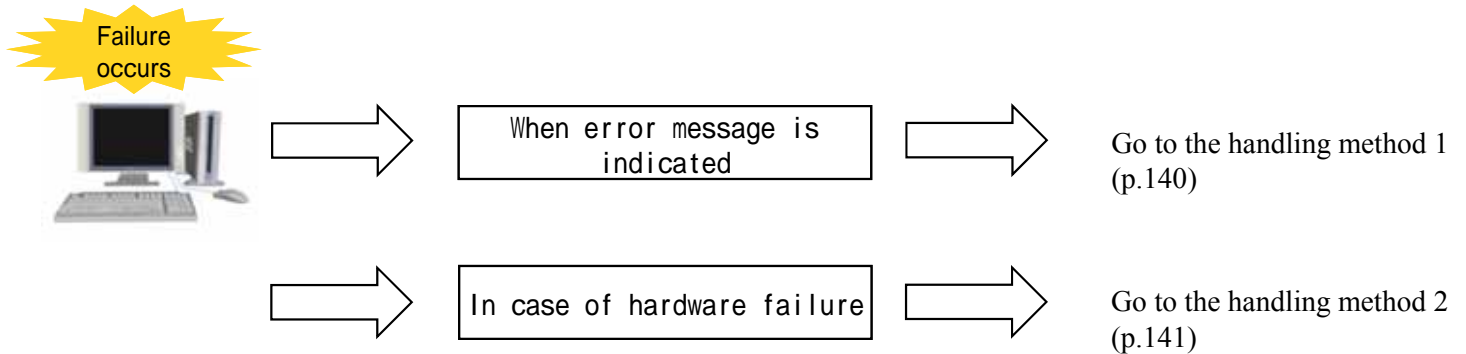

- \* Select the File you want to reflect.
- \*\* In case of client, you cannot tick the “Group Code Information”.
- \* Select the drive where you extract it.
- \*\* If you want to extract it from a floppy, insert the floppy disk to the drive.
- \* Click the “Reflect” button to execute it.

## 7. Dealing with Failures

# 7. Handling Failures-1

When a failure occurs, accurately understand what is going on, and you need to clarify the issues such as "whether it is necessary to deal with it immediately", "where you need to contact to" or "whether it is OK to continue a normal business operation".

If a failure occurs, deal with it according to the following procedure:

## < Handling method 1 >

If a failure (error message) occurs while using the electronic catalog, check the following items, and then contact the DIST in charge.

- (1). In which screen did the failure occur? . . . Vehicle Input, Parts Number Translation Results, . . .etc.
- (2). What were you trying to do when the failure occurred? . . . Tried to move to the next screen, trying to print...etc.
- (3). What kind of errors occurred? . . . Code=5001 error occurred...etc.

\* (1) Checking the screen name, the version of PGM used, and data Area/DVD issue.

\* (2) Checking the operation procedure

\* (3) Checking error code

\*\* Pressing [Print] button will print the hard copy of the screen.

# 7. Handling Failures-2

---

## < Handling method 2 >

If a hardware failure occurs in the terminal that uses the electronic catalog, after the recovery of the terminal, re-create the environment according to the following procedure.

(1) When the operation was performed by Standalone

-> 2-1(p.7). Follow the Installation Flowchart (Setup at Standalone PC) and perform the program installation and data setup again.

(2) When the operation was performed by Server/Client

- In case of the server terminal

-> 3-1(p38). Follow the Installation Flowchart (Setup at Serve PC) and perform the program installation and data setup again.

- In case of the client terminal

-> 3-1(p.39). Follow the Installation Flowchart (Setup at Client PC) and perform the program installation and data setup again.

\*\* If the server terminal is changed, perform the allocation of the network drive again by using the same drive.
